QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT  
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS  
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's  
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,  
BY ALEX. THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from  
E. PONSONBY, 116, GRAFTON-STREET, DUBLIN; or  
WYMAN AND SONS, LTD., FETTER LANE E.C.; or  
OLIVER AND BOYD, EDINBURGH.

*Price One Shilling.*

---

**Marriages:—**OOT., NOV., DEC., 1904. **Births & Deaths:—**JAN., FEB., MAR. 1905.

---

During the quarter ended 31st March last, there were registered in the 827 Registrars' Districts in Ireland 25,743 births—a number equal to an annual birth-rate of 23·5 in every 1,000 of the estimated population\*—and 21,891 deaths, representing an annual rate of 20·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 6,307 persons emigrated.

In England last quarter, the birth-rate represented was 27·9 in every 1,000 of the estimated population, and the death-rate 17·4 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 under the average rate for the corresponding quarter of the ten years 1895–1904, and 0·8 under the rate for the first quarter of 1904. The deaths are 2,477 under those registered in the corresponding quarter of 1904; the death rate is 2·2 below the rate for that quarter, and 1·7 below the average for the first quarter of the ten years 1895–1904.

\* See page 80.

## 2      *Registration of Marriages, Births, and Deaths, Ireland.*

Compared with those for the corresponding quarter of 1904, the returns of pauperism, furnished by the Local Government Board, show a decrease of 166 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 1,836\* in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1895-1904, the number of Workhouse inmates shows an increase of 715, and the number of persons on out-door relief of 107,\* the total under both heads being 0·8 per cent. above the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·1 per cent.

The annual marriage-rate (4·7 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1904 is 0·1 above the average rate for the corresponding quarter of the preceding ten years.

TABLE L.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of Marriages registered during the Quarter ended 31st December, 1904, and by the Births and Deaths registered in the Quarter ended 31st March, 1905.

\* Not taking into account those persons relieved by means of works devised for the relief of distress, as from the 11th February. See Table VII.

† The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (\*), page 19.

## MARRIAGES.

The marriages (5,168) registered in Ireland during the fourth quarter of 1904 are equivalent to an annual rate of 4·7 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1903, but 0·1 above the average rate for the fourth quarter of the ten years 1894–1903. The total number of marriages registered during the year was 22,783, or 5·2 per 1,000 of the population, being 0·2 over the average rate for the preceding ten years; 16,192 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 6,591 under the 7 and 8 Vic., cap. 81; the former number being equal to 5·0 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·8 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows an increase of 0·4, but that under the latter a decrease of 0·4. Of the 22,783 marriages registered last year, 6,950 were registered in the first quarter, 5,337 in the second, 5,328 in the third, and 5,168 in the fourth.

## BIRTHS.

The number of births registered during the quarter ended 31st March last was 25,743—13,048 boys and 12,695 girls—being equal to an annual ratio of 1 in every 42·6, or 23·5 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1895-1904 was 26,675, equivalent to an annual rate of 23·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 23·7 per 1,000 of the population according to the Census of 1901; Munster, 21·9; Ulster, 24·0; and Connaught, 21·7.

The highest county birth-rate\* is 33·0 for Dublin Co. Borough, and the lowest 17·5 for Monaghan. Of the intermediate rates the highest five are—Belfast Co. Borough, 32·8; Mayo, 25·6; Louth, 24·5; Donegal, 23·7; and Londonderry Co. and Co. Borough, 23·6. The lowest five are—Kilkenny, 17·8; Leitrim, 18·2; Cavan, 18·2; Roscommon, 18·5; and King's, 18·6.

#### DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 21,891—10,783 males and 11,108 females—affording an annual ratio of 1 in every 50·1, or 20·0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1895-1904 was 21·7 per 1,000.

The death-rate in Leinster was 21·6 per 1,000 of the population according to the Census of 1901; in Munster, 18·7; in Ulster, 20·3; and in Connaught, 16·0.

The county death-rates\* range from 14·4 in Mayo to 26·9 in Dublin County Borough. Between these rates the lowest five are—Roscommon 15·1; Donegal, 15·4; Kerry, 15·5; Sligo, 15·9; and Leitrim, 16·1; and the highest five are—Armagh, 23·8; Belfast Co. Borough, 22·9; Louth 21·9; Queen's, 21·8; and Wexford, 21·7.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1895-1904, and the average number for that period; also the number registered during the first quarter of the year 1905:—

\*See note (†) on page 2.

**Ages.**—Of the 21,891 deaths registered last quarter, 2,843, or 13·0 per cent., were of children under 1 year old; and 9,476, or 43·3 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 110·4 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 13·6 per cent. of the total deaths registered therein; in Munster, 13·4 per cent.; in Ulster, 13·3 per cent.; and in Connaught, 9·9 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 39·9 per cent.; in Munster, to 44·4 per cent.; in Ulster, to 42·7 per cent.; and in Connaught, to 51·2 per cent. of the total deaths registered in the province.

#### HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal epidemic diseases\* is 890, or less by 10 than the number occurring in the corresponding quarter of 1904, and is equivalent to an annual rate of 0·8 per 1,000 living, being equal to the rate for the first quarter of 1904, but 0·2 below the average rate for the first quarter of the ten years 1895–1904.

**Small-pox.**—One death from small-pox, of an unvaccinated person, was registered as occurring in the Small-pox Hospital, Purdysburn, in the Registrar's District of Ballylesson, and who was admitted thereto from Belfast. Two deaths from small-pox (not yet registered) were reported by the Registrar of Rathmullan District, as having occurred in the Milford Union Hospital, in the County of Donegal.

**Measles.**—The deaths from measles numbered 297, which represents an annual rate of ·27 per 1,000 of the estimated population of Ireland; in the three quarterly periods preceding, the deaths from this disease were 85, 87, and 262, respectively, and the average for the corresponding quarter of the five years 1900–1904 was 172. Of the 297 deaths, 112 occurred in Belfast County Borough, 54 in Dublin County Borough, 27 in Tipperary Co., S.R. (all occurring in the Registrar's District of Carrick-on-Suir); and 24 in Londonderry County, 18 of the latter having been registered in the Registrar's District of Coleraine.

**Scarlet Fever.**—The deaths from scarlet fever registered during the March quarter of 1905 numbered 61; in the three preceding quarters deaths from this disease were 45, 41, and 62, respectively, the average for the corresponding quarterly periods of the five years preceding 1905 being 58. Of the total deaths, 24 were registered in the Province of Leinster, one in the Province of Munster, 27 in Ulster, and 9 in Connaught. Eight of the deaths registered in Leinster occurred in the County Borough of Dublin and 8 in Wexford County, 3 of the latter occurring in the Registrar's District of New Ross. Of the deaths registered as from scarlet fever in the Province of Ulster, 12 occurred in the County Borough of Belfast.

**Typhus.**—The deaths from typhus, 12 in number, were registered as follows:—One in the Registrar's District of Callan, in the Union of Callan, 1 in Ventry District, Dingle Union, 1 in the District of Tralee,

\* See note (f) on page 8.

No. 1, in the Union of Tralee, 6 in Waterford Urban, No. 1 District, 2 in the Registrar's District of Tuam No. 1, Tuam Union, and 1 in Sligo No. 1 District, in the Union, or Superintendent Registrar's District of Sligo. In the three quarterly periods preceding, the deaths from typhus were 17, 18, and 5 respectively, the average for the corresponding quarter of the past five years being 21.

**Whooping-cough.**—Deaths from whooping-cough, which in the second quarter of 1904 amounted to 431, fell to 249 in the September quarter, and to 235 in the December quarter of that year, further declined to 194 in the period now under notice, the latter figure representing an annual death rate of .18 per 1,000 of the estimated population of Ireland, and is about two-thirds of the average (299) deaths from this disease in the corresponding quarter of the five years 1900–1904. It appears from Abstract I., pages 18 and 19, that during the quarter no death from whooping-cough was registered in any of the following counties:—Louth, Meath, Fermanagh, Londonderry County and County Borough, Monaghan, Leitrim, or Sligo. Of 11 deaths in King's County, 8 were registered in the District of Ferbane, Birr Union, and of 13 deaths in the County Wexford, 5 were registered in the Registrar's District of Enniscorthy; in the County of Cork 20 deaths were registered, 4 occurring in the District of Kinsale, Kinsale Union, and 4 in the Registrar's District of Castlemartyr, in the Union of Middleton; in County Kerry 13 deaths were registered, 4 occurring in the Registrar's District of Dingle; in the County of Armagh 22 deaths from whooping-cough were registered, 20 occurring in the Registrar's District of Lurgan No. 1, and in the County Down 18 deaths were registered, 5 being in the Registrar's District of Dromore, in the Union of Banbridge.

**Diphtheria.**—In the period under notice 81 deaths from diphtheria were registered, the deaths from this disease in the preceding three quarters being 47, 56, and 92 respectively. Two deaths were registered in each of the following Unions:—Ballina, Bawnboy, Carlow, Coleraine, Kilkeel, Killala, Omagh, and Swineford; 3 deaths were registered in Cookstown; 11 in the Unions of Dublin North and Dublin South, of which 4 appertained to the City Districts of North Dublin Union, 5 to the City Districts of South Dublin Union; and 14 in the Union of Belfast, all of the latter appertaining to the County Borough of Belfast.

**Enteric Fever.**—The deaths from enteric fever which were registered during the March quarter of the year numbered 105. The deaths are below the average (131) for the corresponding quarter of the past five years, and also below the number (110) registered in the March quarter of 1904. The deaths registered from enteric fever in the three quarters preceding that under review were—96, 104, and 133 respectively. In the following Counties no death from the disease was recorded:—Kildare, Louth, Wicklow, Tipperary, S.R., Waterford County and County Borough, Cavan, Fermanagh, Mayo, and Sligo. Ten deaths were registered in Dublin County Borough, and 21 in Belfast County Borough.

**Diarrhoeal Diseases.**—The deaths attributed to diarrhoeal diseases were 130 in number, and included the deaths returned as epidemic

diarrhœa, epidemic enteritis, diarrhœa, and dysentery. Of these deaths 16 appertained to the County Borough of Dublin and 17 to the County Borough of Belfast.

**Hydrophobia.**—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in 2 districts, measles in 44 districts, scarlet fever in 17, whooping-cough in 38, diphtheria in 22, fever in 29—typhus 6, enteric 17, and pyrexia (origin uncertain) 6—influenza in 83, chicken-pox in one, and mumps in 5.

**Inquests.**—There were 467 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 47 of the total deaths registered.

In Leinster there was 1 inquest to every 41 deaths registered, in Munster 1 to 67, in Ulster 1 to 38, and in Connaught 1 to 96.

**Deaths in Public Institutions.**—Of the 21,891 deaths registered, 4,252, or 19·4 per cent., occurred in public institutions. In Leinster the percentage was 26·5, in Munster 23·4, in Ulster 13·8, and in Connaught 12·1.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1905, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.

## URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third total population of the country, was 23·4, and the birth-rate 29·4 per 1,000 of the population according to the Census of 1901; in the remainder of the country the death-rate was 10·5 and the birth-rate 20·4 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·5 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1905, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths from Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES.†

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus \* following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 1st April, 1905.

## VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1905, there were 16,363 persons successfully vaccinated; in 3,385 cases the operation was postponed, 9 children were reported as insusceptible of vaccination, and the deaths of 1,610 unvaccinated children under 3 months old were registered, making a total of 21,367 children with regard to whom particulars as to vaccination were ascertained.

† See note (†), page 8.

**EMIGRATION.**

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 6,307 (3,506 males and 2,801 females), being 2,820 more than in the corresponding quarter of the year 1904, and 1,847 above the average number for the first quarter of the ten years 1895–1904.

\* Including 4,861 emigrants to the United States of America, viz. :—348 in the month of January, 660 in February, and 3,853 in March. Of 4,706 steerage passengers, 1,981 had their passages paid for in America.

**PRICES AND PAUPERISM.**

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1904 the average price was 5½*d.*, and in the corresponding quarter of 1895 it was 4½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* 6*d.* per cwt., being the same as the average for the corresponding quarter of the year 1904. In the first quarter of 1895 the average price was 13*s.* 6*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2*s.* 9*d.* to 3*s.* 4*d.* In the first quarter of 1904 the average prices were 3*s.* 7*d.* to 4*s.* 3*d.*, and the prices for the corresponding quarter of 1895 were 4*s.* 1*d.* to 4*s.* 11*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 45*s.* to 55*s.* per cwt. In the corresponding quarter of 1904 the average prices were from 47*s.* 6*d.* to 55*s.* 6*d.*, and in the first quarter of 1895 they were from 46*s.* to 55*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 18*s.* per ton nett.

The highest price of 2¼ per cent. Consols at the Dublin Stock Exchange for the quarter was £91¾, and the lowest £87¾. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was 3½ per cent., to which it was lowered from 4 per cent. on the 10th March.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1905 was 46,304, or 166 under the average for the corresponding period in 1904.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average weekly number of persons receiving out-door relief during the quarter was 59,554\*, being 1,836 over the average for the first quarter of 1904.

Of the persons receiving in-door relief during the first quarter of 1905, an average number of 1,451 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1904 the average weekly number was 1,425.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1905, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									NUMBER OF PERSONS RELIEVED.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was 4d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

#### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the first quarter of the years 1900–1905, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14):—

The mean height of the barometer during the first quarter of 1905 was 29.994 inches, being .139 above the average for the corres-

\* See note (\*) on page 2.

† Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

ponding quarter of the five years 1900-1904; the highest reading (31·004 inches) was on the 28th January, at 9 P.M., wind W.; and the lowest (28·315 inches) on the 15th March, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 42·5 or 2·2 above the average for the first quarter of the five years 1900-1904.

The maximum temperature of the air during the quarter was 61·8 and the minimum 22·9°. The maximum heat in sun was 114·5°, and the minimum on the grass 17·8°.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 4·910 inches, being 2·192 inches below the average for the first quarter of the five years 1900-1904. The greatest monthly rain-fall was in March, when 2·570 inches were registered.

The wind blew on 40 days from W., on 22 days from S.W., on 7 days from S.E., on 4 days from S., on 3 days from N.W., on 2 days each from N. and E., and the air was calm on 10 days at 9 A.M.

*January.*—The mean height of the barometer during this month was 30·200 inches; the highest reading (31·004 inches) was on the 28th at 9 P.M., wind W.; and the lowest (28·771 inches) on the 16th, at 9 P.M., wind S.E. The mean temperature of the air was 42·5°, the maximum registered was 52·4°, and the minimum 23·0°. The 6th was the warmest day, and the 26th the coldest night. The mean of the dry bulb was 41·4°, and of the wet bulb 39·7°. The maximum heat in sun was 89·1°, and the minimum on the grass 17·8°. The minimum on the grass was below 32° on 13 nights. The total amount of sunshine recorded was 57·9 hours, the greatest daily amount being 7·3 hours on the 18th. The maximum ozone was 1·0, the minimum 0·1, and the mean 0·5. Rain or snow fell on 14 days. The rain-fall measured 1·440 inches; the greatest amount in 24 hours was ·375 inch on the 16th.

*February.*—The mean height of the barometer during this month was 30·179 inches; the highest reading (30·664 inches) was on the 21st at 9 A.M., wind N., and the lowest (28·951 inches) on the 26th, at 9 P.M., wind S.W. The mean temperature of the air was 41·9°, the maximum registered was 54·5°, and the minimum 26·9°. The 16th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 41·6°, and of the wet bulb 40·0°. The maximum heat in sun was 95·5°, and the minimum on the grass 20·0°. The minimum on the grass was below 32° on 14 nights. The total amount of sunshine recorded was 96·9 hours, the greatest daily amount being 8·5 hours on the 25th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 16 days. The rain-fall measured 0·900 inch; the greatest amount in 24 hours was ·210 inch on the 25th.

*March.*—The mean height of the barometer during this month was 29·602 inches; the highest reading (30·279 inches) was on the 2nd at 9 P.M., air calm; and the lowest (28·315 inches) on the 15th, at 9 A.M., wind S.W. The mean temperature of the air was 43·1°; the maximum registered was 61·8°, and the minimum 22·9°. The 22nd was the warmest day, and the 3rd the coldest night. The mean of the dry bulb was 44·0°, and of the wet bulb 42·4°. The maximum heat in sun was 114·5°, and the minimum on the grass 18·5°. The minimum on the grass was below 32° on 23 nights. The total amount of sunshine recorded was 156·7 hours, the greatest daily amount being 11·0 hours on the 24th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·5. Rain or snow fell on 24 days. The rain-fall measured 2·570 inches; the greatest amount in 24 hours was ·620 inch on the 14th.

## TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared under the direction of the Meteorological Council.*

In compiling the following Table (pp. 16, 17), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

## LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head, . . . . .	The Meteorological Council.
Donaghadee, . . . . .	The Meteorological Council.

[illegible]

(a) See note (\*), page 19.

\* The Registrars' Districts (827 in number) are sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same Unions formed under the Medical Charities Act. The letter Y denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 31 and 32 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 1st January, 1905, to 1st April, 1905. With the exception of 98 deaths of persons from localities outside the Registrars' Districts, and the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

‡ Exclusive of 12 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingsdown, to which they have been assigned.

§ Formerly described as "Simple Continued Fever."

NOTE.—This table has been constructed for the year 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1905—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

## APPENDIX.

### REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

#### I.—PROVINCE OF LEINSTER.

##### Carlow County.

BALTINGLASS; *Rathilly*.—Whooping-cough prevalent in the Clonmore division of the district; three deaths registered from the disease.

CARLOW; *Bagenalstown*.—District healthy. There have been a great many cases of mumps, but only one death from same.

CARLOW; *Borris*.—Three deaths registered over 90 years, and seven over 80 years.

CARLOW; *Clonegall*.—We had an epidemic of measles during the quarter, and all vaccinations had to be postponed.

CARLOW; *Leighlinbridge*.—District healthy.

CARLOW; *Tullow*.—This district has been in a very healthy condition during this quarter. Three deaths were registered over 90 years, and four over 80.

##### Dublin County.

BALROTHERY; *Holmpatrick, W.*—The district has been exceptionally healthy this quarter.

CELBRIDGE; *Lucan*.—Catarrh and influenza prevalent.

DUBLIN NORTH; *Blanchardstown and Castleknock*.—Several cases of measles occurred early in the quarter; epidemic appears at an end.

DUBLIN NORTH; *Clontarf and Howth, No. 2*.—Vaccinations postponed owing to whooping-cough being prevalent during the quarter.

DUBLIN SOUTH; *Tallaght*.—No serious diseases during quarter.

##### Kildare County.

ATHY; *Castledermot*.—District healthy.

ATHY; *Monasterevin*.—Whooping-cough was very prevalent during the quarter.

BALTINGLASS; *Baltinglass, No. 2*.—Mumps prevalent.

CELBRIDGE; *Celbridge, W.*—District healthy.

CELBRIDGE; *Kilcock*.—Influenza was prevalent during the first month of the quarter, and caused a number of cases of broncho-pneumonia amongst the children of the district.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—A large number of children had "colds" necessitating vaccination being postponed. Several infants had severe pneumonia and bronchitis.

EDENDERRY; *Rathangan, No. 1*.—Two inquest cases, one a young man employed on a Grand Canal boat, who accidentally fell from the boat into the canal on the night of the 30th December. He was not missed for some time, and his body was not recovered until after the lapse of some hours; the other, that of a young man, who was asphyxiated by an overturned car that he had been driving, jamming him against a wall at the outlet of the town. A death occurred from tuberculosis of lungs—three years' duration—a young unmarried girl, a sempstress. A young man died from the effects of a fall from the battlements of Rathangan bridge on which he had been sitting.

NAAS; *Clane and Timahoe, North*.—Measles very prevalent among children—one death. I registered the death during quarter of a woman 96 years, of

another woman 92 years, and two other deaths of women, one 85 years, and the other 87 years. All enjoyed good health up to a week of their deaths.

NAAS; *Kildare*.—Sanitary condition good.

NAAS; *Naas and Carragh, W.*—Vaccination very backward.

#### Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy and free from zymotic disease.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very good. Some cases of whooping-cough.

CASTLECOMER; *Castlecomer, W.*—Deaths below the average this quarter.

KILKENNY; *Tullaroan*.—Health and sanitation of district fairly good.

NEW ROSS; *Dysartmoon*.—Health of the district good.

URLINGFORD; *Urlingford, W.*—Four deaths from cancer registered during quarter. No epidemics, and health of district fairly good. Two deaths, a male and a female, aged respectively 101 and 100 years, have been recorded, their longevity being due to regular mode of living.

WATERFORD; *Kilmakevoe*.—One death from cancer of liver in a female aged 33 years. Deaths over 60 years—four males aged 62 years, 80 years, and 83 years (two), and three females aged 63 years, 72 years, and 87 years respectively.

WATERFORD; *Ullid*.—Vaccination has been more or less suspended during cold weather.

#### King's County.

BIRR; *Birr, W.*—There were about eight or nine cases of enteric fever reported to me in January. During the past two months there have been none reported.

BIRR; *Ferbane*.—Only one case of primary vaccination during quarter. Owing to the epidemic of whooping-cough the children were not brought in.

BIRR; *Killyon*.—Two cases of diphtheria occurred early in the quarter.

BIRR; *Kinnitty*.—District fairly healthy.

MOUNTMELICK; *Clonygowan, No. 2*.—District healthy.

ROSCREA; *Shinrone*.—The sanitary condition of district is fairly good. Deaths were registered during the quarter of two men aged 102 years each. Bronchitis and a mild form of influenza prevalent during quarter.

TULLAMORE; *Killoughy*.—Whooping-cough very prevalent. District fairly sanitary.

TULLAMORE; *Philipstown*.—Owing to the severity of the weather, the medical officer thought fit to postpone vaccination during the month of March. Three deaths registered at the ages of 96, 92, and 89 years respectively.

#### Longford County.

BALLYMAHON; *Abbeysrule*.—The sanitary arrangements are satisfactory. There were three cases of typhoid fever during the quarter. Influenza was common, particularly in children, as also bronchitis. Measles is making its appearance in the district.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee*.—The sanitary condition of the district is fairly good. There were no cases of contagious sickness during the quarter.

GRANARD; *Granard, W.*—The sanitary condition of district is good. No infectious diseases.

GRANARD; *Scrabby, No. 2*.—Vaccination postponed on account of severe weather.

#### Louth County.

ARDEE; *Castlebellingham*.—Sanitary state of district good. Influenza prevalent during quarter.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 3, W.*—The district was in a fairly healthy condition for past three months.

DROGHEDA; *Termonfeckin*.—Influenza prevalent as an epidemic during the quarter. Owing to the inclement season, the prevalence of influenza, and diseases of the chest and respiratory system generally, vaccinations were necessarily postponed in a good number of cases, parents evincing a reluctance in presenting infants at the several depôts for vaccination.

DUNDALK; *Barronstown*.—Influenza, complicated with chest affections, prevailed for most part of the quarter. The district is, however, now in a fairly healthy state.

DUNDALK; *Dromiskin*.—Influenza of mild type prevalent. Of the twenty deaths registered, eighteen were over 60 years.

DUNDALK; *Dundalk, W.*—There were nine deaths from phthisis pulmonalis—one of the senile variety. I believe the large percentage was greatly dependent on the epidemic of influenza which broke

out towards the end of February, prevailed very extensively for a month, and claimed five victims while it lasted; these five were all old people. I believe matters would have been worse but for the efficient manner in which the scavenging and general cleansing of the town are carried out. The sanitation is progressing in many ways, and the town is at present in a very healthy condition.

DUNDALK; *Ravensdale*.—Health of district very good. No epidemic disease. Sanitary condition and water supply excellent. The houses are kept clean, and better attention is paid to light and ventilation of sleeping rooms. The tuberculosis placards are read with intelligent interest, and I believe are having a good effect in controlling disease. Cancer is rather rare in this district; I see fewer cases than twenty-five years ago. Three deaths registered, the combined ages totalling 268 years.

#### Meath County.

DROGHEDA; *St. Mary's*.—The sanitary state of district is fairly good.

DROGHEDA; *Stamullen*.—The district has been healthy during the quarter.

KELLS; *Kilskeer*.—Sanitary condition of district good.

KELLS; *Moynalty*.—Post-influenzal neurasthenia very prevalent in this district.

KELLS; *Nobber*.—Public health of district excellent. Deaths registered not caused by any of the principal epidemic diseases, but have occurred through age, the ages ranging from 69 to 87 years. Four persons were re-vaccinated during the quarter.

NAVAN; *Painestown*.—No epidemic disease during quarter.

OLDCASTLE; *Oldcastle, W.*—Sanitary condition of district fairly satisfactory. There are some cases of typhoid fever from Ballyjamesduff and Virginia districts under treatment in the fever hospital at present.

TRIM; *Athboy*.—The sanitary condition of district is good.

TRIM; *Summerhill*.—District has been healthy; no cases of infectious nature. Sanitary condition fairly good.

#### Queen's County.

ABBEYLEIX; *Ballinakill*.—Health of district good.

MOUNTMELICK; *Clonygowan, No. 1*.—District very healthy.

MOUNTMELICK; *Emo*.—There has been one inquest, cause of death, syncope (suddenly) from heart disease.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter. I have registered the death of a man aged 102 years.

#### Westmeath County.

ATHLONE; *Glassan*.—Deaths of old people 84, 80 (two), and 75 years respectively.

BALLYMAHON; *Ballymore*.—Owing to an outbreak of measles, vaccination is backward.

MULLINGAR; *Ballynacarrigy*.—Sanitary arrangements in district are good as far as I am aware; no fatality from any of the principal epidemic diseases.

MULLINGAR; *Castletown Geoghegan*.—I had some cases of typhoid fever in the district; one death, a man aged over 60 years, from that disease.

MULLINGAR; *Killucan*.—The district was visited with influenza, complicated with pneumonia and bronchitis—children suffered considerably, four deaths occurring from it. A case of typhus fever occurred in the month of March, due to overcrowding in an old, bad, insanitary house. Vaccinations postponed owing to influenza with children.

MULLINGAR; *Milltown*.—There were registered three deaths of children thirteen months old and under, of seven persons between the ages of 75 and 85, and of one old woman in her 91st year. A mild epidemic of grippé prevailed throughout the quarter; head symptoms were prominent in those affected, and in a couple of cases the disease terminated in a chronic state of mental delusions, one of which, in the absence of efficient nursing, had to be removed to the workhouse infirmary. Other sequelæ of the epidemic are:—Phthisis, causing three deaths; pneumonia, two; bronchitis, two. Intestinal cancer (scirrhus of the duodenum) accounted for one death.

MULLINGAR; *Mullingar, W.*—The death average during the past quarter amongst the aged has been unusually large, public institutions being the principal contributors, the number of deaths in public institutions (52) corresponding exactly with that of the quarter ending 31st March, 1904.

#### Wexford County.

ENNISCORTHY; *Killann*.—All vaccination in the district has been postponed on account of measles.

**ENNISCORTHY; Newtownbarry.**—During December and January we had an epidemic of measles, and all vaccinations had to be postponed.

**GOREY; Camolin.**—The district is fairly healthy. No epidemic has occurred. There were a few cases of severe tonsillitis.

**GOREY; Coolgreany.**—Vaccinations had to be postponed owing to epidemic of whooping-cough.

**NEW ROSS; New Ross, W.**—District tolerably healthy. Epidemics of scarlatina and enteric evidently over. No vaccination performed by reason of parents not presenting their children.

**NEW ROSS; Old Ross.**—Measles was prevalent in one part of my district, but fortunately it did not extend through it.

**WEXFORD; Bannow.**—During the quarter there was an epidemic of scarlatina of a severe type. This was followed by measles and broncho-pneumonia. I am at present treating two cases of dog-bite, in one of which erysipelas has set in. The county is infested with mongrels, an evil which ought to be remedied by an increased dog-tax.

**WEXFORD; Bridgetown.**—Vaccination was postponed in consequence of the prevalence of scarlatina, measles, and whooping-cough, in the district.

**WEXFORD; Taghmon and Glynn.**—Measles prevalent during the quarter. Five deaths from measles registered, two certified.

### Wicklow County.

**BALTINGLASS; Kiltegan.**—The deaths, with one exception, were of people well advanced in life—two over 60 years, four over 70 years, and two over 80 years old. Whooping-cough is prevalent, but no deaths therefrom have as yet occurred.

**RATHDOWN; Bray, No. 1.**—Births and deaths about the average.

**RATHDOWN; Delgany.**—District healthy.

**RATHDOWN; Powerscourt.**—No epidemic of any kind reported during quarter.

**RATHDRUM; Annamoe.**—On account of measles in district, vaccinations had to be postponed.

**RATHDRUM; Arklow.**—Measles and whooping-cough were very prevalent in this district during quarter.

**RATHDRUM; Newcastle.**—Sanitary condition of district not good. In one village houses are without any sanitary

accommodation: all refuse matter thrown on street; houses occupied by human beings totally unfit for same.

**SHILLELAGH; Tinahely.**—The health of the district has been very good for the quarter. There was one case of enteric fever, which in all probability, got the infection outside district.

## II. PROVINCE OF MUNSTER.

### Clare County.

**BALLYVAGHAN; Ballyvaghan, W.**—District maintains its very healthy character. Eighty years is the average age of half the number of deaths registered (22) during the quarter.

**CORROFIN; Corrofin, W.**—Health of district fair. Influenza, prevalent in January, has gradually disappeared.

**ENNIS, Ennis, No. 2.**—District was very free from sickness during this winter.

**ENNIS; Newmarket.**—The health of the district has been satisfactory during the quarter, and all sanitary measures have been carefully attended to.

**ENNISTIMON; Ennistimon, W.**—The sanitary arrangements are satisfactory.

**ENNISTIMON; Roadford.**—District fairly healthy.

**KILLADYSERT; Ballynacally, W.**—The death from enteric fever registered was imported from the county Limerick, and took place on the 5th December in last quarter. No fresh case has occurred. It is quite an unusual, and to me unaccountable, feature of this return that the deaths of children under a year old are 20 per cent. of the number of deaths registered.

**KILLADYSERT; Labasheeda.**—District healthy.

**KILRUSH; Carrigaholt.**—There were some cases of whooping-cough in eastern portion of district, and several cases of influenza. I saw a case of typhoid fever on the 23rd ultimo, which I had removed immediately to hospital. No new case since. Otherwise health of district good.

**KILRUSH; Craggknock.**—The district during past quarter was free from epidemic of any kind. The sanitary arrangements are fair.

**KILRUSH; Kilkee.**—Sanitary arrangements fair.

**KILRUSH; Kilmihil.**—District healthy.

**KILRUSH; Kilrush, W.**—District healthy.

LIMERICK; *Bridgetown*.—One case of typhoid fever in the district.

LIMERICK; *Coolacasey*.—The district is very healthy, and its sanitary condition satisfactory.

SCARRIFF; *Anacarriga*.—One case of enteric fever during the quarter, which proved fatal.

SCARRIFF; *Feakle*.—Health of district good. Vaccination up to average. Sanitary condition fairly good.

SCARRIFF; *Mountshannon, W.*—District fairly healthy.

TULLA; *Quin*.—The sanitary arrangements in the district are fairly good.

### Cork County and County Borough.

BANDON; *Bandon, W.*—Very few vaccinations owing to prevalence of measles.

BANDON; *Inishannon*.—The district is in fairly good sanitary condition, excepting that of one village, which I do not consider as satisfactory as it should be.

BANDON; *Kilbrittain*.—District very healthy.

BANDON; *Murragh*.—Vaccination postponed owing to an epidemic of measles.

BANTRY; *Bantry, W.*—Health of district very good. Some cases of influenza. No zymotic disease prevailed.

BANTRY; *Durrus and Kilcrohane*.—A great deal of influenza, complicated with pneumonia in some cases; otherwise district healthy. One death registered from phthisis; no family history.

BANTRY; *Glenarriff*.—Health of the district good. No epidemic disease.

BANTRY; *Kealkill*.—Sanitary condition is good.

CASTLETOWN; *Castletown, W.*—Vaccination very much neglected.

CASTLETOWN; *Kilcatherine*.—Influenza prevalent in east end of district; otherwise district healthy.

CLONAKILTY; *Clonakilty, W.*—Influenza very prevalent and frequently complicated with pneumonia.

CLONAKILTY; *Rosscarbery*.—Bronchitis and pneumonia rather prevalent.

CORK; *Carrigaline, No. 1*.—Vaccination has been much neglected during the quarter.

CORK; *Cork Urban, No. 4*.—Measles very prevalent.

CORK; *Queenstown, No. 2*.—An explosion in submarine boat A5 in the harbour caused six deaths.

DUNMANWAY; *Dunmanway, W.*—District healthy.

FERMOY; *Ballynoe*.—District healthy. One death from epithelioma and one from sarcoma. The only deaths (two) under 60 years were from sarcoma, and phthisis, respectively.

FERMOY; *Kilworth*.—Influenza has been prevalent amongst children.

KILMALLOCK; *Charleville*.—The district is healthy.

KINSALE; *Ballyfeard*.—Sanitation fair. A number of cases of influenza complicated with bronchitis were treated. No deaths.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Kilshannig*.—There was no death from cancer registered during quarter.

MALLOW; *Rahan*.—Influenza, with bronchitis, has been very prevalent during the past quarter; otherwise the district has been free from infectious diseases.

MIDDLETON; *Aghada*.—Vaccination postponed owing to prevalence of bronchitis.

MIDDLETON; *Castlemartyr*.—All vaccinations were postponed owing to epidemics of measles and whooping-cough.

MIDDLETON; *Cloyne*.—Whooping-cough very prevalent, complicated with broncho-pneumonia and capillary bronchitis, which caused it to be a very serious epidemic.

MIDDLETON; *Middleton, No. 2*.—Whooping-cough prevailed in district during the quarter. Two deaths were directly attributed to this disease.

MIDDLETON; *Walshstownmore East*.—Whooping-cough was rather prevalent during the early part of the quarter in the district.

MILLSTREET; *Cullen*.—No infectious disease has occurred in the district.

MITCHELSTOWN; *Kildorrery*.—Owing to the fact that a large number of children suffered from bronchial affections, and also to the severity of the weather, vaccination had to be postponed in a number of cases.

MITCHELSTOWN; *Mitchelstown, No. 1, W.*—Vaccination postponed owing to epidemic of whooping-cough.

SKIBBEREEN; *Skibbereen, W.*—District free from diseases of an infectious character—if I except one case under

treatment in hospital—the patient is suffering from typhus, contracted, it is supposed, in the city of Cork.

SKULL; *Goleen*.—The district is in a very healthy state.

### Kerry County.

CAHERSIVEEN; *Caher, W.*—The district is in fairly good sanitary condition.

CAHERSIVEEN; *Darrynane*.—Influenza was very prevalent in the district during the quarter just ended, and pneumonia as a complication supervened in several cases. However, it is satisfactory to have to record that only one fatality occurred in connection with the disease. The sanitary condition of district is fairly satisfactory.

CAHERSIVEEN; *Glanbehy*.—There are no vaccinations for this quarter.

CAHERSIVEEN; *Valencia*.—Fever broke out at Portmagee, but no deaths registered from this cause. The water supply of that village is under consideration.

DINGLE; *Anascaul*.—Seventy-three defaulters for the quarter returned on Form P. In a few cases children were vaccinated, but not returned for inspection. Owing to very severe weather it was impossible for parents to comply with the law during the quarter.

DINGLE; *Castlegregory*.—The district is at present free from any contagious or infectious disease.

DINGLE; *Dingle, W.*—Whooping-cough was epidemic for the last three months, but it is now wearing itself out, and measles has appeared in the district. Four cases were admitted into hospital within the last week. Whooping-cough was so prevalent that all vaccinations were postponed.

DINGLE; *Ventry*.—Measles and whooping-cough prevalent, particularly in the electoral divisions of Kilmalkedar, Dunquin, and part of Ventry.

KENMARE; *Kenmare, W.*—Measles prevalent in district.

KENMARE; *Tuosist*.—Measles and epidemic catarrh prevalent.

KILLARNEY; *Coom*.—District healthy during quarter.

KILLARNEY; *Killarney, No. 1, W.*—Two cases of mild scarlatina. Influenza very prevalent in town during past month.

KILLARNEY; *Milltown*.—District healthy generally. Threatened with an epidemic of pneumonia in a portion of the district in the month of February, particularly severe amongst very young

children. Typhoid fever was introduced from a neighbouring district in the beginning of March. The cases were isolated, and removed to hospital, and the disease was thus prevented from spreading. The sanitary state of the district is good.

KILLARNEY; *Molahiffe*.—Sanitary state of district good. Whooping-cough and influenza being prevalent, vaccination had to be postponed.

LISTOWEL; *Ballybunion*.—Health of district fairly good. A slight epidemic of influenza prevailed over entire district during month of March. Epidemic is now passing off without any serious result.

LISTOWEL; *Ballylongford*.—Health of district fairly good. No contagious disease. Death-rate rather heavy amongst aged people. Small number of primary vaccinations owing to inclement month of March. Sanitary condition of Ballylongford requires improvement.

TRALEE; *Castleisland*.—Twelve deaths of people over 80 years; one reached 104, and one 106 years.

TRALEE; *Castlemaine*.—Vaccination defaulters came in large numbers during the month of February, but owing to the inclement weather there were none brought in for vaccination during the past month.

TRALEE; *Kilgobbin*.—Parents neglect to bring children for vaccination.

### Limerick County and County Borough.

CROOM; *Castletown*.—I have attended one case of diphtheria, two of enteric fever, and one of scarlatina in the district during the quarter.

KILMALLOCK; *Bruff*.—The vaccination has been done but slowly in consequence of the bad weather, and the difficulty of bringing in the children.

KILMALLOCK; *Bruree*.—Had a number of cases of influenza during the months of February and March, one case of enteric fever, three cases of scarlatina.

KILMALLOCK; *Hospital*.—Whooping-cough was prevalent. One case of typhoid fever was sent to hospital. Otherwise the district was healthy. About 50 vaccinations were postponed.

KILMALLOCK; *Kilfinnane*.—One death registered of a person 103 years of age. District healthy.

KILMALLOCK; *Kilmallock, W.*—Acute bronchitis prevalent amongst children during last month of quarter. District otherwise healthy.

**LIMERICK; Annacotty.**—Sanitary arrangements fair. A girl aged 6 died of diphtheria on the 25th ult.; her death has not been yet registered.

**LIMERICK; Limerick, No. 3.**—District healthy during past quarter. No death from principal zymotic diseases. The following deaths were registered during quarter, viz., phthisis pulmonalis, 7; pulmonary tuberculosis, 4; bronchitis, 6; old age 8; broncho-pneumonia, 2; bronchial asthma, 1; convulsions, 7; tuberculous meningitis, 3; erysipelas, 1; general debility, 1; cerebral embolism, 1; marasmus, 1; gastritis, 1; aneurysm of abdominal aorta, 1; rheumatism, 2; obscure abdominal lesion, 1; dilation of heart, 1; hepatic disease and dropsy, 1; intracapsular fracture of hip, 1; cerebral softening, 1; inanition, 2; cancer of rectum, 1; and diarrhoea, 1.

**LISTOWEL; Glin.**—The sanitary condition of district fairly good. I regret to say that 4 out of the 15 deaths registered during quarter just ended were caused by pulmonary tuberculosis. One of the cases alluded to is an old man aged 62 years, who, without doubt, caught the disease while nursing his son, who died of this malady some months since.

**MITCHELTOWN; Galbally.**—Tuberculosis is very much on the increase. Vaccination had to be abandoned owing to a very fatal epidemic of pertussis.

**MITCHELTOWN; Mitchelstown, No. 2.**—Vaccination postponed owing to epidemic of whooping-cough.

**NEWCASTLE; Ardagh.**—The sanitary state of the district is pretty fair. No epidemic in district.

**NEWCASTLE; Feenagh.**—Of the deaths registered during the quarter, one reached the patriarchal age of 100 years, and during my recollection of over 30 years he never required medical attendance. The health of the district is good.

**NEWCASTLE; Newcastle, W.**—Scarlatina of a mild form; no deaths from it.

**RATHKEALE; Askeaton.**—The sanitary condition of the district is fairly good, and at present is quite free from all contagious diseases.

**RATHKEALE; Pallaskenry.**—Sanitary condition of district satisfactory.

**RATHKEALE; Rathkeale, No. 1, W.**—Although there was no epidemic during the quarter, and only one case of zymotic disease, viz., a case of diphtheria which came into the district a few hours before death, yet the mortality is in excess of any corresponding quarter, due to deaths in old age and early infancy. Two children died of convulsions. Two twins, prematurely born, died—one 24 hours after birth, and one from epidemic diarrhoea from that most

lethal of feeding appliances—a bottle with a long indiarubber tube impossible to disinfect, and generating putridities which are sure to kill.

**RATHKEALE; Rathkeale, No. 2.**—The district was in a very healthy condition, and free from all contagious diseases.

**RATHKEALE; Shanagolden.**—One case of enteric fever occurred during quarter—treated at home—recovery.

**TIPPERARY; Grean.**—District healthy. One death at 100 years was registered during the quarter.

### Tipperary County, North Riding.

**BIRR; Riverstown.**—No epidemic.

**BORRISOKANE; CloghJordan.**—Excepting two cases of diphtheria that occurred during the last month of the quarter, this district has been healthy.

**BORRISOKANE; Terryglass.**—District very healthy. No epidemic.

**NENAGH; Nenagh, W.**—Influenza exists at present in the district.

**NENAGH; Newport.**—Three cases of diphtheria occurred during quarter. District otherwise healthy.

**NENAGH; Portroe.**—District healthy.

**THURLES; Moyne.**—The sanitary arrangements in this district are in a satisfactory state.

### Tipperary County, South Riding.

**CALLAN; Mullinahone.**—Sanitary condition of district fairly good. There was a slight outbreak of measles of a mild type during month of March, which was in some cases complicated with rather serious lung troubles. Pneumonia and bronchitis caused the deaths of three children. Vaccination fairly attended to.

**CARRICK-ON-SUIR; Garrangibbon.**—Measles was very prevalent in the district during the past two months. No deaths occurred, but one child, as the result of debility arising from measles, succumbed to bronchitis.

**CASHEL; Killenaule.**—There is an epidemic of bronchial catarrh of an influenzal character, with pneumonia as a complication, prevailing amongst the children of the district, causing four deaths. Five cases of fever of a very infectious type occurred in the Knockinglass portion of the district, causing one death not yet registered. The whole family is still on the sick list.

**CLOGHEEN; Caher.**—Influenza amongst children was very prevalent during the past quarter. Otherwise the district was in a healthy state.

**CLOGHEEN ; Clogheen, W.**—Whooping-cough prevalent in different portions of district. In some instances it was complicated with broncho-pneumonia. Vaccination generally postponed owing to whooping-cough.

**CLONMEL ; Kilsheelan, No. 1.**—Several cases of measles have occurred in this district. Influenza has also been prevalent.

**TIPPERARY ; Bansha.**—District healthy.

**TIPPERARY ; Cappagh.**—The district is healthy.

**TIPPERARY ; Tipperary, W.**—The district has been in a very healthy condition during the quarter.

**URLINGFORD ; Kilcooly.**—Diphtheria has broken out in the district during last week. Otherwise district is healthy, and in a sanitary condition.

#### Waterford County.

**CLONMEL ; Ballymacarbry.**—A good deal of bronchial affections towards end of quarter.

**CLONMEL ; Kilsheelan, No. 2.**—Some cases of measles have occurred in this district.

**DUNGARVAN ; Dungarvan, W.**—District healthy during past quarter. Vaccination well attended to.

**DUNGARVAN ; Seskinan.**—One death registered age 97, and one of 90 years.

**KILMATHOMAS ; Bunmahon.**—The sanitary arrangements fairly good, and the district is healthy and free from zymotic disease.

**LISMORE ; Ballyduff.**—General health of district satisfactory.

**LISMORE ; Tallow.**—An outbreak of mumps and epidemic sore throat interfered with vaccination during the quarter.

**WATERFORD ; Waterford Urban, No. 1, W.**—An outbreak of typhus occurred in the Ferrybank district owing to the migration of a family infected with it from the No. 2 Urban District.

**WATERFORD ; Woodstown.**—The death of a woman aged 107 years is registered this quarter. She was married at the age of 24 years, and resided in Cheek-point for 11 years. She resided for 71 years subsequently in the co. Wexford, where she was twice married, and returned to co. Waterford two years before her death.

**YOUGHAL ; Ardmore.**—District very healthy.

**YOUGHAL ; Clashmore.**—District healthy. Vaccination postponed owing to inclemency of weather.

#### III. PROVINCE OF ULSTER.

##### Antrim County.

**ANTRIM ; Antrim, W.**—There was a severe epidemic of measles, and schools in Antrim were closed for a month in consequence.

**ANTRIM ; Crumlin.**—Influenza very prevalent this last month. Also an epidemic of scarlet fever (with one death) which took place in the County Antrim Infirmary.

**ANTRIM ; Doagh.**—There was a widespread and severe epidemic of influenza during the quarter. One case of enteric fever and two of diphtheria were notified during the same period.

**ANTRIM ; Randalstown.**—Measles and whooping-cough epidemic during the quarter. Two cases of diphtheria reported.

**ANTRIM ; Templepatrick.**—The sanitary arrangements of the district are fairly good. Influenza has been prevalent during the quarter.

**BALLYCASTLE ; Cushendall.**—The sanitary arrangements of the outlying country are very good, but those of the village are not very satisfactory.

**BALLYMENA ; Ballymena, W.**—Epidemics of influenza and of measles, with their usual complications.

**BALLYMENA ; Broughshane.**—Influenza prevalent during the quarter ; none of the cases severe.

**BALLYMENA ; Clogh.**—District fairly healthy. Sanitary arrangements fair. Several cases of influenza during last month, but no deaths registered.

**BALLYMENA ; Galgorm.**—Sanitary condition of the district fairly good. A few cases of diphtheria occurred, with three deaths.

**BALLYMENA ; Glenwhirry.**—Influenza of a mild type prevalent.

**BALLYMENA ; Portglenone.**—Health of the district is good. Whooping-cough prevalent during the quarter.

**BALLYMONEY ; Dervock.**—A marked epidemic of bronchial affections amongst children prevailed during January and February.

**BALLYMONEY ; Dirraw.**—Vaccination generally postponed on account of measles prevalent over all the district ; a number of unvaccinated children suffering from the disease.

**BALLYMONEY ; Portrush.**—District unusually healthy.

**BELFAST ; Belfast Rural, No. 4.**—Quite a number of cases of influenza and chest affections.

**LARNE; Glenarm.**—One death from whooping-cough, which, with bronchitis, has been prevalent amongst children during the last two months.

**LARNE; Waterfoot.**—The sanitary arrangements of the district are very good.

**LISBURN; Dunmurry.**—The sanitary condition of this district good. No epidemic of any kind.

**LISBURN; Glenavy.**—District at present exceptionally free from zymotic influence. Death causes, mostly "chest affections."

**LISBURN; Knocknadona.**—The sanitary condition of this district is good. One death from cancer of stomach. No person connected with the family known to have cancer.

### Armagh County.

**ARMAGH; Markethill.**—The death-rate of March has exceeded that of January and February combined. Influenza has been epidemic during the past month; and chest affections were very prevalent owing to it, causing a great number of deaths in old persons. Typhoid fever, which appeared in this district and spread, through a milk supply, to Armagh, has been exterminated.

**ARMAGH; Rich Hill.**—Influenza was prevalent in the district during the month of March, and caused one death.

**LURGAN; Lurgan, No. 1, W.**—Eighteen deaths occurred from whooping-cough in the urban district, although this disease was not nearly so prevalent as during the preceding quarter.

**LURGAN; Lurgan, No. 2.**—This district is free from any infectious disease.

**LURGAN; Portadown.**—Influenza prevalent during quarter.

**NEWRY; Mountnorris.**—Owing to epidemic of influenza vaccination has been postponed in several cases.

**NEWRY; Mullaghtglass.**—District healthy, except for chest diseases.

### Belfast County Borough.

**BELFAST; Belfast Urban, No. 11.**—There has been an epidemic of measles in the district during the quarter, but the mortality has been very low. There was one case of small-pox in the district during the quarter.

### Cavan County.

**BAILIEBOROUGH; Bailieborough, W.**—The deaths registered during the quarter included persons aged 96, 94, 80 (three), 75, 72, and 70 years, respectively.

**BAILIEBOROUGH; Shercock.**—District healthy.

**BAWNBOY; Swanlinbar.**—No epidemic prevalent.

**CAVAN; Ballyhaise.**—District in a good sanitary condition.

**CAVAN; Killashandra.**—Influenza and diseases of respiratory organs prevailed during the quarter. District healthy.

**CAVAN; Kilmaleck.**—The sanitary arrangements of the district bad. One fatal case of diphtheria occurred in the district. The disease seems not to have spread.

**COOTEHILL; Drum, No. 2.**—Scarlatina of a mild form occurred in the second month of the quarter.

**COOTEHILL; Tullyvin.**—I have been struck by the prevalence of heart disease. The excessive and rapidly-increasing use of bad tea, and especially the substitution of same *alone* for the old and healthy oatmeal porridge breakfast, by many of the farming and labouring classes, may be responsible to a considerable extent, for this disease. If a standard were fixed for tea (same as for whiskey) and surprise visits paid to tea shops by responsible officers, a step would, in my opinion, be made in the right direction.

**ENNISKILLEN; Holywell, No. 2.**—The sanitary arrangements of this district are satisfactory. Influenza is prevalent; there is no other epidemic disease.

**GRANARD; Scrabby, No. 1.**—The sanitary condition of the district is good. No epidemic.

**OLDCASTLE; Ballyjamesduff.**—District healthy.

**OLDCASTLE; Virginia.**—District healthy.

### Donegal County.

**BALLYSHANNON; Ballintra.**—I have again to report that the water supply continues bad, but the sanitary conditions are otherwise fairly good.

**DONEGAL; Dunkineely.**—District at present healthy, save for a few cases of influenza of mild type.

**DONEGAL; Mountcharles.**—District healthy.

**DONEGAL; Pettigo.**—District healthy.  
**DUNFANAGHY; Crossroads, No. 1.**—The district has been free from epidemics during the quarter.

**DUNFANAGHY; Dunfanaghy, W.**—District healthy.

**GLENTIES; Ardara.**—The sanitary arrangements in this district are good.

GLENTIES; *Carrick*.—I wish again to draw attention to the water supply in the town of Carrick, which is surface water, and in my opinion, very injurious to health.

GLENTIES; *Doocharry*. — District healthy.

GLENTIES; *Dunglow, No. 1*.—Four cases of enteric fever occurred during the quarter. Dunglow, with a population of over 500, has no public water supply. Most of the inhabitants get their drinking water from the river a short distance above where the sewage discharges.

GLENTIES; *Glenties, W*.—This district is in a sanitary state. No epidemic or other disease beyond influenza, which has been prevalent.

GLENTIES; *Killybegs*.—General health of district good. Sanitary arrangements, on the whole, are satisfactory. There was one case of scarlet fever in district during quarter.

INISHOWEN; *Buncrana*.—A few cases of measles of a mild type occurred during the quarter. District otherwise very healthy.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy. A few cases of influenza occurred lately.

INISHOWEN; *Moville*. — District healthy at present.

LONDONDERRY; *Killea*.—Influenza very prevalent during quarter; three of the deaths registered were due to it. Three cases of diphtheria occurred during the quarter.

MILFORD; *Fanad*.—District healthy, and in fairly good sanitary condition. No outbreak of infectious disease during quarter. A considerable amount of re-vaccinations performed during last month owing to outbreak of smallpox in an adjoining district.

MILLFORD; *Rathmelton*.—One death was registered at 100, and another at 103 years of age.

MILLFORD; *Rathmullen*.—An outbreak of smallpox took place on the 20th February; twelve cases in all—two of which died in hospital.

STRABANE; *Raphoe*. — Whooping-cough and influenza prevalent. Four cases of diphtheria reported. Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. A large number of vaccinations postponed owing to epidemics of measles and scarlet fever.

STRANORLAR; *Killygordon*.—There was one case of ill-defined fever which was sent to workhouse hospital; otherwise no infectious diseases.

### Down County.

BANBRIDGE; *Ballyward*.—Sanitary state of district fairly good. Measles and whooping-cough were epidemic during the quarter.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good. There was an epidemic of scarlatina in four townlands. Twenty-five cases were reported, and there were two deaths from the disease.

DOWNPATRICK; *Ballynahinch*.—Influenza and measles have been prevalent in some parts of district.

DOWNPATRICK; *Downpatrick, W*.—Four deaths attributed to influenza. Two of the vaccinations were of children born out of district.

DOWNPATRICK; *Killyleagh*.—I have registered one death from diphtheria, two from scarlatina, and one from whooping-cough during the quarter. The scarlatina cases were very severe, and proved fatal in a few days. The disease, however, did not spread. The infection was probably imported by visitors. The death-rate has been low for the season, and at present there is no epidemic in the district.

DOWNPATRICK; *Portaferry*.—Influenza in a mild form has been prevalent during quarter; otherwise health of district is very good.

LISBURN; *Saintfield*.—The district has been visited by a pretty severe epidemic of influenza of a fairly mild kind; otherwise the health of district is good.

LURGAN; *Moir*.—A very low death-rate again this quarter. Birth-rate very satisfactory, being more than double the death-rate, and quite up to the average. There has been much sickness during the past quarter—influenza spreading all over the district. Few deaths, however, have occurred from this cause.

NEWRY; *Donaghmore*.—Mild influenza almost universal. A few cases of chest complications, with one death from broncho-pneumonia.

NEWRY; *Rathfriland*.—Births under, deaths over, the average.

NEWRY; *Warrenpoint*.—An inquest was held on an infant's body found—not known whether born alive or not, hence not registered.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements and health of district very good. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—Health of district very good, except for influenza.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. Of the 31 deaths registered, 17 were over 60 years. Influenza reported as causing seven deaths. Two cases of puerperal fever—in one of which influenza was present and a supposed factor. Scarlatina present in Ballywalter in months of January and February (February 17th last case reported) owing to which vaccination not completed for this quarter. Influenza very prevalent throughout the district, especially during months of February and March, whole families being victims—type, as a whole, mild, but leaving weakness for some time, even in the robust.

NEWTOWNARDS; *Kilmood*.—Influenza of a severe type very prevalent.

NEWTOWNARDS; *Newtownards, W.*—One death from scarlatina was registered; twelve cases of scarlatina were notified. Two deaths from puerperal fever—three cases were notified. Influenza of a severe type, with exceedingly high temperature and in some cases wild delirium, has recently shown itself in the urban district.

#### Fermanagh County.

CLONES; *Rosslea*.—Vaccination in rather a backward state owing to the severity of the weather.

ENNISKILLEN; *Enniskillen, W.*—Sanitary condition of district fairly good.

ENNISKILLEN; *Florencecourt*.—Bronchial trouble amongst children was prevalent during the quarter. No infectious disease occurred, and the district is in a fairly good sanitary state.

ENNISKILLEN; *Holywell, No. 1.*—Influenza is prevalent; otherwise the district is healthy.

IRVINESTOWN; *Clonelly*.—District healthy.

IRVINESTOWN; *Ederney*.—District healthy.

LISNASKEA; *Derrylin*.—A few cases of influenza were noted during the quarter; also several cases of mumps. Sanitary condition as before.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. No deaths registered from infectious disease.

#### Londonderry County and Co. Borough.

COLERAINE; *Aghadowey*.—Influenza and measles prevalent in district.

COLERAINE; *Coleraine, W.*—Six deaths from tubercular diseases, one death from malignant disease of liver.

COLERAINE; *Garvagh*.—A severe epidemic of measles has prevailed for the past two months, accounting for two deaths, and many cases of bronchitis. All vaccination has been postponed on account of it. One death registered of a person aged 103 years, well authenticated.

COLERAINE; *Kilrea*.—District healthy except a few cases of measles. There was one case of diphtheria in February, but strict precautionary measures were taken, and there was no further spread of the disease.

COLERAINE; *Portstewart*.—There were a number of cases of measles during the quarter, but I cannot say they amounted to an epidemic. The pulmonary complications following were severe. Influenza has been epidemic during the past month. I registered the death of a female in January aged 102 years.

LIMAVADY; *Ballykelly*.—Six of the fourteen deaths registered were of persons who had reached the age of 80 years and upwards; one of them having reached the age of 100 years, able until two years before her death to walk several miles, and having all her senses until a short time before death.

LIMAVADY; *Bellarena*.—An epidemic of measles is spreading over the district; as yet, there have been no fatal cases.

LIMAVADY; *Dungiven*.—Sanitary arrangements satisfactory. Mortality under the average, and principally due to senility. One person died of tubercle of intestines aged 22; no hereditary element could be elicited. Influenza predominated during last month of quarter, complicated by chest affections in the great majority of cases, in a few by diarrhoea. Vaccination statistics under the average owing to the prevalence of influenza.

LIMAVADY; *Limavady, W.*—One death registered from cancer—no family history. One death from tetanus. There was an epidemic of measles in the district during the quarter, from which three deaths have so far been registered and which caused a marked diminution in the number of vaccinations performed.

LONDONDERRY; *Eglinton*.—Influenza and pneumonia very prevalent during the quarter.

MAGHERAFELT; *Maghera*.—Majority of deaths registered were of aged people—one case was that of a person 101 years old, authenticated; date of birth entered in family bible.

**MAGHERAFELT**; *Moneymore*.—Male birth-rate double that of the female. One death registered from diphtheria, which was prevalent during the first two months of the quarter, but no other death took place from that cause. District at present in a fairly healthy condition.

#### Monaghan County.

**CARRICKMACROSS**; *Donaghmoyne*.—Influenza in district.

**CASTLEBLAYNEY**; *Castleblayney, W.*—One fatal case of diphtheria in the hospital was from another district of the union. Influenza of a severe type prevails extensively.

**COOTEHILL**; *Dawsonsgrove*.—The sanitary condition of the district is fairly good. Specific parotitis (mumps) was prevalent during the quarter.

**COOTEHILL**; *Drum, No. 1*.—There were a few cases of scarlatina of a mild form.

**MONAGHAN**; *Castleshane*.—District sanitary. There is no epidemic.

**MONAGHAN**; *Emyvale*.—Sanitary condition of district good.

**MONAGHAN**; *Kilmore*.—Diphtheria appeared in one family in the district, four children being attacked.

**MONAGHAN**; *Monaghan, W.*—The sanitary conditions of the district remain satisfactory. There has been no epidemic during the quarter. There were a few cases of diphtheritic sore throat.

**MONAGHAN**; *Scotstown*.—The sanitary condition of the district is satisfactory.

#### Tyrone County.

**CASTLEDERG**; *Castlederg, W.*—Sanitary state of district very satisfactory. No epidemics of any kind.

**CASTLEDERG**; *Drumquin*.—The sanitary condition of the district is satisfactory, with no infectious disease of any sort. The vaccination return is small owing to the severe weather of the past two months, when it would have been dangerous to bring infants out.

**CASTLEDERG**; *Killeter*.—Sanitary arrangements of the district satisfactory.

**CLOGHER**; *Aughnacloy*.—Influenza prevalent, especially during the past month.

**CLOGHER**; *Ballygawley*.—Epidemics of measles and whooping-cough during quarter.

**CLOGHER**; *Fivemiletown*.—The health of the district was pretty good during the quarter.

**COOKSTOWN**; *Coagh*.—Diphtheria has been prevalent during the quarter. No deaths have been registered from the disease.

**COOKSTOWN**; *Cookstown, W.*—The epidemic of diphtheria has disappeared. District very healthy.

**COOKSTOWN**; *Pomeroy*.—District generally healthy. Some influenza. District sanitary.

**COOKSTOWN**; *Stewartstown*.—District at present very healthy.

**DUNGANNON**; *Caledon and Ballymagran*.—Health of district fairly good, but capillary bronchitis prevailed in epidemic form amongst children, especially infants; three deaths from this disease certified during quarter. A few cases of influenza (respiratory) also occurred.

**DUNGANNON**; *Clonavaddy*.—Sanitary arrangements good.

**DUNGANNON**; *Coalisland*.—Influenza and whooping-cough very prevalent. One case of enteric fever (a lighterman, who evidently contracted the disease in Belfast) removed to hospital. Several cases of itch among children.

**IRVINESTOWN**; *Trillick*.—The deaths registered during the quarter included persons aged 91, 85, 80, 72, and 70 years, respectively.

**OMAGH**; *Drumquin*.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases are at present prevalent.

**OMAGH**; *Fintona*.—During the past quarter whooping-cough and catarrhal influenza have been prevalent in the district. The sanitary arrangements are satisfactory.

**OMAGH**; *Gortin*.—There was an outbreak of diphtheria in the district near Newtownstewart; four cases came under my notice. No deaths from this cause. The infection was from a school.

**OMAGH**; *Omagh, No. 1, W.*—Sanitary condition of rural district fairly satisfactory. Sanitary condition of urban district not satisfactory, yet there is some improvement. I am glad to report that the urban authority is taking more interest in sanitary work. The bye-laws are being better enforced, and on the whole there is more attention paid to my recommendations as Medical Officer of Health. There is a marked decline in the number of infectious diseases notified. The death of an inmate of workhouse was registered at 115 years.

OMAGH; *Omagh, No. 2.*—No epidemic in the district.

OMAGH; *Sixmilecross.*—The district is in very good sanitary condition at present; some cases of measles and influenza.

STRABANE; *Newtownstewart.*—Four cases of diphtheria and two of membranous croup have been notified. Two cases of typhoid have also been notified.

STRABANE; *Plumb Bridge.*—District healthy. Four cases of diphtheria occurred—all in one house, otherwise no zymotic disease prevalent.

#### IV.—PROVINCE OF CONNAUGHT.

##### Galway County.

BALLINASLOE; *Laurencetown.*—There were three deaths registered of persons aged 81, 85, and 98 years respectively.

CLIFDEN; *Roundstone, No. 1.*—The district is quite free from epidemic disease.

GALWAY; *Galway, No. 3 (Arran).*—District very healthy at present.

GALWAY; *Oranmore.*—The district is in a fair sanitary condition. The only disease at all common is pneumonia. There is a strong inclination amongst the people to keep children unvaccinated as long as possible.

GALWAY; *Spiddle.*—There is nothing very particular to report, with the exception of the fact that some of the yards attached to the dwellinghouses are kept in a very insanitary condition, which would necessitate frequent supervision.

GLENNAMADDY; *Dunmore.*—Vaccination was postponed generally owing to the inclemency of the weather.

GLENNAMADDY; *Williamstown.*—There has been an epidemic of scarlatina of a mild type during quarter.

GORT; *Gort, W.*—Health of district during quarter indifferent. There were many cases of feverish catarrh, as well as slight feverish attacks of three to six days' duration, without catarrh. Prominent symptoms in both these classes were headache, pain in limbs, and debility, and were probably influenzal in nature. Sore throats which were proved to be streptococcal prevailed largely throughout district, also some cases of erysipelas. Two children died of laryngitis, one of pharyngitis, and there was one death from puerperal septicæmia.

GORT; *Kinvarra.*—Two cases of scarlatina and one of scarlatinal sore throat occurred in one family. The cases were isolated, and the disease did not spread. There was an epidemic of influenza, including a few serious cases. Bronchial and pulmonary affections were numerous.

LOUGHREA; *Athenry.*—The district is in a fairly healthy condition. No contagious or infectious disease prevalent. Twelve persons aged 60 years and upwards died, and were registered during the quarter, and of these, one was aged 105 years.

LOUGHREA; *Bullaun.*—Five deaths registered during quarter of persons aged 64, 69, 71, 73, and 85 years respectively.

LOUGHREA; *Woodford.*—One inquest was held on an accidental death.

LOUGHTERARD; *Cloonbur, No. 2.*—District in fairly good sanitary condition.

PORTUMNA; *Portumna, No. 1, W.*—Deaths of persons aged 83 (two) 84, 85 (two), and 95 years have been registered during quarter. The past quarter has been characterised by mild weather, and consequently very little sickness. I have just visited a case of diphtheria, and am sending her to hospital.

PORTUMNA; *Portumna, No. 2.*—One inquest was held on an accidental death.

TUAM; *Tuam, No. 2.*—There was a case of typhus fever in January, and five other members of the family contracted the disease, which did not spread to other houses. There was an epidemic of influenza in February and March, with many fatal cases of pneumonia; in March also there was an epidemic of varicella among the children in the town portion of the district.

##### Leitrim County.

BAWNBOY; *Ballinamore.*—Sanitary state of district fair. One death registered of a woman aged 99 years.

MANORHAMILTON; *Drumahaire.*—With the exception of some few cases of pneumonia, the public health of the district is good.

MANORHAMILTON; *Lurganboy.*—Pneumonia was prevalent during the quarter. The sanitary state of the district is satisfactory, no cases of fever having occurred.

MOHILL; *Carrigallen.*—The sanitary condition of the district is good. Influenza has been prevalent during the latter portion of quarter, causing bronchitis among children.

MOHILL; *Mohill, W.*—There was one case of cancer in the district during quarter. It was never known in the family before.

MOHILL; *Rinn.*—The district is healthy, and free from epidemic disease.

MOHILL; *Rowan.*—No disease at present prevalent in the district.

### Mayo County.

BALLINA; *Ballina, W.*—No vaccination in this quarter, owing to cold and wet weather, and epidemic cold or influenza amongst children.

BALLINROBE; *Cappaghduff.*—Sanitary condition good.

BALLINROBE; *Cong.*—Health of district good; of the 29 deaths registered, 17 were over 60 years, two of which were over 70, and eight over 80 years of age.

BALLINROBE; *Hollymount.*—Births and deaths about the average. The epidemic of measles disappeared during this quarter, but whooping-cough continued prevalent. There were many cases of bronchial and throat affections amongst the young people, and in consequence there were very few vaccinations.

BELMULLET; *Bangor.*—District during past quarter healthy, and free from infectious disease. There is considerable improvement now in the sanitary condition of the dwellings of the small farmers. Registration and vaccination satisfactory.

BELMULLET; *Knocknallower.*—I consider the sanitary state of the district fairly satisfactory.

CASTLEBAR; *Castlebar, No. 1, W.*—Health of district particularly good. At present free from any infectious or contagious diseases.

CLAREMORRIS; *Ballindine.*—Sanitary condition of district fair.

CLAREMORRIS; *Ballyhaunis.*—Health of district during the quarter has been good. Whooping-cough and bronchopneumonia were prevalent, both are now disappearing. Nine of the deaths registered were aged 80 years and upwards; two of them were over ninety. Sanitation still progressive.

WESTPORT; *Achill.*—Influenza and pertussis prevalent at present. Sanitary state of district fairly good, but vaccination a dead letter, as no children have been presented for last twelve months, though defaulters are duly punished.

WESTPORT; *Ballycroy.*—Pertussis and influenza extremely prevalent during quarter, practically all children

attacked by either one or other. This, with inclemency of weather, prevented vaccination.

WESTPORT; *Bundorragha.*—The district is in a fairly good sanitary condition.

WESTPORT; *Louisburgh.*—General health of district good during past quarter.

WESTPORT; *Westport, W.*—Five deaths from phthisis pulmonalis. During the quarter a very widely spread epidemic has prevailed in the district—probably some hundreds of cases. No statistics are available. The disease occurred almost exclusively among children and young adults. It was a febrile affection, with the following special characters:—(1) Severe paroxysmal cough resembling that of pertussis, and often ending in vomiting; (2) an acute inflammation of the upper air passages, tonsils, upper pharynx, and post-nasal cavities—this occurred in about half of the cases; (3) short in duration, commonly two or three weeks; (4) rarely complicated by bronchitis or other disease; (5) very few fatal cases.

### Roscommon County.

ATHLONE; *Athlone, No. 2.*—There have been a good many cases of whooping-cough and influenza in the district during the quarter.

ATHLONE; *Brideswell.*—The district continues fairly satisfactory in health.

BOYLE; *Ballyfarnan, No. 1.*—State of the district generally healthy. Whooping-cough prevalent.

BOYLE; *Boyle, No. 1, W.*—Whooping-cough and influenza have been prevalent, but not fatal.

BOYLE; *Keadew.*—Very fair sanitary arrangements.

CASTLEREAGH; *Ballaghaderreen.*—District is fairly healthy, and there was no death from any of the principal epidemic diseases.

CASTLEREAGH; *Castleplunket.*—The three deaths registered during quarter were of males, aged 93, 80, and 78 years respectively.

CASTLEREAGH; *Castlereagh, W.*—As usual no vaccinations for this quarter, due, no doubt, to the inclemency of the weather, and the poor condition of the people, and the long distances they have to travel to vaccination depots.

ROSCOMMON; *Ballyleague.*—The doctor has postponed all vaccination cases owing to the severe weather.

STROKESTOWN; *Elphin.*—There was an epidemic of measles in the district during the quarter.

STROKESTOWN; *Roosky*.—Nineteen of the deaths registered were of persons aged 60 years and upwards. I registered the death of a woman aged 107 years last birthday. Shortly before her death she told that she would be 108 years on the 23rd June, 1905, if she lived so long. One death registered of a person aged 95, one 91, five at 80 and over, and six at 70 years and over. I had one death from measles, and two from cancer.

STROKESTOWN; *Strokestown, W.*—Sanitary condition of the district is good.

### Sligo County.

BOYLE; *Ballyfarnan, No. 2.*—State of the district generally healthy. Whooping-cough prevalent.

BOYLE; *Gurteen.*—District healthy.

DROMORE WEST; *Easky, W.*—There were no children presented for vaccination on account of severity of weather

during quarter. Health of district very good. No case of infectious disease; in fact very little sickness of any kind.

DROMORE WEST; *Skreen.*—One case of typhoid fever now convalescing; otherwise the district healthy.

SLIGO; *Ballymote.*—The district is in good sanitary condition, and no infectious disease is present.

SLIGO; *Carney, No. 1.*—Sanitary condition of district good.

SLIGO; *Carney, No. 2.*—District healthy.

SLIGO; *Collooney.*—One case of enteric fever, two of diphtheria. No deaths.

SLIGO; *Riverstown.*—Four cases of typhus fever this quarter. The infection was probably carried in second-hand clothes.

TOBERCERRY; *Coolaney.*—Sanitary arrangements fairly good.

TOBERCERRY; *Tobercurry, W.*—With the exception of the town of Tobercurry, the district is fairly good from a sanitary point of view.

1905.]  
2nd Quarter.

---

**Marriages**—JAN., FEB., MAR., 1905. **Births & Deaths**—APR., MAY, JUNE, 1905.

---

During the quarter ended 30th June last, there were registered in the 827 Registrars' Districts in Ireland 26,862 births—a number equal to an annual birth-rate of 24·5 in every 1,000 of the estimated population\*—and 19,616 deaths, representing an annual rate of 17·9 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 12,643 persons emigrated.

In England last quarter, the birth-rate represented was 27·7 in every 1,000 of the estimated population, and the death-rate 14·4 per 1,000.

The birth-rate in Ireland for the quarter is 0·2 over the average rate for the corresponding quarter of the ten years 1895–1904, and equal to the rate for the second quarter of 1904. The deaths are 1,124 under those registered in the corresponding quarter of 1904; the death rate is 0·9 below the rate for that quarter, and 1·0 below the average for the second quarter of the ten years 1895–1904.

\* See page 178.

Compared with those for the corresponding quarter of 1904, the returns of pauperism, furnished by the Local Government Board, show an increase of 436 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 2,194\* in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1895-1904, the number of Workhouse inmates shows an increase of 1,242, but the number of persons on out-door relief a decrease of 1,563,\* the total under both heads being 0·3 per cent. below the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·0 per cent.

The annual marriage-rate (6·8 per 1,000 of the population) represented by the marriages registered during the first quarter of 1905 is 0·5 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of Marriages registered during the Quarter ended 31st March, 1905, and by the Births and Deaths registered in the Quarter ended 30th June, 1905.

† The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (\*), page 117.

MARRIAGES.

The marriages (7,437) registered in Ireland during the first quarter of 1905 are equivalent to an annual rate of 6·8 per 1,000 of the estimated population, being 0·5 above the rate for the corresponding quarter of 1904, and 0·5 above the average rate for the first quarter of the ten years 1895-1904. Of the total number of marriages 6,181 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,256 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 7·5 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·5 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows an increase of 0·8, but that under the latter a decrease of 0·5. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1895-1904, and the average number for that period; also the number registered during the first quarter of 1905.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,862—13,870 boys and 12,992 girls—being equal to an annual ratio of 1 in every 40·9, or 24·5 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1895-1904 was 27,196 equivalent to an annual rate of 24·3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 24·7 per 1,000 of the population according to the Census of 1901; Munster, 23·0; Ulster, 25·8; and Connaught, 20·7.

The highest county birth-rate\* is 34·0 for Dublin Co. Borough, and the lowest 18·6 for Leitrim. Of the intermediate rates the highest five are—Belfast Co. Borough, 33·8; Waterford Co. and Co. Borough, 26·5; Kerry, 25·4; Antrim, 25·2; and Londonderry Co. and Co. Borough, 25·2. The lowest five are—Roscommon, 18·9; Queen's, 18·9; Cavan, 19·0; Sligo, 19·0; and King's, 19·4.

#### DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 19,616—9,818 males and 9,798 females—affording an annual ratio of 1 in every 56·0, or 17·9 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1895-1904 was 18·9 per 1,000.

The death-rate in Leinster was 18·2 per 1,000 of the population according to the Census of 1901; in Munster, 16·6; in Ulster, 18·8; and in Connaught, 15·3.

The county death-rates\* range from 13·0 in Tipperary, N.R., to 22·3 in Dublin County Borough. Between these rates the lowest five are—Leitrim, 14·2, King's, 14·4; Kerry, 14·7; Longford, 14·7; and Roscommon, 14·9; and the highest five are—Armagh, 20·8; Monaghan, 20·2; Belfast Co. Borough, 19·9; Wexford, 19·8; and Tyrone, 19·8.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1895-1904, and the average number for that period; also the number registered during the first and second quarters of the year 1905:—

\*See note (†) on page 98.

**Ages.**—Of the 19,616 deaths registered last quarter, 2,314, or 11·8 per cent., were of children under 1 year old; and 8,325, or 42·4 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 86·1 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 13·0 per cent. of the total deaths registered therein; in Munster, 11·3 per cent.; in Ulster, 12·2 per cent.; and in Connaught, 8·9 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 39·6 per cent.; in Munster, to 44·3 per cent.; in Ulster, to 40·6 per cent.; and in Connaught, to 50·6 per cent. of the total deaths registered in the province.

#### HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal epidemic diseases\* is 819, or less by 54 than the number occurring in the corresponding quarter of 1904, and is equivalent to an annual rate of 0·7 per 1,000 living, being 0·1 below the rate for the second quarter of 1904, and 0·2 below the average rate for the second quarter of the ten years 1895–1904.

**Small-pox.**—Although it appears from the Abstracts that two deaths from small-pox were registered during the quarter ended 30th June, 1905, on reference to the text on page 5 of the Report for the March quarter of the year, it will be seen that the 2 deaths which occurred in the hospital of Milford Union, were not registered at the time of issue of that Report; these deaths were subsequently registered, and thus appear in the Abstracts of this Report, and were of males, aged respectively, 32 and 35 years. It is stated that they were probably vaccinated in infancy, that the marks were not distinguishable, and that re-vaccination had not been performed.

**Measles.**—The deaths from measles, 266 in number, represent a rate of 0·24 per 1,000 of the estimated population of Ireland. In the three quarterly periods preceding, deaths from measles were 87, 262, and 297 respectively, and the average number for the corresponding quarter of the five years 1900–1904 was 150. Of the total, 100 deaths (or nearly 38 per cent.), were registered in Belfast County Borough; 28 in Dublin County Borough; 36 in the County of Antrim; 16 in Kerry; and 13 in each of the Counties of Cork and Londonderry (which latter include the County Boroughs of the same name). In certain Registrars' Districts deaths from measles were registered as following:—In Lisburn, 10; in Ballymoney, 9; in Ventry, 8; in Dingle, 6; in Aclare, 6; in Ballymena, 5; in Bridgetown, Coolattin, Taghmon and Glynn, and Tullamore, 4 deaths each.

**Scarlet Fever.**—There were only 28 deaths from scarlet fever registered for the whole of Ireland for the period now under notice; this number does not amount to half the number of deaths (61) which were registered in the March quarter of the year from this disease, and is under the average (46) for the corresponding quarter of the 5 years 1900–1904.

\* See note (†) on page 107.

In the September and December quarters of the year 1904, deaths from scarlet-fever, registered, were 41 and 62 respectively.

**Typhus.**—The deaths from typhus, as recorded by the Registrars, were 18 in number, as against an average of 27, for the June quarter of the 5 years 1900–4, and 18, 5 and 12 deaths from this disease, registered in the three preceding quarters. The Districts in which the 18 deaths were registered were as follows, as may be seen from Abstract III. of this Report:—In Wexford, 2 deaths: in Cork Urban No. 2, 1 death; in Skibbereen, 1 death; in Caher (Cahersiveen Union), 2 deaths; in Valencia, 1 death; in Killarney No. 2, 1 death; in Tipperary, 3 deaths; in Waterford Urban No. 1, 1 death; in Drum No. 2, 1 death; in Galway No. 2, 1 death; in Turloughmore, 1 death; in Tuam No. 2, 1 death; and in Sligo No. 1, 2 deaths.

**Whooping-cough.**—The mortality from whooping-cough is considerably below the average (265) for the corresponding quarter in the past 5 years; in the June quarter of 1904 the deaths reached the high figure of 431, and in the period now under review 141 deaths (equal to an annual rate of 0.13 per 1,000 of the estimated population) were registered in Ireland. On referring to the Abstracts it may be seen that in ten counties in Ireland there was no record of deaths from whooping-cough; also that 16 deaths were registered in the County of Tyrone, 10 of the latter being in Dungannon Union, including 9 deaths in the Registrar's District of the same name. In the County Mayo 14 deaths were registered; 11 of these were in the Union of Westport, and of the latter figure, 9 were registered in the District of Achill; in County Kerry 12 deaths were registered; in Dublin County Borough there were 11 deaths; and in the County of Dublin 10 deaths were recorded. In the three quarters preceding that under notice the deaths from whooping-cough registered in Ireland were 249, 235, and 194 respectively.

**Diphtheria.**—Deaths from diphtheria, including those certified as membranous croup, were 56 in the September quarter of 1904; in the December quarter they rose to 92, but declined in the March quarter of the year to 81, and again declined in the period now the subject of review to 67; this latter number is, however, five over the average (62) for the corresponding quarter of the five years 1900–1904. In Abstract III. it may be seen that in the Registrar's District of Dublin, South City No. 1, 4 deaths were registered from this disease, and in the Registrar's District of Strabane 5 deaths were registered during the quarter ended 30th June, 1905.

**Enteric Fever.**—The deaths from enteric fever, which were registered in the June quarters of the five years preceding, show a marked decline from 211 in 1900, to 158 in 1901, to 144 in 1902, to 103 in 1903, and to 96 in 1904. In the June quarter of 1905 they rose to 121; this figure is, however, below the quarterly average (142) for the five years above-mentioned. Of the deaths, 35 were registered in the County Borough of Belfast; these were 29 per cent. of the total deaths registered in the whole of Ireland. The deaths from enteric fever are represented by an annual rate of 0.11 per 1,000 of the estimated

population of the country. From Abstract III., which contains information as to the deaths which were registered in each Registrar's District from enteric fever, it appears that 8 deaths were registered in districts comprising Dublin County Borough; 6 deaths were registered in Limerick No. 1 District; and that 6 deaths from enteric fever and 3 deaths classified to *pyrexia* (origin uncertain) were registered in the Registrar's District of Newtownards.

Twenty deaths were classified as *pyrexia* (origin uncertain).

**Diarrhoeal Diseases.**—The deaths from diarrhoeal diseases were 156 in number, the average for the corresponding quarter in the five years, 1900-1904, being 146; in the three quarters immediately preceding that under notice the deaths were 607, 255, and 130, respectively. Of the deaths in the June quarter of this year 32 were registered in Belfast County Borough, and 16 in Dublin County Borough.

**Tuberculous Diseases.**—The deaths from all forms of tuberculous disease, which were registered in Ireland during the quarter ended 30th June, 1905, amounted to 2,984, a figure which represents an annual rate of 2.72 per 1,000 of the estimated population of the country, and is 15.2 per cent. of the total number of deaths (19,616) registered during the period; or, in other words, that of every 100 persons whose deaths were registered during the quarter 15 were the victims of tuberculous disease. Particulars as regards the localities by Registrar's Districts, Unions, Counties, and Provinces, will be found in the abstracts. It must be remembered that all the figures given in this Report are taken from returns furnished by the Registrars of Births and Deaths, and are unrevised. The revision of the figures will probably increase the death rate from tuberculous disease. The Registrar's Notes show, in many instances, that these important Public Officers are fully alive to the dangers which exist from this disease, and to their own great responsibilities in safeguarding the health of the people.

On page 179 and following, the notes made by the Registrars in their Quarterly Return forms are published:—Twenty-one of the Registrars remarked upon the subject of tuberculous disease. Amongst these the Registrar of Ratoath mentions "the prevalence of tuberculous diseases." The Registrar of Camolin says:—One-fifth of the deaths due to tuberculosis pulmonum." The Registrar of Queenstown No. 1:—"Three deaths were registered from pulmonary phthisis and 2 from tuberculous meningitis." The Registrar of Queenstown No. 2:—"Five deaths from tuberculous disease." The Registrar of Aghada:—"There has been a marked increase in consumptive cases during past 6 months." The Registrar of Castlemartyr:—"Phthisis pulmonalis and tuberculous disease of all kinds are spreading, owing to careless disinfection, isolation, and sanitation in general." The Registrar of Skull:—"There were 7 deaths registered from pulmonary tuberculosis during the past quarter out of a total of 23. *This disease is becoming a perfect terror in the district.*" The Registrar of Dingle:—"There were 6 deaths from phthisis." The Registrar of Glin:—"I regret to add that pulmonary tuberculosis prevailed in this district during quarter, and caused 4 deaths. Whenever a case of pulmonary tuber-

culosis occurs in my practice I invariably advise isolation, disinfection, and other precautionary measures, with a view to preventing the disease from spreading." The Registrar of Askeaton :—"Of the deaths registered 5 were caused by phthisis or tuberculosis of lungs." The Registrar, Pallaskenry :—"Pulmonary tuberculosis is prevalent in the district." The Registrar of Antrim :—"Phthisis is very common in this district." The Registrar, Carney No. 1 :—"Tuberculosis still continues to cause the highest adult mortality, but the people are now aware of its infectious nature, and adopt precautions in the majority of cases."

**Malignant Disease.**—The deaths returned under this heading (663), and representing an annual rate of 0·60 per 1,000, should include the varieties of carcinoma and sarcomatous growths, and cancer (not otherwise defined.)

From Abstract I. it may be seen that the deaths from this disease as returned by the Registrars were highest in the following ten counties or county boroughs :—In Cork County and County Borough, 66 ; in Dublin County Borough, 57 ; in Dublin County, 46 ; in each of Belfast County Borough and County Down, 43 ; in Antrim County, 39 ; in Armagh County, 34 ; in Tyrone County, 29 ; in Donegal County, 25 ; and in Galway County, 22 ; and that the ten counties in which the lowest numbers of deaths from malignant disease were registered, as returned by the Registrars of Births and Deaths were as follow :—In County Carlow 2, in County Longford 3, in each of Queen's County, Fermanagh, and Roscommon, 4, in each of King's County, Clare, and Leitrim, 6, and in each of the Counties of Kildare and Kilkenny, 7.

**Hydrophobia.**—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in 2 districts (Belfast Urban No. 12 and Kilmacrenan and Milford), measles in 34 districts, scarlet fever in 18, whooping-cough in 20, diphtheria in 11, fever in 26—typhus, 1, enteric 24, and pyrexia (origin uncertain) 1—influenza in 22, chicken-pox in 1, and cerebro-spinal meningitis in 1.

**Inquests.**—There were 406 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 48 of the total deaths registered.

In Leinster there was 1 inquest to every 38 deaths registered, in Munster 1 to 71, in Ulster 1 to 41, and in Connaught 1 to 103.

**Deaths in Public Institutions.**—Of the 19,616 deaths registered, 3,816, or 19·5 per cent., occurred in public institutions. In Leinster the percentage was 26·4, in Munster 23·4, in Ulster 14·3, and in Connaught 12·9.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1905, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrheal Diseases.

f Boundaries extended as from 1st April, 1905.

† See note (†), page 107.

**URBAN DISTRICTS—continued.**

[illegible]

### VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1905, there were 27,785 persons successfully vaccinated; in 2,695 cases the operation was postponed, 11 children were reported as insusceptible of vaccination, and the deaths of 1,384 unvaccinated children under 3 months old were registered, making a total of 31,875 children with regard to whom particulars as to vaccination were ascertained.

### EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 12,643 (6,907 males and 5,736 females), being 2,240 less than in the corresponding quarter of the year 1904, and 5,699 under the average number for the second quarter of the ten years 1895–1904.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1904 and 1905:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1904.	1905.	Increase.	Decrease.	1904.	1905.	Increase.	Decrease.	1904.	1905.	Increase.	Decrease.
April, .	3,611	3,279	—	332	3,830	2,788	—	1,042	7,441	6,067	—	1,374

Total, .	7,118	6,907	—	211	7,765	5,736	—	2,029	14,883	12,643*	—	2,240

\* Including 10,572 emigrants to the United States of America, viz.:—5,361 in the month of April, 5,626 in May, and 1,585 in June. Of 10,115 steerage passengers, 4,060 had their passages paid for in America.

### PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1904 the average price was 5½d., and in the corresponding quarter of 1895 it was 4½d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., being the same as the average for the corresponding quarter of the year 1904. In the first quarter of 1895 the average price was 13s. 10d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 3d. to 3s. 2d. In the second quarter of 1904 the average prices were 4s. 7d. to 5s. 6d., and the prices for the corresponding quarter of 1895 were 3s. 8d. to 4s. 7d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 52s. to 55s. 6d. per cwt. In the corresponding quarter of 1904 the average prices were from 52s. 6d. to 61s., and in the second quarter of 1895 they were from 49s. 6d. to 62s.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 17s. per ton nett.

The highest price of 2¾ per cent. Consols at the Dublin Stock Exchange for the quarter was £91<sup>7</sup>/<sub>16</sub>, and the lowest £89<sup>11</sup>/<sub>16</sub>. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland remained at 3½ per cent., to which it was lowered from 4 per cent. on the 10th March.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1905 was 43,531, or 436 over the average for the corresponding period in 1904.

The average weekly number of persons receiving out-door relief during the quarter was 58,582\*, being 2,194 over the average for the second quarter of 1904.

Of the persons receiving in-door relief during the second quarter of 1905, an average number of 1,475 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1904 the average weekly number was 1,423.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1905, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was 3d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving in-door and out-door relief has been kindly supplied by the Local Government Board.

#### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the second quarter of the years 1900–1905, respectively,

\* See note (\*) on page 98.

† Latitude 53° 21' 44.55" north; longitude 6° 21' 6.25" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 112b):—

The mean height of the barometer during the second quarter of 1905 was 29·968 inches, being ·018 above the average for the corresponding quarter of the five years 1900–1904; the highest reading (30·476 inches) was on the 13th May, at 9 A.M., wind N.W.; and the lowest (28·889 inches) on the 30th April, at 9 P.M., wind W.N.W.

The mean temperature of the air during the quarter was 50·5° or 0·4° above the average for the second quarter of the five years 1900–1904.

The maximum temperature of the air during the quarter was 74·7° and the minimum 24·7°. The maximum heat in sun was 126·8°, and the minimum on the grass 17·0°.

Rain or snow fell on 47 days during the quarter. The rain-fall measured 4·908 inches, being 0·672 inch under the average for the second quarter of the five years 1900–1904. The greatest monthly rain-fall was in April, when 2·290 inches were registered.

The wind blew on 22 days from E., on 16 days from S.W. and W., on 14 days from N.E., on 8 days from N.W., on 4 days from S.E., on 3 days from S., on one day from N., and the air was calm on 7 days at 9 A.M.

*April.*—The mean height of the barometer during this month was 29·822 inches; the highest reading (30·239 inches) was on the 22nd at 9 A.M., wind N.W.; and the lowest (28·889 inches) on the 30th, at 9 P.M., wind W.N.W. The mean temperature of the air was 44·5°, the maximum registered was 57·8°, and the minimum 24·7°. The 14th was the warmest day, and the 8th the coldest night. The mean of the dry bulb was 46·2°, and of the wet bulb 43·3°. The maximum heat in sun was 118·5°, and the minimum on the grass 17·0°. The minimum on the grass was below 32° on 16 nights. The total amount of sunshine recorded was 101·1 hours, the greatest daily amount being 10·7 hours on the 8th. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain or snow fell on 27 days. The rain-fall measured 2·290 inches; the greatest amount in 24 hours was ·645 inch on the 30th.

*May.*—The mean height of the barometer during this month was 30·133 inches; the highest reading (30·476 inches) was on the 13th at 9 A.M., wind N.W., and the lowest (28·988 inches) on the 1st, at 9 A.M., wind W.N.W. The mean temperature of the air was 50·4°, the maximum registered was 67·8°, and the minimum 29·7°. The 28th was the warmest day, and the 5th and 23rd were the coldest nights. The mean of the dry bulb was 53·1°, and of the wet bulb 48·9°. The maximum heat in sun was 125·7°, and the minimum on the grass 22·5°. The minimum on the grass was below 32° on 12 nights. The total amount of sunshine recorded was 224·6 hours, the greatest daily amount being 14·5 hours on the 18th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain fell on 9 days. The rain-fall measured 1·543 inches; the greatest amount in 24 hours was ·675 inch on the 1st.

*June.*—The mean height of the barometer during this month was 29·949 inches; the highest reading (30·354 inches) was on the 22nd, at 9 A.M. and 9 P.M., and on the 23rd at 9 A.M., wind E.; and the lowest (29·647 inches) on the 17th, wind S.E. The mean temperature of the air was 56·5°; the maximum registered was 74·7°, and the minimum 38·8°. The 26th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 59·3°, and of the wet bulb 51·9°. The maximum heat in sun was 126·8°, and the minimum on the grass 30·5°. The minimum on the grass was below 32° on 2 nights. The total amount of sunshine recorded was 215·1 hours, the greatest daily amount being 14·2 hours on the 14th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain fell on 11 days. The rain-fall measured 1·075 inches; the greatest amount in 24 hours was ·325 inch on the 18th.

[illegible]

(a) See note (<sup>2</sup>), page 117.

\* The Registrars' Districts (827 in number) are Sub-divisions of the Union's Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same name obtained under the Medical Charities Act. The letter-W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 129 and 130 are extracted from the Weekly Returns made by the Registrars, and relate to 13 weeks extending from 2nd April, 1905, to 1st July, 1905. With the exception of 90 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

‡ Exclusive of 12 deaths in the Rathlawn Union Workhouse as persons admitted from Blackrock and Kingstown, to which they have been assigned.

§ Formerly described as "Simple Continued Fever."

NOTE.—This table has been constructed for the year 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1905—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

## APPENDIX.

## REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

## I.—PROVINCE OF LEINSTER.

## Carlow County.

BALTINGLASS; *Rathvilly*.—Measles is prevalent in the Rathmore and Ballykilduff portion of the district.

CARLOW; *Bagenalstown*.—District healthy.

CARLOW; *Clonegall*.—Birth and Death rates are below the average.

CARLOW; *Leighlinbridge*.—District healthy.

## Dublin County.

BALROTHERY; *Balbriggan*.—District very healthy.

CELBRIDGE; *Lucan*.—The measles epidemic continues of a mild form.

## Kildare County.

ATHY; *Monasterevin*.—Sanitary arrangements very fair.

CELBRIDGE; *Celbridge, W.*—District healthy.

CELBRIDGE; *Kilcock*.—There were a number of cases of influenza in the district during the quarter.

CELBRIDGE; *Maynooth*.—Three of the four persons who died of phthisis came to reside in this district within last six months. District healthy.

EDENDERRY; *Carbury*.—District very healthy.

NAAS; *Kildare*.—District fairly healthy.

NAAS; *Naas and Carragh, W.*—Health of district very good.

## Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair.

CASTLECOMER; *Castlecomer, W.*—There were epidemics of whooping-cough and measles in the district during the last month, but no fatal case from either disease.

KILKENNY; *Tullaroan*.—Health of district very good.

NEW ROSS; *Dysartmoon*.—Slight outbreak of scarlatina; otherwise district very healthy.

URLINGFORD; *Urlingford, W.*—Health of district good. No epidemics during the quarter.

WATERFORD; *Kilmakevoge*.—No deaths from cancer. District healthy.

## King's County.

BIRR; *Banagher*.—The district very healthy.

BIRR; *Birr, W.*—One case of enteric fever, probably due to a polluted water supply.

BIRR; *Killyon*.—Health of the district good.

BIRR; *Kinnitty*.—Fairly healthy district.

EDENDERRY; *Rathangan, No. 2*.—A death was registered during quarter from acute inflammation of the bowels—a man—aged 58 years. An inquest was held, as the attack had been very sudden.

EDENDERRY; *Rhode*.—Health of district good.

MOUNTMELICK; *Olonygowan, No. 2.*—District healthy. One death registered at 96 years.

ROSCREA; *Roscrea, No. 2.*—During the latter portion of the quarter there have been scarlatina and typhoid fever in the district, caused, I think, from using bad water; the outbreak, so far, is confined to one part of the district.

ROSCREA; *Shinrone.*—Diphtheria has been prevalent during quarter, six cases having occurred.

TULLAMORE; *Killoughy.*—The district is very free from infectious disease. Sanitation fairly good.

TULLAMORE; *Philipstown.*—District free from any kind of diseases. Sanitary arrangements fairly good.

#### Longford County.

BALLYMAHON; *Abbeyshrule.*—No cases of cancer. Sanitary arrangements favourable.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee.*—The district is in a good sanitary condition, and free from contagious disease. Vaccination was rigorously enforced during the quarter.

GRANARD; *Granard, W.*—The sanitary condition of the district is good. There were no cases of infectious diseases during the quarter. Vaccination was rigorously enforced.

GRANARD; *Scrubby, No. 2.*—One death registered from diphtheria in lower end of district; disease did not spread.

GRANARD; *Street, No. 2.*—One death (male) aged 105 years was registered during quarter; enquiries made confirm this patriarchal term of life.

LONGFORD; *Longford, W.*—Cerebro-spinal meningitis attacked one family; one death.

#### Louth County.

ARDEE; *Castlebellingham.*—District very healthy. Sanitary condition good.

ARDEE; *Collon, No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DROGHEDA; *Drogheda, No. 3, W.*—The district was in a very healthy condition for past three months.

DROGHEDA; *Termonfeckin.*—District free from diseases of an infectious nature.

DUNDALK; *Barronstown.*—Scarlet fever broke out about the beginning of

June. The disease, which was of a mild form, was confined chiefly to one townland. I had the cases removed to Union Fever Hospital, schools closed, and houses, clothes, &c., disinfected. I have heard of no fresh cases for past fortnight.

DUNDALK; *Carlingford.*—The case recorded as cancer is a case of abdominal tumour, which is certified as suspected cancer.

DUNDALK; *Dundalk, W.*—An exceptionally healthy quarter.

DUNDALK; *Ravensdale.*—Health and sanitary condition of district very good. No cases of zymotic disease for a long time. Of the sixteen deaths of persons 60 years and upwards, four were octogenarians, five nonagenarians, and the united ages of the sixteen amount to 1,307 years.

#### Meath County.

DROGHEDA; *St. Mary's.*—The sanitary arrangements and health of the district are fairly good.

DROGHEDA; *Stamullen.*—District healthy. Sanitary state satisfactory.

DUNSHAUGHLIN; *Ratoath, W.*—There is nothing particular to mention, except the prevalence of tubercular diseases.

KELLS; *Kilskeer.*—District in good sanitary condition.

KELLS; *Nobber.*—It is a most pleasing duty to state (notwithstanding the abnormal heat of the season) that the district is healthful in the extreme. The fact speaks abundantly for the sanitary supervision and the general cleanliness of the community. Eight of the eleven deaths recorded reached the average patriarchal age of 72·8 years.

NAVAN; *Painestown.*—Sanitary condition fairly good. Of the eleven deaths, one was from malignant disease, and three tubercular disease. During June an epidemic of icterus was prevalent amongst the children attending some of the schools. Etiology unknown. Symptoms very mild, and medical advice only sought for in four cases. Duration of symptoms less than a week. Complete recovery in all cases.

OLDCASTLE; *Oldcastle, W.*—Owing to the continued dry weather the supply of water in the town of Oldcastle is scarcely sufficient for domestic purposes; an improved water supply is very much required.

TRIM; *Summerhill.*—District fairly well off as regards sanitary condition. No infectious disease of any nature has occurred.

Queen's County.

ABBEYLEIX; *Abbeyleix, W.*—Sanitary arrangements good. No epidemic.

ABBEYLEIX; *Ballinakill.*—Health of district good.

MOUNTMELICK; *Clonygowan, No. 1.*—District healthy.

MOUNTMELICK; *Emo.*—I registered two deaths from phthisis (certified) during the quarter. Vaccination most satisfactory.

MOUNTMELICK; *Mountmellick, W.*—One thoroughly authentic case registered of the death of a tailor over 100 years. An amount of scabies for the past twelve months brought by itinerants.

ROSCREA; *Borris-in-Ossory.*—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; *Glassan.*—One death registered of a person 85 years.

GRANARD; *Street, No. 1.*—Two cases of scarlatina (of a mild type) occurred during quarter.

MULLINGAR; *Ballynacarrigy.*—No prevalence of or fatality from any of the principal epidemic diseases. Sanitary state of district is good.

MULLINGAR; *Castletown Geoghegan.*—The district is in a satisfactory state. With the exception of a few cases of measles and some cases of whooping-cough, the district is free from zymotic disease as far as I know.

MULLINGAR; *Killucan.*—The district is free from all infectious diseases. Rain is very badly wanted.

MULLINGAR; *Milltown.*—The births and deaths registered during the quarter were equal in number. There were five deaths of people aged over 80 years. One death from cancer over 60, and none from phthisis. The district is healthy, and quite free from epidemics of any kind. Emigration nil this season.

MULLINGAR; *Mullingar, W.*—The health of this district has been fairly good during the past quarter.

Wexford County.

ENNISCORTHY; *Newtownbarry.*—District healthy and free from all infectious diseases.

GOREY; *Camolin.*—No outbreak of infectious disease. Sanitation satisfactory. Birth-rate higher. One-fifth of deaths due to tuberculosis pulmonum.

WEXFORD; *Bridgetown.*—Pertussis and measles were prevalent in the district during the quarter.

Wicklow County.

BALTINGLASS; *Kiltegan.*—Three deaths of persons over 80 years old, two over 70. Health of district normal.

RATHDOWN; *Bray, No. 1.*—Births and deaths about the average.

RATHDOWN; *Delgany.*—Delgany district in a healthy state.

RATHDOWN; *Powerscourt.*—One case of typhoid fever occurred in the district during the quarter.

RATHDRUM; *Annamoe.*—District healthy during the quarter.

RATHDRUM; *Arklow.*—There have been about a dozen cases of typhoid fever in the district during the past quarter.

RATHDRUM; *Newcastle.*—Measles was prevalent during quarter, but now has disappeared.

SHILLELAGH; *Tinahely.*—Health of district good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—District maintains its remarkably healthy character.

CORROFIN; *Corrofin, W.*—Health of district good.

ENNIS; *Crusheen.*—All vaccination defaulters attended.

ENNIS; *Newmarket.*—The district has been very healthy during the past quarter.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. Vaccination is not attended to although I return defaulters quarterly.

ENNISTIMON; *Roadford.*—District very healthy. Sanitary arrangements very fair.

KILLADYSERT; *Ballynacally, W.*—A dog supposed to have rabies was shot by the police.

KILLADYSERT; *Labasheeda.*—District very healthy.

**KILRUSH; Carrigaholt.**—One case of enteric fever in eastern portion of district, otherwise health of district very good.

**KILRUSH; Craggacknock.**—The district has been very healthy during quarter, and free from epidemic of any kind.

**KILRUSH; Kilkee.**—Sanitary state of district fair.

**KILRUSH; Kilmihi.**—District continues in a healthy condition.

**KILRUSH; Kilrush, W.**—District healthy.

**LIMERICK; Bridgetown.**—Of the twelve deaths registered as over 60 years, four were 70 years and upwards, four were 80 years and upwards, and three were 90 years.

**SCARRIFF; Annacarriga.**—One case of enteric during quarter, which recovered. District at present healthy.

**SCARRIFF; Feakle.**—Health of district good.

**SCARRIFF; Mountshannon, W.**—District fairly healthy generally.

**TULLA; Quin.**—The sanitary arrangements were very fair.

#### Cork County and County Borough.

**BANDON; Bandon, W.**—It would facilitate the carrying out of vaccinations within three months if two outside vaccination stations were selected in the remote parts of this district. It is a great hardship on children to travel a distance of six or seven miles, and also a great hardship on mothers who have to bring them in their arms such a distance.

**BANDON; Inishannon.**—The district is in a fairly sanitary condition, excepting one village, which I do not consider in a sanitary state.

**BANDON; Murragh.**—The death of a man aged 103 years was registered during the quarter; he was the third centenarian of three successive generations, his father having lived 105, and his grandfather 109 years.

**BANTRY; Durrus and Kilcrohane.**—A good deal of influenza amongst children, otherwise district healthy and in good sanitary condition. No deaths from phthisis.

**BANTRY; Glengarriff.**—During the quarter there was an epidemic of measles which has now subsided. One death from measles. Health of the district good; sanitary condition fairly good.

**BANTRY; Kealkill.**—The sanitary condition of district is good; no in-

fectious disease during quarter; no cases of malignant disease.

**CASTLETOWN; Kilcatherine.**—A few cases of influenza and croup; district otherwise healthy.

**CLONAKILTY; Clonakilty, W.**—Eleven deaths from influenza.

**CLONAKILTY; Rosscarbery.**—District healthy. One death registered of a person 94 years of age.

**CLONAKILTY; Timoleague.**—Four cases of typhus fever occurred in district. The probable source of infection was attending at a wake in an overcrowded filthy dwellinghouse; the person who had died was not supposed to have died from typhus fever. The elements for its production were present in the wake-house alone.

**CORK; Blarney.**—There were four cases of scarlatina—three in one family—the fourth, in my own family, was imported from outside. All patients are convalescent; district otherwise healthy.

**CORK; Carrigaline, No. 1.**—Four mild cases of scarlet fever; the patients were removed to hospital and the houses disinfected, so that the disease was stamped out.

**CORK; Douglas.**—No cancer cases occurred.

**CORK; Queenstown, No. 1.**—Three deaths were registered from pulmonary phthisis, and two from tuberculous meningitis.

**CORK; Queenstown, No. 2.**—Of the five deaths from tuberculous disease, one is registered as consumption (no medical attendant), and four as phthisis pulmonalis (certified).

**DUNMANWAY; Dunmanway, W.**—District healthy.

**FERMOY; Ballynoe.**—The average age in the case of the four uncertified deaths registered during the quarter was 73½ years. District healthy.

**FERMOY; Kilworth.**—One village requires drainage.

**KANTURK; Kanturk, W.**—Measles has been very prevalent during the past quarter.

**KANTURK; Milford.**—Health of district good; no epidemic disease.

**KILMALLOCK; Charleville.**—The district is very healthy.

**KINSALE; Ballyfeard.**—Health of district fair.

**MACROOM; Slieveveagh.**—Sanitary arrangements fair. One case of typhoid. Some delay vaccination too long.

**MALLOW; Ballyclogh.**—District free from infectious diseases.

MALLOW; *Buttevant*.—The sanitary condition of the district is satisfactory.

MALLOW; *Kilshannig*.—There was no death from cancer registered during quarter. District healthy.

MALLOW; *Rahan*.—District healthy during past quarter; no epidemic diseases.

MIDDLETON; *Aghada*.—There has been a marked increase in consumptive cases during past six months. In this district there is no possibility of direct contagion (the cases are all more or less isolated), and sanitation is good. I attribute the increase to excessive tea drinking, and a diet of bread, potatoes, and dried fish or meat. While people persist in using this diet there cannot be much hope of checking the disease.

MIDDLETON; *Castlemartyr*.—Influenza of a serious type with typhoid symptoms (and some few cases complicated by meningitis) has been very prevalent during the quarter. Phthisis pulmonalis and tuberculous disease of all kinds are spreading owing to careless disinfection, isolation, and sanitation in general. Water supply of entire district very bad indeed.

MIDDLETON; *Middleton, No. 2*.—General health good.

MIDDLETON; *Walshtownmore, East*.—One death registered from tetanus.

SKULL; *Goleen*.—Influenza was prevalent during the quarter.

SKULL; *Skull, W*.—There were seven deaths registered from pulmonary tuberculosis during the past quarter out of a total of twenty-three. This disease is becoming a perfect terror in the district.

YOUGHAL; *Killeagh*.—No deaths from tuberculous disease were registered.

### Kerry County.

CAHERSIVEEN; *Caher, W*.—The district is in a good sanitary state.

CAHERSIVEEN; *Darrynane*.—The health of the district during the quarter just ended has been good, although the sanitary conditions with regard to a good many of the houses require marked improvement—manure heaps being kept too close to the dwellings.

CAHERSIVEEN; *Glanbehy*.—One died of parturition, three days delayed labour, transverse case, certified; two died of influenza; three died of old age; one died, weak from birth; one died of phthisis pulmonalis, three years, certified; two died of cough; one died of

bronchitis acute, 13 days, certified; one died of puerperal eclampsia, 16 hours' coma, certified; one died of congenital debility, asthenia, certified; one died of broncho-pneumonia, certified.

CAHERSIVEEN; *Valencia*.—One death was from asthma, one from pneumonia, one from pulmonary congestion, and one from phthisis.

DINGLE; *Castlegregory*.—The district is healthy.

DINGLE; *Dingle, W*.—There has been an epidemic of morbilli in the district for the last three months, which caused six deaths from bronchial complications; but the disease has almost worn itself out now. There were six deaths from phthisis, and three from cancer—one from cancer of womb and ovaries, one from cancer of upper jaw, and one from cancer of rectum.

DINGLE; *Ventry*.—Have not heard of any new cases of measles or whooping-cough for the last two weeks.

KENMARE; *Kilgarvan*.—Vaccination had to be entirely postponed owing to an epidemic of whooping-cough and measles.

KENMARE; *Tuosist*.—Vaccinations postponed owing to prevalence of measles. Epidemic now fortunately at an end. One uncertified death at 21 years was stated to be from measles.

KILLARNEY; *Coom*.—Whooping-cough prevalent during the quarter; also some cases of membranous croup occurred. Sanitary state of district fairly good. A good many children could not be vaccinated owing to the prevalence of the afore-mentioned diseases.

KILLARNEY; *Killarney, No. 1. W*.—No case of infectious disease during quarter. District enlarged on 1st April by the addition of Muckross Electoral Division. Size of district increased from 13,510 acres to 36,024 acres.

KILLARNEY; *Milltown*.—District healthy. Sanitary condition good. No contagious or infectious diseases. An epidemic of influenza and pneumonia in a portion of the district, which was particularly severe amongst very young children.

KILLARNEY; *Malahiffe*.—District healthy.

LISTOWEL; *Ballybunion*.—Health of district good.

LISTOWEL; *Ballyhorgan*.—Sanitary state of district good.

LISTOWEL; *Ballylongford*.—District healthy for quarter. No case of contagious disease. Most of deaths registered due to old age. Vaccination not good. Sanitary improvements required.

**TRALEE; Brosna, No. 1.**—District healthy.

**TRALEE; Castleisland.**—Large number of unvaccinated children in district—over 200 in number.

**TRALEE; Castlemaine.**—The district appears to be healthy in general, and children came in large numbers for vaccination during the quarter.

**TRALEE; Kilgobban.**—Vaccination laws not complied with by parents of children.

#### **Limerick County and County Borough.**

**KILMALLOCK; Bruree.**—One case of scarlatina. The district was remarkably healthy during the quarter.

**KILMALLOCK; Hospital.**—District healthy.

**KILMALLOCK; Kilfinnane.**—District healthy. Deaths registered include seven cases of "No recent medical attendant."

**KILMALLOCK; Kilmallock, W.**—Three deaths (one from whooping-cough, one from diphtheria, and one from enteric fever) occurred during the quarter.

**LIMERICK; Annacotty.**—Sanitary arrangements very fair. District healthy.

**LISTOWEL; Glín.**—The public health during the quarter just ended was most satisfactory, and dangerous infectious diseases were conspicuous by their absence. I now allude to zymotic diseases, but I regret to add that pulmonary tuberculosis (which I observe now has a column to itself in this Return) prevailed in this district during quarter, and caused four deaths. Whenever a case of pulmonary tuberculosis occurs in my practice I invariably advise isolation, disinfection, and other precautionary measures with a view to preventing the disease from spreading.

**MITCHELSTOWN; Galbally.**—District exceptionally healthy. No case of infectious disease. The death of a farmer's widow aged 102 years was registered this quarter.

**NEWCASTLE; Ardagh.**—The sanitary condition of the district is pretty fair. No epidemic in district. Some mild cases of influenza.

**NEWCASTLE; Newcastle, W.**—Half of the deaths registered were of persons aged over 60 years, and one reached the age of 101 years.

**RATHKEALE; Askeaton.**—During the last quarter the district was free from all contagious diseases. Of the deaths registered five were caused by phthisis or tuberculosis of lungs. The ages of

three males whose deaths were registered were 99, 98, and 85 years, and of two females 85 and 84 years respectively.

**RATHKEALE; Pallaskenry.**—The sanitary arrangements in the district are fairly good. Pulmonary tuberculosis is prevalent in the district.

**RATHKEALE; Rathkeale, No. 1, W.**—The district is very healthy for the quarter, and free from any disease usually considered infectious or contagious. Fourteen deaths being over 60 years of age were due to the diseases of old age; of the other six which constituted the whole number registered for the quarter three were under one year. One died last December from epidemic diarrhoea, the second aged three weeks of pemphigus gangrenosus, and the third lived only two minutes. Of the remaining three deaths one aged 6 years died of pemphigus gangrenosus, a second aged 16 of diabetes mellitus, and a third aged 23 of pulmonary tuberculosis.

**RATHKEALE; Rathkeale, No. 2.**—The district was free from all contagious diseases.

**TIPPERARY; Grean.**—There were seven cases of enteric fever in the district during the early part of the quarter, all of which were removed to hospital; the outbreak was confined to one family, except one case that was contracted out of the district.

#### **Tipperary County, North Riding.**

**BORRISOKANE; Terryglass.**—District very healthy. No epidemic.

**NENAGH; Nenagh, W.**—No special form of disease prevalent. Three cases of typhoid have occurred, all removed to hospital and doing well.

**NENAGH; Newport.**—District healthy.

**NENAGH; Portroe.**—District healthy.

**THURLES; Moyne.**—Sanitary arrangements of district are in a satisfactory state.

**THURLES; Templemore.**—Health of district good. No prevailing disease.

#### **Tipperary County, South Riding.**

**CALLAN; Ballingarry.**—The health of the district is good.

**CALLAN; Mullinahone.**—Sanitary state of district fairly good. No disease prevalent in district during quarter. Vaccination fairly attended to.

**CASHEL; Killenale.**—The deaths of persons aged 98, 96, 94, 83, and 80 years respectively were registered during the quarter. One death from typhoid

which occurred in the March quarter. Some cases of pneumonia, with one death; otherwise the district is healthy.

CASHEL; *Kilpatrick*.—Diphtheria has appeared in a sporadic form in district during quarter, five cases appeared—two deaths from same.

CASHEL; *Tullamain*.—Whooping-cough was prevalent in this district during quarter, but no deaths resulted therefrom.

CLOGHEEN; *Caher*.—Sanitary arrangements are good.

CLOGHEEN; *Clogheen, W.*—District free from epidemics.

CLONMEL; *Kilsheelan, No. 1*.—Several cases of epidemic broncho-pneumonia and influenza occurred—two being fatal. There was also one death from measles.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—Health of district very good.

TIPPERARY; *Golden*.—I have registered during the quarter the death of a woman stated to be of the age of 98 years.

TIPPERARY; *Tipperary, W.*—The district has been in a very healthy condition during the quarter.

URLINGFORD; *Kilcooly*.—Influenza was prevalent during quarter. Sanitary arrangements are good.

#### Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—There has been one case of enteric fever within the district, the origin of which was due to contact with a patient in Kilsheelan (Clonmel Union) suffering from the same disease.

CLONMEL; *Ballymacarbry*.—Three deaths from bronchitis and two from pneumonia. Deaths of persons aged 90, 85, and 74 years respectively were registered.

CLONMEL; *Kilsheelan, No. 2*.—Two cases of enteric fever, one of which ended fatally from heart failure, occurred in this district. The other case was removed to hospital, and is now convalescent. A third case contracted from the above, but resident in Rathgormuck dispensary district, was removed to hospital and is doing well.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter. Vaccination well attended to.

DUNGARVAN; *Seskinan*.—One case certified as typhoid ended fatally.

KILMACTHOMAS; *Bunmahon*.—The sanitary arrangements fairly good. One case of diphtheria occurred in the district during the quarter, otherwise district is healthy.

LISMORE; *Ballyduff*.—Vaccination, sanitation, and general health of district satisfactory.

WATERFORD; *Waterford Urban, No. 1, W.*—The sanitary arrangements in parts of the district are in a backward condition. There are dwelling-houses and tenement houses with privies ill-constructed, built in close proximity to the houses, and not cleaned with sufficient frequency or regularly.

WATERFORD; *Woodstown*.—Health of the district is good.

YOUGHAL; *Ardmore*.—Pneumonia prevalent during the month of May.

YOUGHAL; *Clashmore*.—District healthy.

### III. PROVINCE OF ULSTER.

#### Antrim County.

ANTRIM; *Antrim, W.*—Phthisis is very common in this district.

ANTRIM; *Crumlin*.—Nothing particular to note this quarter except the large number of cases of acute lobar pneumonia. One death registered at the age of 102.

ANTRIM; *Randalstown*.—One case of typhoid fever reported. At present the district is free from epidemic disease.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Influenza rather prevalent during the quarter.

BALLYMENA; *Ballymena, W.*—Town and district healthy.

BALLYMENA; *Broughshane*.—Health of district good. No zymotic disease.

BALLYMENA; *Clogh*.—District very healthy. Sanitary arrangements good.

BALLYMENA; *Galgorm*.—Sanitary state of district fairly good. There were ten deaths registered caused by influenza and pneumonia.

BALLYMENA; *Portglenone*.—The health of the district is extremely good.

BALLYMENA; *Toome*.—Health of district good.

BALLYMONEY; *Dervock*.—The death-rate for the quarter phenomenally low. All six deaths were over 60 years of age, with an average age of over 72 years.

BELFAST; *Belfast, Rural No. 4*.—No special epidemic.

**LARNE; Ballycarry.**—District healthy.

**LARNE; Glenarm.**—Whooping-cough of a severe type has been epidemic in Carnlough amongst children during the quarter. Five deaths were caused by it. During the last two months measles has been epidemic in Glenarm, but no deaths have resulted from it.

**LARNE; Larne, W.**—Pneumonia prevalent.

**LISBURN; Dunmurry.**—The sanitary condition of this district good. There is no epidemic of any kind.

**LISBURN; Glenavy.**—Registration this quarter about the average. Measles rather epidemic, but not of a severe type, has prevented the vaccination of a number of children.

**LISBURN; Knocknadona.**—The sanitary condition of this district is fairly good. Two deaths from cancer—one of the stomach, and one of the breast; no family record.

**LISBURN; Lisburn, W.**—One case of death which I have returned as enteric fever is certified as childbirth, ten days, enteric fever, some days. We have had an epidemic of measles of a very virulent type, and twelve deaths have occurred. Unfortunately, parents look on measles as a harmless disease, and take very little precaution to prevent complications.

#### Armagh County.

**ARMAGH; Blackwatertown.**—Influenza with broncho-pneumonia or pneumonia caused six deaths.

**ARMAGH; Keady.**—There was a severe epidemic of pneumonia during the quarter, and seven deaths were caused by it.

**ARMAGH; Markethill.**—The district is healthy, and free from any epidemic disease.

**ARMAGH; Rich Hill.**—Health of district very good. There is practically no tubercular disease in the district. The two deaths from tubercular trouble returned this quarter occurred in visitors to the district, who contracted tuberculosis previous to their arrival.

**BANBRIDGE; Tanderagee.**—One death at the age of 105 years was registered.

**LURGAN; Lurgan, No. 1, W.**—District fairly healthy during quarter.

**LURGAN; Lurgan, No. 2.**—The district is in a fairly good sanitary condition.

**NEWRY; Mullaghglass.**—District healthy, except for some cases of influenza in one portion of the district in the first two months of the quarter.

#### Belfast County Borough.

**BELFAST; Belfast Urban, No. 4, W.**—One case insusceptible of vaccination; certificate received.

**BELFAST; Belfast Urban, No. 11.**—There has been a considerable number of cases of measles in the district during the quarter.

**BELFAST; Belfast Urban, No. 12.**—One case of small-pox occurred in the district.

#### Cavan County.

**BAILIEBOROUGH; Bailieborough, W.**—District healthy and free from any infectious disease.

**BAILIEBOROUGH; Shercock.**—Some cases of scarlatina occurred during the last month of the quarter. The source of infection could not be traced, but it is probable the disease may have been contracted in school. As the disease was of a mild type the parents did not seek for medical attendance, and so escaped sanitary supervision. The cases I have attended were of a mild type.

**BAWNBOY; Swanlinbar.**—District healthy.

**CAVAN; Ballyhaise.**—The district is in a fairly good sanitary condition.

**CAVAN; Killashandra.**—One person bitten by a dog, not rabid. The patient is all right now. District healthy. Some sporadic cases of scarlatina have been reported to me as occurring near to Milton.

**CAVAN; Kilnaleck.**—The sanitary arrangements of one town are in an unsatisfactory condition.

**COOTEHILL; Tullyvin.**—The district is healthy, and at present free from contagious diseases. Of those whose deaths were registered during the quarter 77.7 per cent. were 60 years or over—of these, six (three males and three females) had reached the age of 80 or over. While in the births the males had a large majority, there were two deaths of males to each death of a female.

**ENNISKILLEN; Holywell, No. 2.**—The sanitary condition of the district is not satisfactory. Enteric fever occurred in four different centres. The patients were all removed to hospital, the houses disinfected, and the disease apparently stamped out in their respective localities.

**GRANARD; Scrabby, No. 1.**—The death of an old woman whose age was given as 103 years was registered during the quarter. The sanitary condition of the district is satisfactory.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy, and free from zymotic disease.

### Donegal County.

BALLYSHANNON; *Ballintra*.—The sanitary conditions of the district fairly good, but the water supply is very bad at present.

DONEGAL; *Dunkineely*.—District very healthy, but water supply becoming scarce from long continued drought. A case of measles occurred, imported from Belfast. No spread of the disease so far.

DONEGAL; *Pettigoe*.—Of deaths registered, two reached the age of 97, one 84, and one 83 years.

DUNFANAGHY; *Crossroads*.—District healthy.

DUNFANAGHY; *Dunfanaghy, W.*—District healthy. Some few cases of illness caused by the great heat—77° in the shade (Stevensen's screen) were registered on 23rd and 25th June.

GLENTIES; *Ardara*.—The sanitary arrangements in this district at the present time are good.

GLENTIES; *Currick*.—The sanitary arrangements in the district are fairly good. There has been no epidemic.

GLENTIES; *Doocharry*.—Four cases of typhoid fever about beginning of quarter. District healthy at present.

GLENTIES; *Dunglow, No. 1*.—The district is now free from infectious disease. A water supply for the village of Dunglow is very necessary.

GLENTIES; *Killybegs*.—Sanitary condition fairly good. No outbreak of infectious disease during quarter.

INISHOWEN; *Buncrana*.—District very healthy.

INISHOWEN; *Clonmany*.—During last month of quarter influenza with lung complications prevalent.

INISHOWEN; *Malin*.—District healthy

INISHOWEN; *Moville*.—District healthy at present.

LETTERKENNY; *Church Hill*.—District healthy. No epidemic.

LONDONDERRY; *Burt*.—Sanitary state of district good.

MILLFORD; *Fanad*.—District healthy, and free from disease.

MILLFORD; *Kilmacrenan and Millford, W.*—Two deaths from small-pox in February and March were registered during quarter. The patients were ad-

mitted to fever hospital from an adjoining district. There was also an epidemic of small-pox in this district during present quarter—twelve cases, no death.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. Whooping-cough and measles very prevalent—four deaths reported from the former.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—The water supply is of a doubtful quality in one village.

### Down County.

BANBRIDGE; *Ballyward*.—The sanitary state of district good.

BANBRIDGE; *Crossgar*.—Measles was very prevalent during the quarter, but no deaths occurred in the district.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good. There were a good many cases of influenza during the quarter.

DOWNPATRICK; *Ballynahinch*.—The district has been remarkably free from epidemic diseases during the quarter.

DOWNPATRICK; *Killyleagh*.—There was an epidemic of whooping-cough in one division of the district; two children died of the disease. Otherwise the health of the district is good.

DOWNPATRICK; *Portaferry*.—No case of infectious disease occurred during the quarter. Sanitary state of district good.

KILKEEL; *Kilkeel, No. 2, W.*—Drains getting unhealthy from want of flushing, as no rain has come for some time.

KILKEEL; *Rostrevor*.—The number of deaths is above average. The ages varied from a few hours to 91 years.

LISBURN; *Drumbeg*.—Measles has been very prevalent during the past month. Births about the average, deaths under the average.

LISBURN; *Hillsborough*.—There has been a very severe epidemic of measles in the district during the past quarter.

LISBURN; *Saintfield*.—The health of the district remains very good.

LURGAN; *Moir*.—This is the third quarter in succession in which the death-rate has been remarkably low, being only one-half the number as compared with births, and 25 per cent. below the average for years past. There has been little serious illness in the district;—whooping-cough and a few cases of measles make the total for zymotics

LURGAN; *Waringstown*.—District healthy.

NEWRY; *Donaghmore*.—District very healthy. Sanitary arrangements good.

NEWRY; *Rathfriland*.—Births over, deaths about average. No infectious or contagious disease.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. District very healthy. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—Sanitary arrangements very good. Health of district very good—now free from epidemics. One case of scarlatina, and two of diphtheria, but no spread.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. General health of district good. A few cases of scarlatina were present in one division; only two cases at present known. On 11th May, a case of mad dog said to have been killed by a constable, R.I.C., at Nunsquarter. I called at R.I.C. barracks, Kirkcubbin, and sergeant in charge informed me that a post-mortem was made, but that the dog was suffering from stricture of gullet, not mad.

NEWTOWNARDS; *Kilmood*.—Health of district very good at present.

NEWTOWNARDS; *Newtownards, W.*—During the past quarter an epidemic of typhoid fever broke out in the district. About sixty-five cases occurred. All the cases were traced directly to impure water, except a few who got the disease from eating cockles which were contaminated with sewage from the town. Twenty cases of scarlatina were also notified during the quarter. The long contemplated and much needed water and sewerage for the town is, I am glad to say, now occupying the attention of the sanitary authority.

#### Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

CLONES; *Newtown Butler*.—District very healthy.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Sanitation of district satisfactory. No disease of an infectious character occurred during the past quarter.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. There is no epidemic disease.

IRVINESTOWN; *Clonelly*.—The water supply in Fermanagh portion of town of Pettigoe has failed. One death from enteric, unable to trace source of origin.

IRVINESTOWN; *Ederney*.—District healthy.

LISNASKEA; *Derrylin*.—Sanitary science is progressing. The facilities for carrying out sanitary improvement in the district remain stationary. No epidemic. Phthisis prevalent.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fairly good. No infectious disease prevalent during quarter.

#### Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District healthy.

COLERAINE; *Garvagh*.—Health of district good. No epidemic.

COLERAINE; *Kilrea*.—Measles being prevalent in the district, there were three deaths due to this disease. There was one case of diphtheria, resulting in death, but there was no further spread of the disease, and every sanitary precaution was taken.

COLERAINE; *Portstewart*.—There is at present an epidemic of measles in the district; otherwise the health of the people is good.

LIMAVADY; *Bellarena*.—An epidemic of measles spread over the entire district during past quarter. Scarcely a house escaped.

LIMAVADY; *Dungiven*.—Sanitary arrangements satisfactory. Vaccination statistics under population. Two cases of enteric fever in same district having no relation to each other as far as can be elicited. One case of sunstroke, unconscious for three days—recovery.

LIMAVADY; *Limavady, W.*—One case of cancer of breast—ten years' duration—no family history. District in fairly healthy condition. Two cases of typhoid fever in Union Hospital from neighbouring district, but none about here.

LONDONDERRY; *Eglinton*.—One case of cancer of stomach, with no family history. Influenza with bronchitis and pneumonia very prevalent in district.

LONDONDERRY; *Londonderry Urban, No. 2*.—No deaths from infectious diseases during the quarter.

MAGHERAFELT; *Bellaghy*.—The district is fairly healthy.

MAGHERAFELT; *Moneymore*.—Male birth-rate exceeds the female. No deaths of children under one year of age. On 6th May a case of scarlatina occurred (imported from the Lisburn district), which was kept isolated, and recovered with no other case. On 25th May two cases of typhoid fever took place in one family. Recovered since. Were kept isolated, with no further spread of disease. Cause not clearly made out.

**Monaghan County.**

**CARRICKMACROSS ; Donaghmoyne.**—District at present pretty healthy.

**COOTEHILL ; Dawsongrove.**—The sanitary condition of the district is fairly good.

**COOTEHILL ; Drum, No. 1.**—With the exception of one village, for which there is no proper supply of drinking water, the district is in a good sanitary condition.

**MONAGHAN ; Castleshane.**—The district is sanitary, and no epidemic present.

**MONAGHAN ; Emyvale.**—Several cases of influenza occurred during the quarter. Sanitary condition of district very good.

**MONAGHAN ; Kilmore.**—A family of four children arrived from Hamilton, N.B., and developed measles during the following few days. I sent two cases of scarlatina to fever hospital during April. No further cases of either disease. Death-rate far in excess of (more than double) birth-rate.

**MONAGHAN ; Monaghan, W.**—The sanitary arrangements in the district appear to be satisfactory. There has been no epidemic disease during the quarter, nor has there been any development in relation to the general health of the district calling for special notice.

**MONAGHAN ; Scotstown.**—The sanitary condition of the district is satisfactory.

**Tyrone County.**

**CASTLEBERG ; Castlederg, W.**—Sanitary state of district satisfactory. No epidemics of any kind.

**CASTLEBERG ; Drumquin.**—The sanitary state of the district is satisfactory, with no infectious diseases.

**CASTLEBERG ; Killeter.**—State of district healthy.

**CLOGHER ; Aghnacloy.**—A few mild cases of measles. Health of district generally good.

**CLOGHER ; Fivemiletown.**—The health of the district was pretty good during the quarter.

**COOKSTOWN ; Coagh.**—Health of district good.

**COOKSTOWN ; Pomeroy.**—District healthy and sanitary. One case of diphtheria imported.

**COOKSTOWN ; Stewartstown.**—There were two cases of diphtheria during the

quarter, both recovered. The district has been very healthy.

**DUNGANNON ; Caledon and Ballymagran.**—Summer diarrhoea in epidemic form has prevailed during past six weeks, accompanied in some cases with pyrexia, 1 to 2 degrees, and causing much prostration and wasting of tissues. Chiefly affecting adults.

**DUNGANNON ; Clonavaddy.**—District in good sanitary condition.

**DUNGANNON ; Coal Island.**—Measles and whooping-cough very prevalent for last six weeks; in other respects the general health of the district is satisfactory.

**IRVINESTOWN ; Trillick.**—There were fourteen births during the quarter, five males and nine females. There were fifteen deaths—five males and ten females. Nine were old people, one aged 96, one 95, one 90, one 86, and the others between 86 and 60.

**OMAGH ; Dromore.**—Whooping-cough very prevalent in the district during the quarter.

**OMAGH ; Drumquin.**—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic diseases are at present prevalent.

**OMAGH ; Fintona.**—The health of the district has been good during the past quarter. The sanitary arrangements are satisfactory.

**OMAGH ; Gortin.**—The sanitary condition of the district is good. There has been an epidemic of measles, but no deaths therefrom. As I mentioned in my last report the water supply to one village is very bad, and would require immediate attention.

**OMAGH ; Omagh, No. 1, W.**—The sanitary condition of the district is improved. In some parts more attention could be paid to domestic cleanliness, particularly frequent emptying of pits and earth closets. The last case of typhoid fever notified is dated 26th April, 1905. There are complaints of the inadequate water supply, but a new scheme for increasing it is under consideration, and is likely to be soon accomplished. Three cases of enteric fever proved fatal.

**OMAGH ; Omagh, No. 2.**—The district is in good sanitary condition. No epidemic of any kind. Death-rate considerably below the average.

**OMAGH ; Sixmilecross.**—No epidemic. District in very good sanitary condition.

**IV.—PROVINCE OF CONNAUGHT.****Galway County.**

**BALLINASLOE; Killaan.**—The sanitary condition of the district is fairly good. Pneumonia is about the only disease common.

**BALLINASLOE; Kiltormer.**—Health of district very good.

**CLIFDEN; Roundstone, No. 1.**—The district is quite free from epidemic disease.

**GALWAY; Galway, No. 3 (Arran).**—District very healthy.

**GALWAY; Moycullen.**—The sanitary condition of district is good.

**GALWAY; Turloughmore.**—There is an epidemic at present of measles.

**GORT; Gort, W.**—The health of district is now good, the epidemics of sore throat and feverish cold having abated. There were two cases of scarlatina, one in the town, and the other in the country, which were removed to hospital, and the disease did not spread.

**GORT; Kinvarra.**—All the deaths registered during the quarter were deaths of persons over 60 years of age, except two, and these were very nearly 60 years. Some cases of scarlatina occurred.

**LOUGHREA; Athenry.**—There is at present an epidemic of measles of a very mild type in the district, principally in the town of Athenry. The sanitary arrangements are fairly good, but a number of houses occupied by the poorer classes in Athenry are much in need of lime-washing, and I am glad to say that the sanitary authority are attending to this matter.

**LOUGHREA; Bullaun.**—Ten out of the fifteen deaths registered were over 60 years, one being registered at 92.

**OUGHTERARD; Cloonbur, No. 2.**—Health of district very good.

**OUGHTERARD; Oughterard, W.**—No deaths from cancer.

**PORTUMNA; Eyrecourt.**—There were four or five cases of measles, but no death resulted. There are at present a few cases of varicella; all the patients are going on well, and steps have been taken to prevent the spread of the disease.

**TUAM; Abbey.**—Measles is prevalent in the district.

**Leitrim County.**

**BALLYSHANNON; Kinelough.**—No vaccinations for this quarter owing to prevalence of influenza during first half of this quarter ending 30th June, 1905.

**BAWNBOY; Ballinamore.**—Sanitary state of district fair. No epidemics.

**MANORHAMILTON; Drumahaire.**—from the number of cases of pneumonia (or pneumonic fever) in the district during the quarter, I should say the disease was epidemic. The sewerage of one village is still defective, and water has become very scarce.

**MANORHAMILTON; Lurganboy.**—Pneumonia has been very prevalent in epidemic form. It occurred in certain areas, virulent in type, and exhibiting a distinctly infectious character.

**MANORHAMILTON; Manorhamilton, W.**—Five deaths from pneumonia, which has been prevalent in the district for the past two months.

**MOHILL; Carrigallen.**—The health of the district has been good during the quarter. There were two deaths from diphtheria during the quarter, one of which has not yet been registered.

**MOHILL; Rinn.**—The district is healthy and free from contagious disease.

**MOHILL; Rowan.**—I consider the sanitary state of the district good.

**Mayo County.**

**BALLINROBE; Cong.**—Of the deaths registered, one reached the age of 101, one 95, one 94, and two 90 years. An epidemic of influenza complicated by pneumonia occurred during the quarter. Health of district at present good.

**BALLINROBE; Hollymount.**—Births and deaths about the average. The general health of the people has been good this quarter. The epidemic of measles and whooping-cough disappeared.

**BELMULLET; Bangor.**—With the exception of a few sporadic cases of whooping-cough, district healthy during quarter. Of deaths registered, thirteen were persons aged 60 years and upwards. There is now considerable amelioration in sanitary state of district, though cattle are still kept in some dwellings.

**BELMULLET; Binghamstown, W.**—District in a very healthy condition.

**BELMULLET; Knocknallower.**—This district is in a fairly good sanitary condition.

**CASTLEBAR; Castlebar, No. 1, W.**—The health of the district is particularly good. The Vaccination Act is only complied with after individual notices are repeatedly sent.

**CLAREMORRIS; Ballindine.**—Health of district good, except in the beginning of the quarter when pneumonia was prevalent.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics. One death from cancer of liver. Nine of the deaths had reached 80 years and upwards. Sanitation progressive.

KILLALA; *Killala, W.*—The health of the district is very good. There has been no infectious disease during the quarter.

WESTPORT; *Achill*.—Sanitary state good, but water supply in some places very bad. Pertussis very prevalent, and a good many young children died of it or lung complications. Vaccination had to be postponed on account of the epidemic.

WESTPORT; *Ballycroy*.—Whooping-cough and influenza very prevalent in early part of quarter. Two deaths from diphtheria. Vaccination proceeding satisfactorily at present.

WESTPORT; *Bundorragha*.—Health of district very good.

WESTPORT; *Louisburgh*.—Health of district during past quarter very good.

#### Roscommon County.

ATHLONE; *Brideswell*.—The health of the district is satisfactory.

BOYLE; *Ballyfarnan, No. 1*.—One child died of whooping-cough; the epidemic now quite cleared out. District healthy.

BOYLE; *Boyle, No. 1, W.*—Whooping-cough was prevalent.

BOYLE; *Keadew*.—Pneumonia very prevalent during the quarter.

CARRICK-ON-SHANNON; *Aughrim*.—The health and sanitation of the district satisfactory.

CASTLEREAGH; *Castleplunket*.—Slight epidemic of scarlet fever during last week of May and first week of June.

CASTLEREAGH; *Frenchpark*.—There were 225 vaccination defaulters in the district up to the 31st March, 1905.

STROKESTOWN; *Roosky*.—The sanitation and health of the district are

fairly satisfactory. Of the deaths recorded during the past quarter fifteen persons were over 60 years of age, one of them reaching the advanced age of 91 years.

STROKESTOWN; *Strokestown, W.*—The sanitary condition of the district is good.

#### Sligo County.

BOYLE; *Ballyfarnan, No. 2*.—District generally healthy. Two deaths registered during quarter at 80 years, and one at 87.

BOYLE; *Gurteen*.—District healthy. Vaccination progressing.

DROMORE WEST; *Easky, W.*—No case of infectious disease during quarter. Health of district good. Vaccination defaulters are very slow in coming in.

SLIGO; *Ballymote*.—There were five uncertified deaths in this district during the past quarter. Of these, three were infants who were delicate from birth, and lived only seven or ten days. The other two, on the contrary, were aged 97 years and 74 years.

SLIGO; *Carney, No. 1*.—The health of the district has been good during the past quarter. Tuberculosis still continues to cause the highest adult mortality, but the people are now aware of its infectious nature, and adopt precautions in the majority of cases.

SLIGO; *Carney, No. 2*.—Health of this district good.

SLIGO; *Collooney*.—One case of typhoid, one of scarlet fever, both removed to fever hospital.

SLIGO; *Riverstown*.—District healthy.

TOBERCERRY; *Coolaney*.—Sanitary arrangements good.

TOBERCERRY; *Tobercurry, W.*—The district is free from contagious or infectious diseases, and its sanitary condition, with the exception of portion of the town, is satisfactory.

1905.]  
3rd Quarter.

---

**Marriages:**—APR., MAY, JUNE, 1905. **Births & Deaths:**—JULY, AUG., SEPT., 1905.

---

During the quarter ended 30th September last, there were registered in the 827 Registrars' Districts in Ireland 25,913 births—a number equal to an annual birth-rate of 23·6 in every 1,000 of the estimated population\*—and 15,929 deaths, representing an annual rate of 14·5 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 7,265 persons emigrated.

In England last quarter, the birth-rate represented was 27·5 in every 1,000 of the estimated population, and the death-rate 14·1 per 1,000.

The birth-rate in Ireland for the quarter is 0·7 over the average rate for the corresponding quarter of the ten years 1895–1904, and 0·3 above the rate for the third quarter of 1904. The deaths are 367 under those registered in the corresponding quarter of 1904; the death rate is 0·3 below the rate for that quarter, and 0·4 below the average for the third quarter of the ten years 1895–1904.

\* See page 276.

Compared with those for the corresponding quarter of 1904, the returns of pauperism, furnished by the Local Government Board, show an increase of 817 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 1,040\* in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1895-1904, the number of Workhouse inmates shows an increase of 1,266, and the number of persons on out-door relief an increase of 190,\* the total under both heads being 1.5 per cent. above the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2.0 per cent.

The annual marriage-rate (4.5 per 1,000 of the population) represented by the marriages registered during the second quarter of 1905 is 0.2 below the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of Marriages registered during the Quarter ended 30th June, 1905, and by the Births and Deaths registered in the Quarter ended 30th September, 1905.

† The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (\*), page 215.

**MARRIAGES.**

The marriages (4,957) registered in Ireland during the second quarter of 1905 are equivalent to an annual rate of 4·5 per 1,000 of the estimated population, being 0·5 below the rate for the corresponding quarter of 1904, and 0·2 below the average rate for the second quarter of the ten years 1895–1904. Of the total number of marriages 3,244 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,713 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 3·9 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·2 per 1,000 of the members of all other religious persuasions. Compared with the corresponding averages for the previous ten years, the rate under the former heading shows a decrease of 0·2, that under the latter is equal to the average. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

**TABLE II.**—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1895–1904, and the average number for that period; also the number registered during the first and second quarters of 1905.

1905. . . . .	7·5	3·9	—	—	—	4·5	6·2	—	—	—	6·8	4·5	—	—	—

**BIRTHS.**

The number of births registered during the quarter ended 30th September last was 25,913—13,224 boys and 12,689 girls—being equal to an annual ratio of 1 in every 42·4, or 23·6 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1895–1904 was 25,674, equivalent to an annual rate of 22·9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 23·7 per 1,000 of the population according to the Census of 1901; Munster, 22·1; Ulster, 24·8; and Connaught, 20·6.

The highest county or co. borough birth-rate\* is 32·7 for Dublin Co. Borough, and the lowest 17·7 for Wicklow Co. Of the intermediate rates the highest five are—Belfast Co. Borough, 31·6; Londonderry Co. and Co. Borough, 24·9; Kildare, 24·9; Armagh, 24·5; and Carlow, 24·4. The lowest five are—Roscommon, 18·4; Longford, 18·5; Tipperary, N.R., 18·5; Meath, 18·5; and Leitrim, 18·6.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 15,929—8,015 males and 7,914 females—affording an annual ratio of 1 in every 68·9, or 14·5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1895–1904 was 14·9 per 1,000.

The death-rate in Leinster was 16·0 per 1,000 of the population according to the Census of 1901; in Munster, 13·1; in Ulster, 15·1; and in Connaught, 11·2.

The county or co. borough death-rates\* range from 9·9 in Kerry, to 21·4 in Dublin County Borough. Between these rates the lowest five are—Leitrim, 10·3; Cavan, 10·6; Roscommon, 10·8; Mayo, 11·2; and Clare, 11·4; and the highest five are—Belfast Co. Borough, 18·7; Armagh, 15·6; Londonderry Co. and Co. Borough, 15·4; Kildare, 15·3; and Dublin County 15·3.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1895–1904, and the average number for that period; also the number registered during the first, second, and third quarters of the year 1905:—

1905, . . . .	23·5	24·5	23·6	.	.	20·0	17·9	14·5	.	.

\* See note (†) on page 191.

**Ages.**—Of the 15,929 deaths registered last quarter, 2,500, or 15·7 per cent., were of children under 1 year old; and 6,195, or 38·9 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 96·5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 18·0 per cent. of the total deaths registered therein; in Munster, 14·2 per cent.; in Ulster, 16·7 per cent.; and in Connaught, 9·5 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 35·4 per cent.; in Munster, to 41·0 per cent.; in Ulster, to 37·4 per cent.; and in Connaught, to 48·4 per cent. of the total deaths registered in the province.

### HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal epidemic diseases\* is 1,174, or one more than the number registered in the corresponding quarter of 1904, and is equivalent to an annual rate of 1·1 per 1,000 living, being equal to the rate for the third quarter of 1904, and 0·2 below the average rate for the third quarter of the ten years 1895–1904.

**Small-pox.**—Not one death from small-pox was registered in Ireland during September quarter of 1905. In the three quarterly periods which preceded, the deaths as registered were, respectively, 6, 1, and 2, and the average number of deaths from small-pox for the corresponding quarter of the past five years was two.

The only reference to the existence of the disease, made by the Registrars in the notes appended to their Quarterly Returns, was by the Registrar of Omagh No. 1 Urban District, who reports:—"One case of small-pox (imported.)"

**Measles.**—The deaths from measles, which numbered 115, were 3 below the average for the corresponding quarter of the preceding five years. In the three quarters preceding that under review, deaths from measles were 262, 297, and 266, respectively. The annual rate represented by the deaths (115) was 0·1 per 1,000 of the population of Ireland estimated to the middle of the year 1905. In the Registrar's District of Lisburn 9 deaths from measles were registered; in each of Athy, Coal Island, and Swineford 7 deaths were registered; and in each of Ventry and Killygordon districts 4 deaths were registered. Seven deaths from measles were registered in the County Borough of Dublin, and 16 in the County Borough of Belfast.

**Scarlet Fever.**—The deaths from scarlet fever, which were 28 in the June quarter of the year, rose slightly to 31, as against an average of 36 for the September quarter of the five years, 1900–1904. In the December quarter of 1904, deaths from scarlet-fever numbered 62, and in the March quarter of 1905 the number of such deaths was 61.

\* See note (†) on page 203.

**Typhus.**—Twenty deaths were registered during the quarter, as against 23—the average number for the corresponding September quarter of the 5 years 1900-1904. In the three quarters which precede that under notice, the deaths from this disease were 5, 12, and 18, respectively. The 20 deaths above mentioned were registered in the Unions as follows:—One in Athlone, 3 in Clonakilty, 1 in Cork, 1 in Dingle, 1 in Downpatrick, 1 in Dungarvan, 2 in Galway, 5 in Inishowen, 1 in Irvinestown, 1 in Limerick, 1 in Roscommon, 1 in Sligo, and 1 in Tipperary S.R.

**Whooping-cough.**—There were registered 95 deaths from whooping-cough, a number which is considerably below the average number (194) of deaths from this disease in the September quarter of the five years ending with that of 1904, also below the number registered in the June quarter of the present year (141 deaths,) and below the number in the March quarter (194 deaths.)

The mortality from whooping-cough in the first, second, and third quarters of 1905 compares favourably with that in the corresponding quarters of 1904, in which the mortality from this disease was 466, 431, and 249 deaths, respectively.

The incidence of mortality in the Registrars' Districts may be seen in Abstract III, from which it appears that 7 deaths from whooping-cough were registered in the District of Coal Island; 6 in Bridgetown District, Wexford Union; 5 in the District of Crossmolina; and 4 deaths in each of the Districts of Castlecomer, Coom, and Killenauale.

**Diphtheria.**—In the December quarter of 1904, the number of deaths from diphtheria was 92; in March quarter of 1905 the deaths fell to 81, and again fell in the June quarter of the same year to 67; a further decline to 49 deaths is noticed in reference to the period under review. This number is less than the average for the September quarter of the last five years by 14. In Abstract III. it may be seen that 3 deaths from diphtheria were returned for the District of Rathmines; 3 for Enniscorthy, 3 for Limerick No. 1 District, and 2 deaths were returned for each of the districts of Tullow, Dublin North City No. 3, Urlingford, Ballincollig, Blackwatertown, Belfast Urban No. 4, and Castlereagh.

**Enteric Fever.**—The deaths which were registered during the quarter were 114 in number, and equal an annual rate of 0.1 per 1,000 of the estimated population. As compared with the number registered in the June quarter of the year, the deaths show a decrease of 7, and as compared with the average for the corresponding quarter of the past 5 years the deaths show a decrease of 48.

In December quarter, 1904, the deaths were 133, and in the March quarter of 1905, the deaths from enteric fever numbered 105. Of the 114 deaths from enteric fever, 14 were of Dublin County Borough, and 40 were of Belfast County Borough, the total for these areas (54) being nearly 50 per cent. of all deaths registered during the quarter.

*As in the preceding quarter, 20 deaths were assigned to pyrexia (origin uncertain).*

**Diarrhoeal Diseases.**—The mortality from diarrhoeal diseases, always high in the September quarter of the year, amounted to 730 deaths, equal to an annual rate of 0·7 per 1,000 of the estimated population. This is the highest mortality in the September quarter since the year 1901, when the registered deaths reached the figure, 795, the average for the corresponding quarter in the five years ended in 1904 being 551 deaths; in the three quarters preceding that under review, the deaths were 255, 130, and 156, respectively.

The number of deaths returned for the total of the Urban Districts, as shown in Table V., was 588, equal to an annual rate of 1·8 per 1,000 of the aggregate population of these districts, and the number of deaths from diarrhoeal diseases registered in the remaining part of Ireland—*i.e.*, the Rural Districts, was 142—equal to an annual rate of 0·2 per 1,000 of the population of the area, according to the census of 1901. Of the total deaths, 178 were registered in Dublin County Borough, and 220 in Belfast County Borough.

**Tuberculous Diseases.**—The total number of deaths from tuberculous disease, as reported by the Registrars, for the September quarter was 2,348, as compared with 2,984 deaths registered in the June quarter of the year. The deaths (2,348) represent an annual rate of 2·1 per 1,000 of the estimated population. It would appear that of each 100 deaths registered during the quarter some 15 were the victims of tuberculous disease. In the Province of Leinster 740 deaths were registered, in Munster 558 deaths, in Ulster 866 deaths, and in Connaught 184 deaths from all forms of tuberculous disease were registered.

Particulars regarding the number of deaths from tuberculous disease by Counties, Unions, and Registrars' Districts, are given in the abstracts, commencing at page 214.

Several of the Registrars have called attention to the prevalence of tuberculosis, or other circumstances regarding its existence. These notes may be seen at the end of this Report, commencing at page 277. Amongst others, the remarks of the Registrar of Goleen District in the Union of Skull; the Registrar of Waterford No. 1 Urban District, and those of the Registrar of Castleblayney District afford important information.

**Malignant Disease.**—The deaths which were registered as from carcinoma, sarcoma, and cancer (undefined) are included in the total, 716, which figure is in excess of that returned in the preceding quarter, namely, 663 deaths from malignant disease.

In Abstract I. it may be seen that the five counties or county boroughs in which the highest number of deaths from malignant disease was registered were:—Dublin County Borough, 70; Belfast County Borough, 65; Cork County and County Borough, 65; County

Down, 54; and County Armagh, 39; and the five counties in which the lowest number of deaths from malignant disease was registered were:—County Longford 2, County Carlow 3, County Sligo 4, Tipperary North Riding 5, and County Leitrim, 5.

The annual death rate represented by the total, 716, is 0·7 per 1,000 of the population of Ireland, estimated to the middle of the year 1905.

**Hydrophobia.**—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district (Omagh, No. 1), measles in 22 districts, scarlet fever in 18, whooping-cough in 14, diphtheria in 14, fever in 23—typhus, 6, enteric 15, and pyrexia (origin uncertain), 2—influenza in 6, mumps in 1, and cerebro-spinal meningitis in 1.

**Inquests.**—There were 472 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 34 of the total deaths registered.

In Leinster there was 1 inquest to every 29 deaths registered, in Munster 1 to 48, in Ulster 1 to 29, and in Connaught 1 to 67.

**Deaths in Public Institutions.**—Of the 15,929 deaths registered, 3,127, or 19·6 per cent., occurred in public institutions. In Leinster the percentage was 27·2, in Munster 24·3, in Ulster 13·0, and in Connaught 13·1.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September 1905, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.

[TABLE V.]

## URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 18.0, and the birth-rate 29.2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 12.7 and the birth-rate 20.7 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 2.3 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0.5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1905, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;‡ from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 30th September, 1905. The figures for all forms of tuberculous disease, for cancer, malignant disease, and for uncertified deaths for the above-mentioned 21 Urban Districts have, however, been obtained from the Quarterly Returns furnished by the Registrars.

♦♦ See note (†), page 203.

Boundaries extended as from 1st April, 1905.

**VACCINATION.**

According to the Returns of Primary Vaccinations received for the third quarter of the year 1905, there were 23,652 persons successfully vaccinated; in 2,338 cases the operation was postponed, 23 children were reported as insusceptible of vaccination, and the deaths of 1,474 unvaccinated children under 3 months old were registered, making a total of 27,487 children with regard to whom particulars as to vaccination were ascertained.

**EMIGRATION.**

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 7,265 (3,469 males and 3,796 females), being 4,519 less than in the corresponding quarter of the year 1904, and 3,493 under the average number for the third quarter of the ten years 1895–1904.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1904 and 1905 :—

MONTHS	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1904.	1905.	Increase.	Decrease.	1904.	1905.	Increase.	Decrease.	1904.	1905.	Increase.	Decrease.

Total,	4,996	3,469	—	1,527	6,788	3,796	—	2,992	11,784	7,265*	—	4,519

\* Including 5,665 emigrants to the United States of America, viz. :—1,006 in the month of July, 1,508 in August, and 3,151 in September. Of 5,351 steerage passengers, 1,843 had their passages paid for in America.

**PRICES AND PAUPERISM.**

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1904 the average price was 5 $\frac{3}{4}$ *d.*, and in the corresponding quarter of 1895 it was 5*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* 6*d.* per cwt., being the same as the average for the corresponding quarter of the year 1904. In the third quarter of 1895 the average price was 13*s.* 11*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 3*d.* to 3*s.* 8*d.* In the third quarter of 1904 the average prices were 2*s.* 8*d.* to 3*s.* 5*d.*, and the prices for the corresponding quarter of 1895 were 1*s.* 11*d.* to 2*s.* 11*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 50*s.* 6*d.* to 55*s.* per cwt. In the corresponding quarter of 1904 the average prices were from 51*s.* 6*d.* to 59*s.*, and in the third quarter of 1895 they were from 46*s.* 6*d.* to 58*s.* 6*d.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 17*s.* per ton nett.

The highest price of 2 $\frac{3}{4}$  per cent. Consols at the Dublin Stock Exchange for the quarter was £91, and the lowest £89 $\frac{1}{4}$ . The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was 3 $\frac{1}{2}$  per cent. until the 7th September, when it was raised to 4 per cent., at which it remained until the 28th September, when it was further raised to 4 $\frac{1}{2}$  per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1905 was 41,923, or 817 over the average for the corresponding period in 1904.

The average weekly number of persons receiving out-door relief during the quarter was 56,722\*, being 1,040 over the average for the third quarter of 1904.

Of the persons receiving in-door relief during the third quarter of 1905, an average number of 1,456 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1904 the average weekly number was 1,420.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1905, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien shops, exclusive of delivery, was 4d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the third quarter of the years 1900–1905, respectively.

\* See note (\*) on page 194.

† Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

The mean height of the barometer during the third quarter of 1905 was 29.949 inches, being 0.017 under the average for the corresponding quarter of the five years 1900-1904; the highest reading (30.405 inches) was on the 14th September, at 9 P.M., air calm; and the lowest (29.054 inches) on the 4th August, at 9 A.M., wind E.

The mean temperature of the air during the quarter was  $57.0^{\circ}$  or  $0.4^{\circ}$  over the average for the third quarter of the five years 1900-1904.

The maximum temperature of the air during the quarter was  $79.4^{\circ}$  and the minimum  $33.1^{\circ}$ . The maximum heat in sun was  $132.5^{\circ}$ , and the minimum on the grass  $27.0^{\circ}$ .

Rain fell on 53 days during the quarter. The rain-fall measured 8.600 inches, being 0.340 inch under the average for the third quarter of the five years 1900-1904. The greatest monthly rain-fall was in August, when 6.485 inches were registered.

The wind blew on 37 days from W., on 19 days from S.W., on 8 days from E., on 6 days from N., on 4 days from N.E., on 3 days each from S.E. and S., on 2 days from N.W., and the air was calm on 10 days at 9 A.M.

*July.*—The mean height of the barometer during this month was 30.037 inches; the highest reading (30.305 inches) was on the 3rd at 9 P.M., air calm; and the lowest (29.678 inches) on the 29th, at 9 A.M., wind S.W. The mean temperature of the air was  $61.3^{\circ}$ , the maximum registered was  $79.4^{\circ}$ , and the minimum  $42.4^{\circ}$ . The 19th was the warmest day, and the 27th the coldest night. The mean of the dry bulb was  $62.0^{\circ}$ , and of the wet bulb  $58.1^{\circ}$ . The maximum heat in sun was  $132.5^{\circ}$ , and the minimum on the grass  $35.0^{\circ}$ . The total amount of sunshine recorded was 154.8 hours, the greatest daily amount being 15.6 hours on the 8th. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.3. Rain fell on 16 days. The rain-fall measured 0.950 inch; the greatest amount in 24 hours was 0.140 inch on the 2nd.

*August.*—The mean height of the barometer during this month was 29.831 inches; the highest reading (30.386 inches) was on the 31st at 9 A.M., wind W., and the lowest (29.054 inches) on the 4th, at 9 A.M., wind E. The mean temperature of the air was  $56.6^{\circ}$ , the maximum registered was  $68.7^{\circ}$ , and the minimum  $41.9^{\circ}$ . The 16th was the warmest day, and the 31st the coldest night. The mean of the dry bulb was  $58.0^{\circ}$ , and of the wet bulb  $54.9^{\circ}$ . The maximum heat in sun was  $129.4^{\circ}$ , and the minimum on the grass  $32.2^{\circ}$ . The total amount of sunshine recorded was 124.4 hours, the greatest daily amount being 11.0 hours on the 14th and 16th. The maximum ozone was 0.9, the minimum 0.0, and the mean 0.5. Rain fell on 24 days. The rain-fall measured 6.485 inches; the greatest amount in 24 hours was 3.350 inches on the 25th.

*September.*—The mean height of the barometer during this month was 29.979 inches; the highest reading (30.405 inches) was on the 14th, at 9 P.M., air calm; and the lowest (29.210 inches) on the 7th, at 9 A.M., wind S.W. The mean temperature of the air was  $53.1^{\circ}$ ; the maximum registered was  $67.1^{\circ}$ , and the minimum  $33.1^{\circ}$ . The 4th was the warmest day, and the 26th the coldest night. The mean of the dry bulb was  $54.2^{\circ}$ , and of the wet bulb  $51.5^{\circ}$ . The maximum heat in sun was  $120.6^{\circ}$ , and the minimum on the grass  $27.0^{\circ}$ . The minimum on the grass was below  $32^{\circ}$  on 5 nights. The total amount of sunshine recorded was 122.6 hours, the greatest daily amount being 9.8 hours on the 9th. The maximum ozone was 0.9, the minimum 0.0, and the mean 0.5. Rain fell on 13 days. The rain-fall measured 1.165 inches; the greatest amount in 24 hours was 0.270 inch on the 27th.

## TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of  
W. N. Shaw, Sc.D., F.R.S.*

In compiling the following Table (pp. 212, 213), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

## LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head, . . . . .	Meteorological Office Observer.
Donaghadee, . . . . .	Do.
Belfast, Queen's College, . . .	John Wylie, B.A.
Armagh, The Observatory, . . .	J. L. E. Dreyer, Ph.D.
Markree Castle, . . . . .	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point, . . . . .	Meteorological Office Observer.
IRELAND, SOUTH:—	
Dublin (City), . . . . .	Sir John W. Moore, M.D.
Birr Castle, . . . . .	J. H. Skerritt, for the Earl of Rosse, K.P.
Killarney, . . . . .	E. W. Griffin, M.D.
Valencia, . . . . .	Meteorological Office Observer.
Roche's Point, . . . . .	Do.
Waterford, . . . . .	J. N. White, Esq.

\* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee, and Roche's Point, where also the Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwich time is used. The figures are based on observations as follows:—Rainfall 35 years, 1866-1900; Temperature 30 years of Moderate and Strong wind (force 4-7), the number of observations of Calm, and the number of days of Calm.

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park and at the Phoenix Park Observatory.

NOTE.—This table has been constructed for the year 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1905—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

## APPENDIX.

### REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter *W* denotes that the Union Workhouse is situated in the District.

#### I.—PROVINCE OF LEINSTER.

##### Carlow County.

CARLOW; *Bagenalstown*.—District wonderfully healthy considering there is such a wretched supply of water.

CARLOW; *Clonegall*.—All the births and deaths registered during the quarter were males.

CARLOW; *Leighlinbridge*.—District healthy.

##### Dublin County.

CELBRIDGE; *Rathcoole*.—Some few cases of measles. Sanitary condition good. All children over three months vaccinated.

DUBLIN SOUTH; *Rathmines*.—Sanitary condition of district good.

##### Dublin County Borough.

DUBLIN NORTH; *North City, No. 1, West*.—No epidemic.

##### Kildare County.

ATHY; *Castledermot*.—District healthy during quarter.

BALTINGLASS; *Baltinglass, No. 2*.—Whooping-cough prevalent.

CELBRIDGE; *Celbridge, W*.—District healthy. The sanitary arrangements of the town have been much improved lately.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—District very healthy. A few cases of measles occurred, the infection being imported from another county.]

EDENDERRY; *Rathangan, No. 1*.—A death registered, an old woman—72, from carcinoma of liver. She lived by 'begging,' and was always apparently in excellent health until a month before death, when she became confined to bed.

NAAS; *Kildare*.—District fairly healthy.

NAAS; *Naas and Carragh, W*.—A sewage system has been arranged for in the Urban District, and will soon be carried out. The rural part of this district very healthy.

##### Kilkenny County.

CALLAN; *Callan, W*.—One case of epithelioma linguae. The district is free from epidemic or contagious disease.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair. All the diseases named in the abstracts absent.

CASTLECOMER; *Castlecomer, W*.—Four deaths were registered this quarter from whooping-cough. There are still some cases in the district.

KILKENNY; *Tullaroan*.—There was one case of cancer of stomach. Deceased was ten months bad. No hereditary tendency in family as far as could be traced.

URLINGFORD; *Urlingford, W*.—Health of the district good. No epidemics.

##### King's County.

BIRR; *Birr, W*.—Three cases of enteric fever occurred during the quarter, and one case of diphtheria. The attendance for vaccination purposes was particularly good during the quarter.

BIRE; *Ferbane*.—Sanitary condition fair.

BIRR; *Frankford*.—Sanitary condition of district satisfactory. Deaths registered include people of the ages of 82, 80, 77, 75 (two), 65, and 60 years.

BIRE; *Killyon*.—Health of the district very good.

BIRE; *Kinnitty*.—Health of district fairly good.

EDENDERRY; *Rhode*.—Health of district good.

MOUNTMELICK; *Clonygowan, No. 2*.—District very healthy.

ROSCREA; *Roscrea, No. 2*.—District healthy. One case of enteric fever in last month of the quarter, disease contracted outside the district.

ROSCREA; *Shinrone*.—Two cases of scarlet fever occurred during quarter.

TULLAMORE; *Killoughy*.—The district is free from infectious disease. Fairly sanitary also.

TULLAMORE; *Philipstown*.—Health of the district good during the quarter; sanitation of district fairly satisfactory.

#### Longford County.

BALLYMAHON; *Abbeyshrule*.—The sanitary arrangements are satisfactory. One case registered during the quarter of cancer of rectum.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee*.—The district is in good sanitary condition. There were no cases of contagious or infectious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition. No infectious or contagious disease during the quarter.

#### Louth County.

ARDEE; *Castlebellingham*.—District very healthy. Sanitary condition of district fairly good.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Termonfeckin*.—District exceptionally healthy. No epidemic or zymotic disease prevalent.

DUNDALK; *Barronstown*.—During the quarter there was a case of diphtheria (patient a sailor who brought the malady home with him). I had case removed at once to Union Fever Hospital, and all precautions taken to prevent further spread of the disease.

DUNDALK; *Ravensdale*.—Health of district and sanitary condition very good.

#### Meath County.

DROGHEDA; *St. Mary's*.—The sanitary state of the district is satisfactory.

DROGHEDA; *Stamullen*.—District in a healthy state.

DUNSHAUGHLIN; *Ratoath, W.*—The sanitary arrangements in the district are good.

KELLS; *Kilskeer*.—Sanitary condition of district good.

KELLS; *Moynalty*.—Dental caries very common amongst the youth, and is probably caused by excessive indulgence in very hot tea.

KELLS; *Nobber*.—The entire district is in its normal state of health; contagious diseases being non-existent.

NAVAN; *Painestown*.—The supply of potable water to the village of Slane is liable to pollution by sewage.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Innsfield*.—One of the deaths registered was that of a man aged 98 years.

TRIM; *Summerhill*.—District is healthy and free from any infectious disease.

#### Queen's County.

ABBEYLEIX; *Ballinakill*.—Health of district good during the quarter.

MOUNTMELICK; *Clonygowan, No. 1*.—District very healthy.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been good during the past quarter.

#### Westmeath County.

ATHLONE; *Glassan*.—Deaths of old people registered during the quarter at 95, 88, 85 (2), 83, 75, and 72 years, respectively.

ATHLONE; *Moate*.—No epidemic.

GRANARD; *Finnea, No. 1*.—The health of district good.

GRANARD; *Street, No. 1*.—Three cases of scarlatina in the persons of children (one male and two females) occurred during quarter. The fever appears to be of a mild type.

MULLINGAR; *Ballynacarrigy*.—Health of district very fair. Various forms of tubercular disease common.

MULLINGAR; *Castletown Geoghegan*.—The district is free from zymotic disease.

MULLINGAR; *Killucan*.—The district is at present free from all forms of infectious diseases, and the sanitary state of the district is good.

**MULLINGAR; Milltown.**—A case of diphtheria was reported in the district during the quarter. The subject of attack was a two-year old child in a delicate state of health, and no spread of the disease has as yet taken place. Of the deaths registered one only was from malignant disease, *i.e.*, carcinoma or cancer of the liver of a man 60 years old last birthday. There were two deaths from lung disease of young men aged 30 and 35 years, respectively, namely, phthisis and pneumonia, and an old woman of 70 years succumbed to an attack of facial erysipelas. (The eighteen vaccination defaulters have all been vaccinated).

**MULLINGAR; Mullingar, W.**—Health of district fairly good. There were a few cases of diphtheria.

#### Wexford County.

**ENNISCORTHY; Newtownbarry.**—Five of the deaths registered were over 80 years of age.

**GOREY; Camolin.**—The sanitary state of the district is fairly good, with the exception of four or five houses in the street of Camolin which need a system of drainage.

**GOREY; Killenagh and Wells.**—Most of the deaths reported seem to be from cardiac failure.

**NEW ROSS; New Ross, W.**—Epidemic diarrhoea was prevalent in August and part of September, amongst adults as well as children. Whooping-cough has appeared principally in the rural district during the latter part of September. The sanitary condition of the urban district is by no means good, and the water supply is bad and insufficient in quantity.

**NEW ROSS; Old Ross.**—The total number of deaths registered—five—and all over 60 years—was the lowest for the past twelve years in any quarter.

**WEXFORD; Bannow.**—Vaccination was postponed owing to prevalence of whooping-cough in the district.

**WEXFORD; Bridgetown.**—Vaccination is not in proportion to the population in consequence of the prevalence of whooping-cough.

#### Wicklow County.

**BALTINGLASS; Baltinglass, No. 1, W.**—Measles and whooping-cough very prevalent.

**BALTINGLASS; Kiltegan.**—The district is healthy; births largely exceeding deaths.

**RATHDOWN; Bray, No. 1.**—Births and deaths about the average.

**RATHDOWN; Delgany.**—Health of the district is good.

**RATHDRUM; Annamoe.**—District healthy during the quarter.

**RATHDRUM; Arklow.**—About fifteen cases of typhoid fever occurred in Arklow during the quarter. There has been no fresh case reported for the past fortnight.

**RATHDRUM; Newcastle.**—The death registered from cancer is due to heredity.

**SHILLELAGH; Tinahely.**—Health of district very good.

## II. PROVINCE OF MUNSTER.

#### Clare County.

**BALLYVAGHAN; Ballyvaghan, W.**—District continues to maintain its very healthy character. Vaccination fairly satisfactory.

**CORROFIN; Corrofin, W.**—District healthy.

**ENNIS; Newmarket.**—The quarter just ended has been a very healthy one, and free from all forms of zymotic diseases. I have no doubt that this condition of things is in great part due to the improvement in the dwellings of the labourers.

**ENNISTIMON; Ennistimon, W.**—The sanitary arrangements are fairly satisfactory. Vaccination is not attended to although I return defaulters every quarter.

**ENNISTIMON; Roadford.**—District very healthy; sanitary arrangements satisfactory.

**KILLADYSERT; Ballynacally, W.**—Triplets were born in Cloonfurrihis, they died one day after birth, and this accounts for most of the unusual infant mortality.

**KILLADYSERT; Labasheeda.**—District healthy; sanitation good.

**KILRUSH; Carrigaholt.**—The health of district very good, and rate of mortality very low.

**KILRUSH; Kilkee.**—The sanitary state of district fairly good. Two accidental deaths, one of a girl by falling from a cliff, the other of a man by falling from his bicycle—no inquest on the latter. Death rate low.

KILRUSH; *Kilmihil*.—District is in a very healthy condition as usual.

KILRUSH; *Kilrush, W.*—District has been, on the whole, healthy. There have been some cases of influenza.

LIMERICK; *Bridgetown*.—Sanitary condition of district good.

LIMERICK; *Coolacasey*.—The district was very healthy during the quarter. There were nine cases of enteric fever caused originally from drinking water from polluted wells outside Limerick; most of them are convalescent and the others are going on favourably; all except one, who is long since better, went to Union Fever Hospital.

SCARRIFF; *Anacarriga*.—District very healthy.

SCARRIFF; *Feakle*.—Health of district good; no contagious or infectious disease therein.

SCARRIFF; *Mountshannon, W.*—District fairly healthy generally.

TULLA; *Quin*.—The sanitary arrangements in the district are very fair.

#### Cork County and County Borough.

BANDON; *Inishannon*.—The health of the district has been good during past quarter. I am sorry to have to state that there were two deaths from cancer, two from pulmonary tuberculosis, and one from pulmonary abscess.

BANTRY; *Durrus and Kilcrohane*.—District healthy, with the exception of a good many cases of influenza amongst young children.

BANTRY; *Glengarriff*.—District in a fairly sanitary condition at present; no infectious disease.

BANTRY; *Kealkill*.—The sanitary condition of district is fairly good; no infectious disease during quarter; no case of carcinoma during quarter.

CASTLETOWN; *Castletown, W.*—District healthy.

CASTLETOWN; *Kilcatherine*.—District healthy.

CLONAKILTY; *Clonakilty, W.*—One of the deaths from typhus was from Timoleague district, the other, a helper in hospital, who contracted it there while on duty. There was no fever in my district except the cases brought into hospital from Timoleague.

CLONAKILTY; *Rosscarbery*.—District perfectly healthy.

CORK; *Carrigaline, No. 1*.—A number of cases of measles of a mild type. District otherwise healthy.

CORK; *Douglas*.—One case of cancer occurred during present quarter.

CORK; *Queenstown, No. 2*.—Three deaths were registered from tubercular meningitis, one from tubercular peritonitis, and two from phthisis pulmonalis.

DUNMANWAY; *Dunmanway, W.*—District healthy; no epidemic prevalent.

FERMOY; *Ballynoe*.—No death from malignant disease.

KANTURK; *Kanturk, W.*—One death of a person aged 102 years. District healthy.

KILMALLOCK; *Charleville*.—We have an epidemic of enteric fever in the district for the past quarter. I have sent twenty-three cases to hospital, and three are being treated at home. I believe we have arrived at the end of it. I have fumigated all houses except two, and will attend to these as soon as patients are about.

KINSALE; *Ballyfeard*.—Health of district for quarter fair; one case of phthisis complicated with pulmonary gangrene and haemoptysis treated during quarter.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—Sanitary state of district satisfactory.

MALLOW; *Doneraile*.—District very healthy.

MALLOW; *Kilshannig*.—There was no death from cancer or tuberculous disease registered during the quarter.

MALLOW; *Rahan*.—Two cases of scarlatina in the same family, since last report. District otherwise free from infectious diseases.

MIDDLETON; *Aghada*.—There was one death from cancer of tongue registered, and two deaths from tuberculous disease.

MIDDLETON; *Middleton, No. 2*.—General health of district good.

MITCHELTOWN; *Mitcheltown, No. 1, W.*—District healthy.

SKIBBEREEN; *Skibbereen, W.*—One case of diphtheria admitted into hospital from Union Hall district, one case of typhus admitted from Skibbereen urban district.

SKULL; *Goleen*.—The district is in a generally healthy state. Tuberculous disease seems on the increase, three deaths from such being registered during the quarter.

YOUGHAL; *Youghal, W.*—Public health and vaccination good; sanitary state of district fair.

**Kerry County.**

**CAHERSIVEEN; Caher, W.**—The district is in good sanitary condition.

**CAHERSIVEEN; Darrynane.**—Three members of the same family have been attacked with typhus fever during the quarter just ended—the disease being clearly attributable to overcrowding and defective ventilation.

**CAHERSIVEEN; Glanbehy.**—The deaths registered during the quarter include five from old age, their ages ranging from 80 years to 96; three from cough; one from influenza, two days, not certified; one weak from birth; one from congenital debility, three days, certified; one from vesical calculus, 9 months, pyelitis exhaustion, certified; one from cardiac disease, certified.

**CAHERSIVEEN; Valencia.**—District healthy.

**DINGLE; Anascaul.**—The Analyst of Dingle Union reported on result of bacteriological examination of water used for drinking purposes in Anascaul Village, as follows:—7,500 bacteria per cubic centimetre; putrefactive organisms growing with extreme rapidity; contained a dirty sediment, and the well has been contaminated with road sweepings including dung. Chemical analysis unsatisfactory. The well is still used for drinking purposes. One death registered from convulsions; one from fracture of the skull (accidental), the first is certified, the other is not. Only two deaths registered during the quarter.

**DINGLE; Castlegregory.**—There has been no case of cancer in my district during past quarter. Recently a good many cases of choleraic diarrhoea have cropped up, and still exist; no fatal results so far.

**DINGLE; Dingle, W.**—The district has been very healthy for the last three months.

**DINGLE; Ventry.**—Sanitary condition of district not satisfactory. Have not heard of any cases of morbilli or pertussis for the last month.

**KENMARE; Tuosist.**—Death of a man aged 105 years registered during the quarter.

**KILLARNEY; Coom.**—Whooping-cough prevalent during the quarter. Sanitary condition of district fairly good. Owing to the prevalence of whooping-cough no vaccination performed.

**KILLARNEY; Killarney, No. 1, W.**—No infectious disease in district during quarter.

**KILLARNEY; Killarney, No. 2.**—No case of infectious disease during the quarter.

**KILLARNEY; Milltown.**—District healthy. No contagious or infectious diseases of any kind. Sanitary condition good.

**LISTOWEL; Ballybunion.**—General health of district good.

**LISTOWEL; Ballyhorgan.**—Sanitary state of district good.

**LISTOWEL; Ballylongford.**—District healthy for quarter. No case of contagious disease. Sanitary condition requires improvement. Vaccination satisfactory.

**TRALEE; Castlemaine.**—The health of the district good. Vaccination defaulters complying with the law.

**TRALEE; Kilgobban.**—There are a number of vaccination defaulters in the district, the result of neglect on the part of persons having custody of children.

**Limerick County and County Borough.**

**CROOM; Castletown.**—A very healthy quarter, with an unusually small death-rate.

**KILMALLOCK; Bruree.**—The district is healthy.

**KILMALLOCK; Hospital.**—District healthy.

**KILMALLOCK; Kilmallock, W.**—District healthy.

**LIMERICK; Annacotty.**—Sanitary arrangements very fair; district healthy.

**LIMERICK; Limerick, No. 3.**—The district has been in a fairly healthy condition during the quarter.

**LIMERICK; Moroe.**—District in fairly good sanitary condition; no contagious or infectious disease prevalent. Death-rate very low during the quarter.

**LISTOWEL; Glin.**—I regret that my report as to the public health for the quarter just ended is not quite so satisfactory as that of last quarter. In the month of August and indeed during the month of September there was a good number of cases of epidemic diarrhoea or as it is now more aptly designated "infective enteritis"; it caused three deaths. In very young children it appears most destructive to life. Probably bacteria entering the stomach through the agency of the milk are responsible for the majority of the cases. I had one case of pyrexia of uncertain origin, in an old woman.

**MITCHELSTOWN; Mitchelstown, No. 2.**—District healthy.

**NEWCASTLE; Ardagh.**—The sanitary state of the district is pretty fair; no epidemic in district.

NEWCASTLE; *Feenagh*.—The health of the district is good.

NEWCASTLE; *Newcastle, W.*—District healthy.

RATHKEALE; *Askeaton*.—During the the past quarter the district was very healthy, and free from all contagious diseases. Of the deaths registered two were from pulmonary tuberculosis, and two in childbirth, one of which was caused by heart disease, and the other by septicæmia.

RATHKEALE; *Pallaskenry*.—The sanitary arrangements in the district are fairly good.

RATHKEALE; *Rathkeale, No. 1, W.*—The birth and death rates are the lowest yet recorded in the district. Six deaths only took place in the dispensary district, and eight in the infirmary. The greater number were due to the diseases of very advanced life.

RATHKEALE; *Rathkeale, No. 2.*—The district was in a healthy condition during the quarter, and free from contagious diseases, with the exception of one case of scarlet fever.

TIPPERARY; *Grean*.—District healthy.

#### Tipperary County, North Riding.

BIRR; *Riverstown*.—No epidemic.

BORRISOKANE; *Terryglass*.—The district continues very healthy.

NENAGH; *Nenagh, W.*—District healthy.

NENAGH; *Newport*.—District healthy.

NENAGH; *Portroe*.—District healthy.

THURLES; *Littleton*.—No case of cancer registered in district during the quarter.

THURLES; *Moyné*.—Health of district good; no disease.

#### Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district is good.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good; district healthy; no epidemic or other disease prevalent. One of the four deaths registered was at age of 90 years. Vaccinations well attended to, only one or two children in district over three months unvaccinated.

CASHEL; *Killenaule*.—Four deaths from whooping-cough—three in one family—of a very malignant type—in the other case the infant was delicate

from birth. One death from traumatic tetanus in a little girl aged 11 years, caused by a cigarette burn on her arm.

CASHEL; *Kilpatrick*.—District healthy.

CLOGHEEN; *Caher*.—The district is in a very healthy state. Few deaths occurred during the quarter; no cases of an epidemic character occurred.

CLOGHEEN; *Clogheen, W.*—District very healthy, and free from all forms of epidemic diseases.

CLONMEL; *Kilsheelan, No. 1.*—There were two deaths from cancer, one of the breast, the other of the stomach. One death from pulmonary tuberculosis.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—Registered one death of a person aged 100 years; district very free from sickness.

TIPPERARY; *Tipperary, W.*—The district was in a healthy condition during the quarter.

URLINGFORD; *Kilcooly*.—The district has been healthy during quarter, with the exception of one case of typhoid which was due to overcrowding. Sanitary arrangements are good.

#### Waterford County.

CLONMEL; *Kilsheelan, No. 2.*—One death from pulmonary tuberculosis; no other zymotic disease.

DUNGARVAN; *Seskinan*.—There has been an outbreak of typhus during the quarter, sixteen cases having been removed to fever hospital. There were two deaths which occurred in fever hospital.

DUNGARVAN; *Whitechurch*.—Tuberculosis very prevalent in the district.

KILMATHOMAS; *Bunmahon*.—The district is healthy and free from zymotic diseases.

LISMORE; *Ballyduff*.—Vaccination, sanitation, and general health of district satisfactory.

WATERFORD; *Waterford Urban, No. 1, W.*—The sanitary arrangements in parts of the urban portion of the district are very backward. There are some dirty tenement houses which are unprovided with proper sanitary conveniences. There are objectionable privies attached to many houses. Tuberculosis, particularly the pulmonary form, is prevalent, and is likely to continue so until judicious isolation and effective disinfection are carried out. The district is free from epidemic disease. This quarter, com-

pared with the previous quarter, shows a marked increase in the number of successful primary vaccinations.

WATERFORD; *Woodstown*.—The sanitary condition of the district is good.

YOUGHAL; *Ardmore*.—District healthy.

YOUGHAL; *Clashmore*.—District healthy.

### III. PROVINCE OF ULSTER.

#### Antrim County.

ANTRIM; *Doagh*.—The district is in a fairly healthy sanitary condition. Two cases of enteric, two of diphtheria, and one of erysipelas were notified during the quarter.

ANTRIM; *Randalstown*.—Health of the district good.

ANTRIM; *Templepatrick*.—I have made a general inspection of the district during the present quarter and find that the sanitary condition and arrangements (with very few exceptions) are good.

BALLYMENA; *Ahoghill*.—District healthy. Only ten deaths during the quarter, and two of these were of children under two days old.

BALLYMENA; *Ballymena, W.*—A few deaths from summer diarrhoea. Town and district healthy. Registered one death at age 102 years.

BALLYMENA; *Clogh*.—District very healthy. Sanitary arrangements fair.

BALLYMENA; *Galgorm*.—No zymotic disease in the district during the quarter. Death-rate extremely low.

BALLYMENA; *Portglenone*.—Health of the district is good. No epidemic disease.

BALLYMENA; *Toome*.—Health of the district satisfactory.

LARNE; *Ballycarry*.—Sanitary arrangements of district fairly good. Measles prevalent throughout district, mild, no deaths therefrom. Family of four children, all ill with scarlet fever, removed to hospital a fortnight ago. No further cases.

LARNE; *Carrickfergus*.—Measles prevalent during the latter part of quarter. A few cases of scarlatina also occurred. No deaths from either disease.

LISBURN; *Dunmurry*.—The sanitary condition of this district good. No epidemic of any kind.

LISBURN; *Glenavy*.—Measles still prevalent in some parts of district—not fatal—but preventing vaccination. No other disease in district.

LISBURN; *Knocknadona*.—The sanitary condition of this district is good. No deaths were registered from cancer.

LISBURN; *Lisburn, W.*—There was a virulent epidemic of measles. Nine deaths occurred, which, with ten the previous quarter, makes a total of nineteen deaths. Of the deaths from all causes that occurred, twenty-nine were of children under three years of age, and of these, thirteen were of children under one year of age.

LURGAN; *Aghalee*.—Measles prevalent.

#### Armagh County.

ARMAGH; *Blackwatertown*.—We have not had diphtheria for a number of years until this quarter when a few cases occurred in connection with a larger number than usual of sore throats. I believe it has now disappeared.

ARMAGH; *Loughgall*.—During the quarter there was an outbreak of measles. In the district there are numerous cases of malignant disease.

ARMAGH; *Markethill*.—District very healthy during the quarter, and death-rate about the lowest I remember.

ARMAGH; *Rich Hill*.—Health of district good.

LURGAN; *Lurgan, No. 1, W.*—Health of district very good during quarter.

LURGAN; *Lurgan, No. 2*.—The district is in a good sanitary condition, and free from any infectious disease.

NEWRY; *Forkill*.—District healthy.

#### Belfast County Borough.

BELFAST; *Belfast Urban, No. 11*.—The district is fairly healthy, and the death-rate is lower than usual. There was a large number of cases of diarrhoea during the quarter.

#### Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—The district is in a healthy condition.

BAILIEBOROUGH; *Shercock*.—District now healthy. No case of scarlatina for past two months.

CAVAN; *Killeshandra*.—The district is healthy. The water supply is defective, and I have advised a tank to hold 15,000 gallons of water to be pumped from one of the near lakes, and the village to be lighted.

COOTEHILL; *Tullyvin*.—District healthy and free from contagious disease. Of those whose deaths were registered during the quarter, 76.9 per cent. had reached the age of 60 years or over; and of the total number, 46.1 per cent. had reached the age of 70 years or over.

ENNISKILLEN; *Holywell*, No. 2.—The sanitary condition of the district is not entirely satisfactory. Six cases of enteric fever occurred during the past quarter, owing, I believe, to drinking contaminated water from rivers, the springs having dried up. Four of the cases were in one house. The others were in different localities.

GRANARD; *Finnea*, No. 2.—The health of district good.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*. — District healthy and free from zymotic disease.

#### Donegal County.

BALLYSHANNON; *Ballintra*.—Water supply still bad, but sanitary arrangements otherwise fairly good.

DONEGAL; *Donegal*, W.—District free from infectious disease. Sanitary condition good.

DONEGAL; *Dunkineely*.—Health of district good. No epidemic of any kind. Sanitary arrangements improving. One death registered at 108 years. No written record to corroborate, but from inquiry made, locally, I believe this figure to be correct. The old lady was in possession of her faculties almost to the last. She spoke only Irish.

DONEGAL; *Mountcharles*.—No epidemic. District healthy.

DONEGAL; *Pettigoe*.—District healthy.

DUNFANAGHY; *Crossroads*.—District free from any epidemics. Three deaths from cancer registered during the quarter.

DUNFANAGHY; *Dunfanaghy*, W.—One death, on 19th July, a boy 16 years, was the result of sunstroke on the 23rd June, temperature 77° in the shade. There were three cases of scarlet fever in the one family in August—no other case. District healthy.

GLENTIES; *Ardara*.—The sanitary arrangements in this district are good.

GLENTIES; *Carrick*.—The sanitary condition of the district is fairly good. There has been no epidemic.

GLENTIES; *Doocharry*. — District healthy.

GLENTIES; *Dunglow*, No. 1.—Typhoid fever was epidemic here from February, 1903, to July, 1905. In my opinion this prevalence is due to the want of a public water supply. There were in all sixteen cases, two of which ended fatally.

GLENTIES; *Glenties*, W.—This district is in a good sanitary condition and healthy.

GLENTIES; *Killybegs*.—Health of district good. No outbreak of infectious disease. Sanitary condition on the whole satisfactory.

INISHOWEN; *Buncrana*. — Of the deaths registered during the quarter, eight were over sixty years of age, four under three months. One death registered at 106 years.

INISHOWEN; *Carndonagh*, W — I am glad to say the district is fairly healthy.

INISHOWEN; *Clonmany*.—During the first month of the quarter there were nine cases of typhus fever. No case of infectious disease came under my notice for the past eight weeks.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*. — District healthy.

LETTERKENNY; *Church Hill*.—District healthy.

MILLFORD; *Rathmullan*.—District very healthy during quarter.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. No infectious diseases during past quarter. District healthy.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. A severe epidemic of measles prevailed in the district during portion of the quarter, but, I believe, has now disappeared. No deaths registered from same.

STRANORLAR; *Killygordon*.—The water supply to village is contaminated with sewerage matter.

#### Down County.

BANBRIDGE; *Ballyward*.—District in a healthy state, except some cases of diphtheria. Sanitary state of district fair.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good.

DOWNPATRICK; *Ballynahinch*.—There have been very few deaths registered during the quarter. The district has been free from any epidemic disease.

KILKEEL; *Kilkeel*, No. 2, W.—Health of district very good.

LISBURN; *Ballylesson*.—Three deaths in infancy are recorded from gastrointestinal affections. These were all bottle-fed.

LISBURN; *Drumbeg*.—Measles, which was prevalent last quarter, has now disappeared.

LISBURN; *Saintfield*.—At the end of the quarter I had two cases of scarlet fever of a mild kind. Both made good recoveries. Otherwise health of district good.

LURGAN; *Moir*.—Again the birth-rate doubles the death-rate. There is a most extensive epidemic of measles in the district, and the infection very general. I have not pushed the vaccination at the stations on this account. No deaths, however, have occurred. Otherwise the district is free from zymotic disease, no death having occurred from such. Three deaths from cancer, two from tuberculosis. The deaths under one and over sixty years nearly account for two-thirds of all.

LURGAN; *Waringstown*.—District healthy. No epidemic. Three deaths were registered on Coroner's certificates, one having been caused by burns, and the other two by lightning. Forty or fifty other people were injured at the same time, as the lightning struck a tent in which a religious service was being held. This is the first death from lightning since I came to the district—thirty-five years ago.

NEWRY; *Donaghmore*.—District very healthy and in good sanitary condition.

NEWRY; *Rathfriland*.—No epidemic in district.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements very good. Measles prevalent in urban district. Two deaths resulted, both delicate from birth. One case of malignant scarlet fever in rural district died. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—A few cases of scarlatina have cropped up, but confined to one or two families, and a case or two of diphtheria from defective sanitation. Otherwise district very healthy.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. Health of district good. Three cases (sporadic) scarlatina in Greyabbey division—one, at childbirth, died. Protective and preventive measures duly attended to. A few cases of influenza, and general autumn colds very prevalent throughout district.

NEWTOWNARDS; *Kilmood*.—Health of district excellent.

NEWTOWNARDS; *Newtownards, W.*—The epidemic of typhoid which was in the district, and which was clearly traced to the drinking of impure water and to the eating of cockles gathered where sewage was discharged, has, I am pleased to say,

passed over. The district is now in a fairly healthy condition. Cases of scarlet fever, however, continue to show themselves, and the urgent need for pure water and sewers continues to be felt.

#### Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Health of district fairly good.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. There has been no epidemic disease during the past quarter.

IRVINESTOWN; *Clonelly*.—District healthy.

IRVINESTOWN; *Ederney*.—District healthy. A death occurred a few days ago here at the age of 106 years.

IRVINESTOWN; *Irvinestown, W.*—One death from typhus fever occurred in the Union Hospital. The patient came from Trillick, co. Tyrone.

LISNASKEA; *Derrylin*.—Sanitary condition as before.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. No infectious disease prevalent during quarter. Death-rate considerably under average.

#### Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—There has been a serious outbreak of diphtheria during quarter, with one death. Two cases of scarlet fever, and towards end of quarter whooping-cough have appeared in one village. In other respects district has been healthy.

COLERAINE; *Garvagh*.—Health of district good, and death-rate exceptionally low.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—There were a good many cases of measles during the quarter, a few cases of diphtheria, and one of scarlet fever. Otherwise the health of the district has been good.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Dungiven*.—Sanitary arrangements satisfactory. Mortality under the average. Four deaths from phthisis of persons aged respectively, 40, 31, 20, and 12 years. In three of these no evidence of heredity can be elicited. In one a sister died of same in May last,

consequently infection, there being no evidence of heredity. One child aged 2 days died of congenital hydrocephalus complicated with spina bifida, this being the third successive condition of the foetus with the same mother. The children survived the birth from two to fourteen days. I attended this woman on the three occasions, and can vouch for accuracy. Vaccination statistics a little above the average.

LIMAVADY; *Limavady, W.*—District healthy.

LONDONDERRY; *Eglinton.*—No case of cancer.

MAGHERAFELT; *Moneymore.*—An epidemic of measles of a severe form prevalent during quarter, but no death except one delicate child, who was not medically attended. Four deaths from malignant disease or cancer with no family history in any of them. One case of typhoid fever occurred traceable to impure drinking water, removed to hospital, with recovery.

#### Monaghan County.

CASTLEBLAYNEY; *Ballybay.* — No serious outbreak of epidemic disease occurred here during last quarter. Scarlatina appeared in two families in the town, but fortunately did not spread. A few cases of mumps have been treated.

CASTLEBLAYNEY; *Castleblayney, W.*—The number of tuberculous cases continues large. Five deaths under that heading have been registered during the quarter. The charitable public have erected a couple of bungalows at the workhouse for open air treatment of consumption. I have not seen any report with reference to them as yet.

COOTEHILL; *Dawsongrove.*—The sanitary condition of the district is fairly good.

MONAGHAN; *Castleshane.*—District sanitary; no epidemic of any kind.

MONAGHAN; *Emyvale.* — District healthy; no deaths from scarlatina.

MONAGHAN; *Kilmore.* — District healthy up to the last week or ten days of September, and since then there have been some cases of an influenzal type, more particularly among children. There are also during the same period a few cases of measles turning up, so there is probably an epidemic of them coming on.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements in the district are satisfactory; no epidemic has occurred since last report, and there are no circumstances affecting public health or vaccination requiring special notice.

MONAGHAN; *Scotstown.*—The district is in a good sanitary condition.

#### Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory. Measles very prevalent of mild type; no deaths.

CASTLEDERG; *Drumquin.*—The sanitary state of the district is excellent, with no infectious disease of any sort.

CASTLEDERG; *Killeter.*—State of district healthy. There was an epidemic of measles in a mild form; one death registered from same during the quarter.

CLOGHER; *Aughnacloy.*—Health of district generally good.

CLOGHER; *Fivemiletown.*—The health of the district has been very good during the quarter, and the death-rate particularly low.

COOKSTOWN; *Coagh.*—Health of district good.

COOKSTOWN; *Cookstown, W.*—The district is very healthy.

COOKSTOWN; *Pomeroy.*—This district is in a sanitary condition. One case of diphtheria reported.

COOKSTOWN; *Stewartstown.*—There have been some cases of measles and scarlatina. Four persons died from different forms of tuberculous disease; one from cancer. Vaccination postponed on account of measles and scarlatina.

DUNGANNON; *Benburb.*—Health of district good. Four cases of diphtheria during month of September.

DUNGANNON; *Caledon and Ballymagran.*—District free from infectious disease. Sanitary arrangements fairly good. Three shallow wells closed by order of sanitary authority owing to enteric fever occurring from contaminated water.

DUNGANNON; *Clonavaddy.*—District in very fair sanitary condition.

DUNGANNON; *Coal Island.*—The epidemic of measles and whooping-cough referred to in last report has now disappeared. Two cases of enteric fever reported during quarter; one removed to hospital; both died. One death from scirrhus of breast; no family history; possibly due to effect of a blow received about a year previously; the woman came to reside in the district only about two months prior to her death. No other cases of an infectious type.

IRVINESTOWN; *Trillick.*—There was one death registered at the age of 96 years, two at the age of 95, one at 92, one at 78, one at 71, and two at 70 years.

OMAGH; *Dromore*.—The sanitary state of the district is satisfactory.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—The sanitary condition of the district in general is fairly good. The village of Gortin, however, is badly off as regards its water supply. There was one case of typhoid fever during the quarter.

OMAGH; *Omagh, No. 1, W.*—Rural sanitary condition satisfactory; urban improved. In the latter, the sanitary conditions are gradually being brought into line with bye-laws. Streets much improved, and are being steam rolled. It is expected that the new water scheme will be completed during next quarter. Seven cases of scarlatina notified; one ended fatally. One case of small-pox (imported), one case of typhoid fever, and one case of puerperal septicæmia.

OMAGH; *Omagh, No. 2.*—District healthy for the past quarter; no epidemic of any kind.

OMAGH; *Sicmolecross*.—This district is in very good sanitary condition at present, very little sickness during the past quarter.

STRABANE; *Newtownstewart*.—It is probable that two other deaths should be added to those of "all forms of tuberculous disease," one, a child 1 year old, uncertified, registered as "hydrocephalus," and another, an old woman, also uncertified, registered as "chronic bronchitis."

STRABANE; *Plumb Bridge*.—District healthy. One death registered of a person aged 105 years; her husband is still alive at the age of 108 years.

#### IV.—PROVINCE OF CONNAUGHT.

##### Galway County.

BALLINASLOE; *Killaan*.—District very healthy.

CLIFDEN; *Inishbofin*.—There has been an outbreak of cerebro-spinal meningitis on the island during the quarter; there were twenty cases altogether; there were three deaths.

CLIFDEN; *Roundstone, No. 1.*—The district is free from epidemic disease.

CLIFDEN; *Roundstone, No. 2.*—The health of the district is satisfactory.

GALWAY; *Galway, No. 3 (Arran)*.—District very healthy at present.

GALWAY; *Oranmore*.—The district is in a good sanitary condition. Pneumonia is the only epidemic disease in the district. It is abating, however.

GALWAY; *Turloughmore*.—One case of cancer of lip. One person died aged 100 years, another aged 95 years.

GLENNAMADDY; *Glennamaddy, W.*—There are two deaths registered of persons at the ages of 101 and 90 years, respectively.

GORT; *Ardrahan*.—More than three-fourths of the deaths in the district are of people aged 65 years and upwards.

GORT; *Gort, W.*—Two cases of diphtheria occurred in a country family; they were removed to hospital, and the disease did not spread. The drainage and streets of Gort are not in good condition. The health of the district is good at present.

GORT; *Kinvarra*.—The health of the district is good.

LOUGHREA; *Athenry*.—The sanitary condition of the district is fairly good. During the quarter, lime was distributed by the sanitary authority to poor people in the district, chiefly in the town of Athenry, to enable them to limewash their houses. There is no contagious or infectious disease prevalent. Twelve persons aged 60 years and upwards died and were registered during the quarter, and of these one was aged 108 years.

LOUGHREA; *Bullaun*.—Five out of the ten deaths registered were of persons aged over 60 years, one being registered at 95 years.

LOUGHREA; *Woodford*.—Under the heading "tuberculous diseases," I have marked one death; this was certified. Another has been registered as probably from phthisis, in which case there was no medical attendant.

OUGHTERARD; *Cloonbur, No. 1.*—Health of district very good.

OUGHTERARD; *Cloonbur, No. 2.*—Health of district good; no infectious disease during quarter.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer.

**PORTUMNA; Eyrecourt.**—The district is in a fairly sanitary condition.

**TUAM; Abbey.**—Cattle and pigs are kept in dwelling-houses, and manure heaps too near doors.

**TUAM; Tuam, No. 1, W.**—Health of district good.

#### Leitrim County.

**BAWNBOY; Ballinamore.**—Sanitary state of district good.

**CARRICK-ON-SHANNON; Drumshanbo.**—Number of vaccinations few during the quarter owing to the prevalence of whooping-cough in the district. During the quarter eight cases of typhoid fever occurred in four families. One death occurred in the Workhouse Infirmary, Carrick-on-Shannon. The cause of death, I am informed, was due to pneumonia arising in the course of enteric fever. Origin—milk contaminated with typhoid germs. Supply of milk ceased and with it the fever.

**MOHILL; Carrigallen.**—The sanitation and health of the district have been fairly good during the quarter.

**MOHILL; Mohill, W.**—There was one case of cancer of the stomach. I made inquiries of the informant; cancer was never known in the family before. The district is in a fairly healthy state. Out of twenty-three deaths fourteen were of persons aged 60 years and upwards.

**MOHILL; Rinn.**—The district is healthy and free from contagious disease.

**MOHILL; Rowan.**—Sanitary arrangements good.

#### Mayo County.

**BALLINROBE; Cappaghduff.**—Sanitary arrangements good.

**BALLINROBE; Cong.**—Of the seventeen deaths registered twelve were of persons aged 60 years and upwards, one of which was over 90 years, four over 80, and four over 70 years. Health of district very good.

**BALLINROBE; Hollymount.**—Births under and deaths about the average. There were more primary vaccinations owing to the defaulters coming in. There were some cases of whooping-cough and lung affections in old people; otherwise the health of the district was good.

**BELMULLET; Bangor.**—The public health during quarter excellent, and nothing of special note to remark.

**BELMULLET; Binghamstown, W.**—District in a very healthy condition.

**CASTLEBAR; Castlebar, No. 1, W.**—Health of the district is particularly good. There is a marked improvement of late years in the sanitary condition—offensive manure heaps outside dwellings, and housing of cattle in dwellings are ceasing.

**CLAREMORRIS; Ballindine.**—The district is fairly healthy.

**CLAREMORRIS; Ballyhaunis.**—Health of district generally good. Five cases of pyrexia, all were sent to hospital, and are well, and at home now, no further extension of the disease. One of the uncertified deaths was assigned to carcinoma of liver. Eleven of the deaths registered had attained the ages of 80 years and upwards. Sanitation progressive.

**KILLALA; Killala, W.**—The health of the district is good, and no case of infectious disease occurred during the quarter. The sanitary condition of the dwellings is not satisfactory. Pigs and cattle are housed in the houses of poor and small farmers, and filthy cesspools with heaps of decaying refuse close to the doors.

**SWINEFORD; Foxford.**—There were twenty-one cases of successful re-vaccination during the quarter.

**SWINEFORD; Swineford, W.**—There were seven deaths registered from measles during the quarter, nine uncertified deaths and one inquest case; also one cancer case.

**WESTPORT; Achill.**—Sanitary state of district good, with the exception of overcrowding of Slievemore burial ground, and want of water at Pullagh and Achill Sound. Pertussis was very prevalent, and few children were presented for vaccination in consequence.

**WESTPORT; Ballycroy.**—The condition of this district is satisfactory, and free from any contagious disease.

**WESTPORT; Bundorragha.**—Health of district good. No infectious disease occurred during quarter.

**WESTPORT; Louisburgh.**—Sanitary condition of district very good.

**WESTPORT; Westport, W.**—There has been an epidemic of whooping-cough during the quarter. I have vaccinated (with calf lymph vaccine) many children suffering from whooping-cough. In all cases so treated improvement has followed. For the past five years I have pursued this treatment with a large measure of success.

**Rosecommon County.**

ATHLONE; *Brideswell*.—Health of the district was never so satisfactory.

BOYLE; *Ballyfarnan, No. 1*.—No epidemic. District generally healthy.

BOYLE; *Keadew*.—District healthy. Sanitary arrangements fair.

CASTLEREAGH; *Ballaghaderreen*.—There was, and is, no epidemic disease of any description, yet there have been some cases of scarlatina in more than one part of the district, which one might term of a sporadic character.

STROKESTOWN; *Roosky*.—This district is in a fairly good sanitary condition. Nearly one-half of the deaths were of persons aged 60 years and upwards.

**Sligo County.**

BOYLE; *Ballyfarnan, No. 2*.—Sanitary arrangements satisfactory. District generally healthy.

BOYLE; *Gurteen*.—District healthy.

DROMORE WEST; *Castleconor*.—There has been one death registered of a person aged 100 years.

DROMORE WEST; *Easky, W*.—Health of district good. No case of infectious disease during quarter.

SLIGO; *Ballymote*.—The district is in a healthy condition, and free from any infectious disease.

SLIGO; *Carney, No. 1*.—Sanitary condition of the district improving.

SLIGO; *Riverstown*.—District healthy.

TOBERCURRY; *Aclare*.—The health of the district is exceedingly good.

TOBERCURRY; *Coolaney*.—Sanitary arrangements satisfactory.

OFFICIAL.

---

**Marriages:**—JULY, AUG., SEPT., 1905. **Births & Deaths:**—OCT., NOV., DEC., 1905.

---

During the quarter ended 31st December last, there were registered in the 827 Registrars' Districts in Ireland 24,352 births—a number equal to an annual birth-rate of 22·2 in every 1,000 of the estimated population\*—and 17,729 deaths, representing an annual rate of 16·1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,461 persons emigrated.

In England last quarter, the birth-rate represented was 25·7 in every 1,000 of the estimated population, and the death-rate 15·0 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 over the average rate for the corresponding quarter of the ten years 1895–1904, but 0·1 below the rate for the fourth quarter of 1904. The deaths are 404 under those registered in the corresponding quarter of 1904; the death rate is 0·4 below the rate for that quarter, and 0·5 below the average for the fourth quarter of the ten years 1895–1904.

\* See page 378.

Compared with those for the corresponding quarter of 1904, the returns of pauperism, furnished by the Local Government Board, show an increase of 865 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 897 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years 1895-1904, the number of Workhouse inmates shows an increase of 1,545, and the number of persons on out-door relief an increase of 1,600, the total under both heads being 3·2 per cent. above the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·0 per cent.

The annual marriage-rate (4·7 per 1,000 of the population) represented by the marriages registered during the third quarter of 1905 is equal to the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,\* represented by the number of Marriages registered during the Quarter ended 30th September, 1905, and by the Births and Deaths registered in the Quarter ended 31st December, 1905.

\*The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (\*), page 317.

## MARRIAGES.

The marriages (5,119) registered in Ireland during the third quarter of 1905 are equivalent to an annual rate of 4·7 per 1,000 of the estimated population, being 0·2 below the rate for the corresponding quarter of 1904, and equal to the average rate for the third quarter of the ten years 1895–1904. Of the total number of marriages 3,298 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,821 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·0 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·6 per 1,000 of the members of all other religious persuasions. The rate under the former heading is equal to the average rate for the corresponding quarter of the previous ten years, that under the latter shows a decrease of 0·3. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1895–1904, and the average number for that period; also the number registered during the first, second, and third quarters of 1905.

## BIRTHS.

The number of births registered during the quarter ended 31st December last was 24,352—12,408 boys and 11,944 girls—being equal to an annual ratio of 1 in every 45·1, or 22·2 per 1,000 of the estimated population. The average number of births registered during

the corresponding quarter of the ten years 1895-1904 was 24,427, equivalent to an annual rate of 21·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 22·0 per 1,000 of the population according to the Census of 1901; Munster, 20·7; Ulster, 23·0; and Connaught, 20·6.

The highest county or co. borough birth-rate\* is 30·2 for Dublin Co. Borough, and the lowest 15·1 for Longford Co. Of the intermediate rates the highest five are—Belfast Co. Borough, 29·0; Antrim, 23·8; Kildare, 23·7; Mayo, 23·1; and Londonderry Co. and Co. Borough, 22·3. The lowest five are—King's Co., 17·1; Westmeath, 17·7; Roscommon, 17·7; Dublin Co., 18·0; and Louth, 18·4.

#### DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 17,729—8,754 males and 8,975 females—affording an annual ratio of 1 in every 61·9, or 16·1 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1895-1904 was 16·6 per 1,000.

The death-rate in Leinster was 17·5 per 1,000 of the population according to the Census of 1901; in Munster, 14·9; in Ulster, 17·0; and in Connaught, 12·2.

The county or co. borough death-rates\* range from 11·4 in Kerry, to 23·1 in Dublin County Borough. Between these rates the lowest five are—Roscommon, 11·7; Galway, 11·8; Mayo, 12·0; Fermanagh, 12·4; and Cavan, 12·7; and the highest five are—Belfast Co. Borough, 20·0; Monaghan, 18·5; Antrim, 17·4; Wexford, 17·4; and Westmeath, 17·0.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1895-1904, and the average number for that period; also the number registered during each quarter of the year 1905:—

YEAR.	Births.					Deaths.

\* See note (\*) on page 292.

**Ages.**—Of the 17,729 deaths registered last quarter, 2,148, or 12·1 per cent., were of children under 1 year old; and 7,869, or 44·4 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 88·2 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 13·1 per cent. of the total deaths registered therein; in Munster, 10·8 per cent.; in Ulster, 13·0 per cent.; and in Connaught, 9·4 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 40·9 per cent.; in Munster, to 47·3 per cent.; in Ulster, to 43·4 per cent.; and in Connaught, to 50·7 per cent. of the total deaths registered in the province.

#### HEALTH OF THE PEOPLE.

**Diseases.**—The total number of deaths from the principal epidemic diseases\* is 689, or 371 less than the number registered in the corresponding quarter of 1904, and is equivalent to an annual rate of 0·6 per 1,000 living, being 0·4 under the rate for the fourth quarter of 1904, and 0·4 below the average rate for the fourth quarter of the ten years 1895–1904.

**Small-pox.**—During the period under notice, two deaths from small-pox were recorded in the whole of Ireland. The deaths from this disease in each of the three preceding quarters were 1, 2, and 0. Of the two deaths one occurred on the 8th December in Fever Hospital, Drogheda No. 3 District. The Registrar remarked, “As far as could be ascertained, there were no primary marks of vaccination; there are 6 cases now convalescent in hospital.” The second death occurred in the Fever Hospital in Navan, to which place the patient had been brought from Painestown. The Registrar states that the disease originated from contact with a small-pox case in Drogheda. The age of the diseased was 27 years, and he was said to have been vaccinated in infancy.

**Measles.**—The deaths (69) from measles are much below the average (197) for the corresponding period of the 5 years 1900–1904. In each of the three quarters preceding, deaths from measles were 297, 266, and 115. In each of the Registrars’ Districts of Castledermot and Stradbally, in the Union or Superintendent Registrar’s District of Athy, 4 deaths from measles were registered. The same number was registered in each of the districts of Carrickfergus, in the Union of Larne, and Scotstown, in the Union of Monaghan, and in the District of Bangor, in the Union of Newtownards, 9 deaths were registered.

**Scarlet Fever.**—Deaths from scarlet fever, which numbered 31 in the September quarter of 1905, rose to 52 in the period under notice. The average number of deaths from the disease for the December quarter of the 5 years 1900–1904 is 65; in the March quarter of the year, 61 deaths were registered, and in the June quarter, 28 deaths from scarlet fever were registered. There were 3 deaths from scarlet fever for Dublin South City No. 1 District, 5 deaths for Belfast Urban No. 4 District, and 3 for the Registrar’s District of Monaghan.

\* See note (t) on page 301.

**Typhus.**—The deaths from typhus (22) are nearly equal to the average (21) of the corresponding period of the five years ended 1904. Deaths from this disease in each of the earlier quarters of the year were 12, 18, and 20. Four of the total deaths were registered in Leinster, 8 in Munster, 2 in Ulster, and 8 in the Province of Connaught. Of the 4 deaths in Leinster, 3 occurred in the District of Athlone No. 1, and one in the District of Moate, in the Union of Athlone. Of the deaths in Munster, 3 occurred in Milltown Malbay, in Ennistimon Union; 2 in Darrynane, in Cahersiveen Union; 1 in Tralee No. 1, 1 in Abbeyfeale District, in Newcastle Union, and 1 in Dungarvan Registrar's District. Of the two deaths in the Province of Ulster, one occurred in the Urban District of Belfast No. 4, and one in the Registrar's District of Carrickmacross; and of the 8 deaths appertaining to the Province of Connaught, 1 belonged to Kiltormer District, in Ballinasloe Union; 1 to Turloughmore, in Galway Union; 2 to Oughterard District, one to Keadew District, in Boyle Union, and 3 to Sligo No. 1 Registrar's District.

**Whooping-cough.**—The mortality from whooping-cough shows, as in the quarter preceding, a further decline, the deaths recorded during the quarter numbering 79, as against 95 in the September quarter, 141 in the June quarter, and 194 in the March quarter of 1905. The deaths (79) are also considerably below the average number of deaths (213) in the December quarter of the five years ending in 1904. The abstracts in this Report shows the incidence of mortality from whooping-cough in Ireland by Provinces, Counties, Unions, and Registrars' Districts.

**Diphtheria.**—Deaths from diphtheria, which had declined to 49 in the September quarter of the year, rose to 74 in the period under notice. In the March and June quarters of 1905, the deaths registered were 81 and 67 respectively. The average for the December quarter for the five years ending with 1904 was 106.

In Abstract III. it may be seen that there were 4 deaths for each of the Registrars' Districts, Dublin South City No. 1, and Belfast Urban No. 4; 3 deaths for each of the districts, Finglas and Glasnevin, part of, (Urban), Fethard, Ballycroy, and Castleconor; and in each of the following Registrars' Districts 2 deaths from diphtheria were registered during the quarter:—Borris-in-Ossory, Enniscorthy, Cork Rural No. 1, Belfast Urban No. 12, Ballybay, Clones, Drumahaire, and Ballina.

**Enteric Fever.**—The deaths from enteric fever registered in the whole of Ireland during the December quarter of 1905 numbered 128; this number is an increase of 14 over the deaths (114) in September quarter, also above the deaths in March and June quarters, which were 105 and 121 respectively. The deaths from enteric fever are, however, below the average (161) for the corresponding period of the 5 years ending 1904, and represent an annual rate of 0.12 per 1,000 of the population estimated to the middle of the year.

Of the total, 17 deaths occurred in Dublin County Borough, and 31 in the County Borough of Belfast. In Omagh No. 1 District 6 deaths were registered, and in each of Limerick Urban No. 1 District, and Boyle No. 1 District 4 deaths were registered, and in each of the districts of Navan and Larne 3 deaths were registered.

*There were, moreover, 19 deaths classified to pyrexia (origin uncertain) formerly described as simple, continued or ill-defined fever.*

**Diarrhoeal Diseases.**—The deaths in this group include those from epidemic diarrhoea, epidemic enteritis, *diarrhoea*, and dysentery, and in the December quarter now under review numbered 244 (representing an annual rate of 0·2 per 1,000 of the estimated population), as compared with 730 deaths, equal to an annual rate of 0·7 per 1,000 registered in the preceding quarter; in the March quarter of 1905, the deaths numbered 130, and in the June quarter 156 deaths were registered. The deaths registered (244) from the above-mentioned causes, are below the average number (274) registered in the December quarter of the 5 years ended 1904, by 30 deaths.

**Tuberculous Disease.**—The deaths, as returned by the Registrars, from all forms of tuberculous disease amounted to 2,292, or to nearly 13 per cent. of all deaths registered in Ireland during the quarter; or, in other words, for 8 deaths, one was due to tuberculous disease. In the June quarter the number of deaths thus returned was 2,984, equal to an annual rate of 2·72 per 1,000; in the September quarter the number of deaths was 2,348, and the annual rate per 1,000 was 2·14. The rate representing the mortality from all forms of tuberculous disease in the period under review is 2·09 per 1,000 of the estimated population.

The number of deaths from tuberculous disease appertaining to each Province, County, Union, and Registrar's District in Ireland, is given in the Abstracts I., II., III., and IV., commencing on page 316.

Several of the Registrars of deaths have forwarded notes relating to tuberculous disease; these are printed *in extenso* at the end of this Report. The Registrar of Westport has favoured me with a copy of an instructive table and diagram prepared by him, exhibiting the deaths due to *consumption* and all other forms of tuberculous disease which occurred in the Westport District during the 6 years 1900–1905, the annual average number of deaths shown for that period being 18·5. The table also gives the deaths from tuberculous disease as occurring in the Urban and Rural portions of the District, and the sexes of the deceased. The diagram shows the months in which the deaths occurred, and a curve indicates the total number of deaths during 6 years by monthly periods for all forms of tuberculous disease. It appears that the highest aggregate mortality occurred in the month of March, and the lowest in each of the months of August and December. The table also shows the percentage of deaths from all forms of tuberculous disease to the total deaths from all causes—the average percentage for the 6 years being 14·24. The remarks of the Registrar of Bellaghy, Magherafelt Union, also seen in the notes, may be repeated—“I would note the prevalence and mortality from tuberculous disease in this open country district, and ascribe a large amount of it to the neglect of the people of the most elementary principles of ventilation.”

**Malignant Disease.**—The deaths from malignant disease as returned by the Registrars, were 663 in the June quarter, 716 in the September quarter, and 775 in the period under notice. These numbers correspond to the following annual rates per 1,000 of the estimated population:—0·60, 0·65, and 0·71 per 1,000, respectively.

The deaths as returned vary from 71 in Dublin County Borough, 66 in Cork County and County Borough, 62 in Belfast County Borough,

53 in County Down, and 41 in County Antrim, to 8 in each of King's County and Sligo County, to 7 in each of the Counties of Carlow, Kilkenny, and Tipperary N.R., and 5 in the County of Longford.

**Hydrophobia.**—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in 2 districts (Drogheda No. 3 and Painestown), chickenpox in one district, measles in 37 districts, scarlet fever in 26, whooping-cough in 12, diphtheria in 18, fever in 31—typhus 6 enteric 24, and pyrexia (origin uncertain), 1—influenza in 18, mumps in 4, and erysipelas in 2 districts.

**Inquests.**—There were 468 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 38 of the total deaths registered.

In Leinster there was 1 inquest to every 34 deaths registered, in Munster 1 to 52, in Ulster 1 to 30, and in Connaught 1 to 94.

**Deaths in Public Institutions.**—Of the 17,729 deaths registered, 3,662, or 20·7 per cent., occurred in public institutions. In Leinster the percentage was 28·7, in Munster 23·7, in Ulster 15·2, and in Connaught 12·2.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1905, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	<i>Pyæmia</i> (origin uncertain).	Enteric Fever.	Diarrheal Diseases.

### URBAN DISTRICTS—continued.

[illegible]

**VACCINATION.**

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1905, there were 21,594 persons successfully vaccinated; in 2,623 cases the operation was postponed, 21 children were reported as insusceptible of vaccination, and the deaths of 1,327 unvaccinated children under 3 months old were registered, making a total of 25,565 children with regard to whom particulars as to vaccination were ascertained.

**EMIGRATION.**

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 4,461 (2,200 males and 2,261 females), being 2,287 less than in the corresponding quarter of the year 1904, and 1,528 under the average number for the fourth quarter of the ten years 1895-1904.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1904 and 1905 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1904.	1905.	In-crease.	De-crease.	1904.	1905.	In-crease.	De-crease.	1904.	1905.	In-crease.	De-crease.

\* Including 3,036 emigrants to the United States of America, viz.:—1,986 in the month of October, 735 in November, and 315 in December. Of 2,794 steerage passengers, 1,000 had their passages paid or in America.

**PRICES AND PAUPERISM.**

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1904 the average price was also 6*d.*, and in the corresponding quarter of 1895 it was 5*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* 6*d.* per cwt., being the same as the average for the corresponding quarter of the year 1904. In the fourth quarter of 1895 the average price was 13*s.* 3*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2*s.* 1*d.* to 2*s.* 6*d.* In the fourth quarter of 1904 the average prices were 2*s.* 6*d.* to 3*s.* 0*d.*, and the prices for the corresponding quarter of 1895 were 1*s.* 11*d.* to 2*s.* 9*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 47*s.* 6*d.* to 53*s.* per cwt. In the corresponding quarter of 1904 the average prices were from 45*s.* 6*d.* to 53*s.*, and in the fourth quarter of 1895 they were from 43*s.* 6*d.* to 53*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 18*s.* to 19*s.* per ton nett.

The highest price of  $2\frac{3}{4}$  per cent. Consols at the Dublin Stock Exchange for the quarter was £89 $\frac{1}{8}$ , and the lowest £88 $\frac{1}{8}$ . The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, remained at 4 $\frac{1}{2}$  per cent., to which it had been raised from 4 per cent on the 28th September.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1905 was 44,565, or 865 over the average for the corresponding period in 1904.

The average weekly number of persons receiving out-door relief during the quarter was 56,804, being 897 over the average for the fourth quarter of 1904.

Of the persons receiving in-door relief during the fourth quarter of 1905, an average number of 1,483 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1904 the average weekly number was 1,425.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1905, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

Average PRICES OF PROVISIONS.										PAUPERISM.		
PERIOD.	BREAD (4lb. Loaf.		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		No. of PERSONS RELIEVED.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the *Dublin Gazette*; and the average prices of Potatoes and Beef have been compiled from the *Dublin Journals*. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

#### THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park Dublin, during the fourth quarter of the years 1900–1905, respectively.

Latitude 53° 21' 45"–25 north; longitude 6° 20' 59"–15 west. Height above the sea 155½ feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

The mean height of the barometer during the fourth quarter of 1905 was 29.954 inches, being 0.079 over the average for the corresponding quarter of the five years 1900-1904; the highest reading (30.920 inches) was on the 12th December, at 9 P.M., air calm; and the lowest (28.856 inches) on the 26th November, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 43.6°.

The maximum temperature of the air during the quarter was 57.8° and the minimum 17.4°. The maximum heat in sun was 108.5°, and the minimum on the grass 13.3°.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 6.346 inches, being 1.037 inches under the average for the fourth quarter of the five years 1900-1904. The greatest monthly rain-fall was in November, when 3.730 inches were registered.

The wind blew on 23 days from S.W., on 21 days from W., on 6 days from N.W., on 5 days from E., on 5 days from S.E., on 4 days from S., and on 1 day each from N. and N.E., and the air was calm on 26 days at 9 A.M.

*October.*—The mean height of the barometer during this month was 30.086 inches; the highest reading (30.567 inches) was on the 11th at 9 A.M., air calm; and the lowest (29.008 inches) on the 30th, at 9 A.M., wind S.W. The mean temperature of the air was 44.8°, the maximum registered was 57.8°, and the minimum 23.2°. The 8th was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 45.9°, and of the wet bulb 43.7°. The maximum heat in sun was 108.5°, and the minimum on the grass 16.0°. The minimum on the grass was below 32° on 21 nights. The total amount of sunshine recorded was 111.9 hours, the greatest daily amount being 9.3 hours on the 6th. The maximum ozone was 0.9, the minimum 0.1, and the mean 0.5. Rain or snow fell on 17 days. The rain-fall measured 1.365 inches; the greatest amount in 24 hours was .390 inch on the 2nd.

*November.*—The mean height of the barometer during this month was 29.657 inches; the highest reading (30.246 inches) was on the 17th at 9 P.M., air calm, and the lowest (28.856 inches) on the 26th, at 9 A.M., wind S.W. The mean temperature of the air was 40.8°, the maximum registered was 54.8°, and the minimum 17.4°. The 10th was the warmest day, and the 19th the coldest night. The mean of the dry bulb was 39.5°, and of the wet bulb 38.4°. The maximum heat in sun was 86.5°, and the minimum on the grass 13.3°. The minimum on the grass was below 32° on 19 nights. The total amount of sunshine recorded was 64.3 hours, the greatest daily amount being 5.9 hours on the 8th. The maximum ozone was 0.8, the minimum 0.0, and the mean 0.5. Rain or snow fell on 20 days. The rain-fall measured 3.730 inches; the greatest amount in 24 hours was .775 inch on the 1st.

*December.*—The mean height of the barometer during this month was 30.119 inches; the highest reading (30.920 inches) was on the 12th, at 9 P.M., air calm; and the lowest (29.337 inches) on the 28th, at 9 P.M., wind E. The mean temperature of the air was 45.3°; the maximum registered was 53.8°, and the minimum 28.3°. The 7th and 25th were the warmest days, and the 10th was the coldest night. The mean of the dry bulb was 44.9°, and of the wet bulb 43.3°. The maximum heat in sun was 87.5°, and the minimum on the grass 22.0°. The minimum on the grass was below 32° on 5 nights. The total amount of sunshine recorded was 43.8 hours, the greatest daily amount being 6.6 hours on the 9th. The maximum ozone was 1.0, the minimum 0.0, and the mean 0.5. Rain or snow fell on 17 days. The rain-fall measured 1.251 inches; the greatest amount in 24 hours was .425 inch on the 27th.

**THE YEAR 1905.**

The total number of births registered in Ireland during the year 1905 (as returned by the Registrars) was 102,870, or 23.4 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 75,165, or 17.1 per 1,000. Of the 75,165 deaths, 3,572, equal to 0.8 per 1,000 living, were caused by one or other of the principal epidemic diseases.†

In the Urban Districts, which contain about one-third of the total population, the birth-rate was 29.1 per 1,000 of the population; the death-rate (all causes) 20.1, and the epidemic death-rate 1.5 per 1,000. The corresponding rates for the remainder of the country are—births, 20.5; deaths from all causes, 15.5; and deaths from the principal epidemic diseases, 0.5.

According to the returns of Vaccination furnished by the Registrars there were 89,394 successful primary vaccinations performed during the year; in 2,623 cases, *during the last quarter*, the operation was postponed; 64 children were reported during the year as insusceptible of vaccination; and the deaths of 5,795 unvaccinated children under three months old were registered.

## URBAN DISTRICTS.

TABLE VIII (a).—BIRTHS AND DEATHS registered during the YEAR 1905, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL EPIDEMIC DISEASES.†

DISEASES.—The Dublin Registration Area " consists of the City of Dublin, and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (a) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 30th December, 1905.

(n).—As the information regarding all Forms of Tuberculous Disease, Cancer, Malignant Disease, and Uncertified Deaths for the Urban Districts, as shown in Table V. June, and subsequent quarters of 1905, was not available for the March quarter, this Table has been summarised on the form of Table V. of the Report for the Quarter ended 31st March, 1905.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, typhoid, (origin uncertain), enteric fever, and diarrhoeal diseases.

‡ The rates for the total of Ireland, and those for the districts in the Dublin Registration Area, for Belfast, and Londonderry, have been calculated on the population estimated to the middle of 1905.

§ Formerly described as "Simple continued Fever."

## TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of  
W. N. Shaw, Sc.D., F.R.S.*

In compiling the following Table (pp. 314, 315), the stations have been grouped into two Districts, namely, 1. Ireland, North ; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

## LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH :—	
Malin Head, . . . . .	Meteorological Office Observer.
Donaghadee, . . . . .	Do.
Belfast, Queen's College, . . . .	John Wylie, B.A.
Armagh, The Observatory, . . . .	J. L. E. Dreyer, Ph.D.
Markree Castle, . . . . .	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point, . . . . .	Meteorological Office Observer.
IRELAND, SOUTH :—	
Dublin (City), . . . . .	Sir John W. Moore, M.D.
Birr Castle, . . . . .	J. H. Skerrett, for the Earl of Rosse, K.P.
Killarney, . . . . .	E. W. Griffin, M.D.
Valencia, . . . . .	Meteorological Office Observer.
Roche's Point, . . . . .	Do.
Waterford, . . . . .	J. N. White, Esq.

\* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee. Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwich time Roche's Point, are based on the morning observations only. They are printed in different type to distinguish them.

† The Averages are based on observations as follows:—Rainfall 35 years, 1866-1900; Temperature 30 years of Moderate and Strong wind (force 4-7), the number of observations of Calm, and the number of days of Gale.

‡ The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park and the

NOTE.—This table has been constructed for the year 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1905—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

## APPENDIX.

### REGISTRARS' NOTES.

*On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.*

*In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.*

The Registrars alone must be considered responsible for the opinions which they express.

*Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.*

#### I.—PROVINCE OF LEINSTER.

##### Carlow County.

BALTINGLASS; *Rathvilly*.—Health of district very good. The death of a woman aged 102 years registered during the quarter.

CARLOW; *Bagenalstown*.—District healthy.

CARLOW; *Clonegall*.—There has been a notable increase in the birth-rate during the quarter. A few cases of measles occurred.

CARLOW; *Fennagh and Myshall*.—The number of deaths of persons over 60 years registered during the quarter is, I think, noticeable. Two were over 100 years (as stated): one (a man) being 102 years, the other (a woman) being 104.

CARLOW; *Leighlinbridge*.—District fairly healthy.

##### Dublin County.

CELBRIDGE; *Lucan*.—District healthy. One case of triplets, males, strong and healthy, born 18th November, doing well.

DUBLIN NORTH; *Blanchardstown and Castleknock*.—An epidemic of measles occurred in past quarter, and a few cases of typhoid traced to a well.

DUBLIN NORTH; *Finglas and Glasnevin, part of*.—Gastro-intestinal troubles common among infants—due to improper feeding.

DUBLIN SOUTH; *Rathmines*.—No epidemic during quarter; district very healthy.

DUBLIN SOUTH; *Tallaght*.—Remarkably low death-rate for quarter.

##### Kildare County.

ATHY; *Castledermot*.—Measles and whooping-cough prevalent during past quarter, which accounts for small number of vaccinations.

BALTINGLASS; *Baltinglass, No. 2*.—A number of vaccinations postponed in consequence of colds and influenza amongst children, and measles and whooping-cough in early part of the quarter.

CELBRIDGE; *Celbridge, W.*—District healthy.

CELBRIDGE; *Maynooth*.—There was a severe epidemic of measles during quarter.

ENDERRERY; *Carbury*.—Two mild cases of scarlatina; origin not known.

ENDERRERY; *Rathangan, No. 1*.—One death registered during quarter from cancer of the rectum in a man aged 55; duration four years; no operation; performed, but he underwent treatment in Kildare Infirmary. A death from laryngitis of a young man aged 19 years also occurred, duration fourteen days, œdema of glottis supervening; four hours' duration. All the deaths registered during quarter were of men from 19 to 78 years.

NAAS; *Kildare*.—Sanitary condition good.

NAAS; *Naas and Carragh, W.*—Whooping-cough prevalent, but no death resulting.

##### Kilkenny County.

CALLAN; *Callan, W.*—District very healthy.

CALLAN; *Kilmaganny*.—A large number of children suffered from various pulmonary affections during the quarter.

CASTLECOMER; *Ballyragget*.—No epidemic diseases during quarter. Sanitary arrangements very fair.

CASTLECOMER; *Castlecomer, W.*—There were two cases of death from phthisis pulmonalis. The district at present is in a fairly healthy state.

KILKENNY; *Tullaroan*.—District very healthy.

NEW ROSS; *Dysartmoon*.—The most striking fact in this district is the prevalence of pulmonary tuberculosis.

URLINGFORD; *Urlingford, W.*—Health of the district good. No epidemics, except mumps, which has been very prevalent amongst a number of children some time ago, but has now passed away.

WATERFORD; *Kilmakeloge*.—The deaths registered during the quarter included one man aged 70 years, and four women aged 63, 78, 78, and 86 years, respectively.

#### King's County.

BIRR; *Birr, W.*—There were five cases of enteric fever, one case of diphtheria, and one of scarlatina reported to me during this quarter. Measles prevailed very much in both the urban and rural portions of the district. The disease was generally of a mild type, and so far there is only one death recorded from it, although the epidemic was widespread.

BIRR; *Ferbane*.—One case of enteric fever during quarter. Sanitary condition of district fair.

BIRR; *Killym*.—There were no deaths registered during the quarter. An epidemic of measles took place in the district during the quarter, and several adults suffered from this disease.

BIRR; *Kinnitty*.—One case of erysipelas, one of typhoid fever (imported from Birr). Health of district fairly good. Sanitary state fair. Mild epidemic of measles in portion of district. Vaccination cases all came in except four postponed.

ROSCREA; *Roscrea, No. 2*.—With the exception of slight colds the district is healthy. Sanitary conditions good.

TULLAMORE; *Clara*.—This district has been free from any infectious disease during quarter.

TULLAMORE; *Killoughy*.—The district is very healthy. No outbreak of infectious disease during the year.

TULLAMORE; *Philipstown*.—District fairly healthy. One death registered at the age of 100 years.

#### Longford County.

BALLYMAHON; *Abbeyshrule*.—The sanitary arrangements are good. There was one case of scarlet fever, but the disease did not spread. District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee*.—The district is in good sanitary condition. Towards the end of the quarter diphtheria occurred in one family.

GRANARD; *Granard, W.*—District in good sanitary condition. No epidemic diseases.

GRANARD; *Scrabby, No. 2*.—The district continues in a healthy condition. The death of a man aged 104 years was registered.

#### Louth County.

ARDEE; *Ardee, W.*—There were five deaths from cancer registered in the district during the quarter—one being cancer of colon, one of stomach, one of liver, one of upper jaw, and one of breast.

ARDEE; *Castlebellingham*.—District very healthy. Sanitary condition of district good.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 3, W.*—During the quarter we were threatened with an outbreak of small-pox. The sanitary authority adopted the strictest precautions of preventing the disease from spreading with very satisfactory results.

DROGHEDA; *Termonfeckin*.—The health of the district has been good for the quarter. No disease of an epidemic or infectious nature prevalent.

DUNDALK; *Barronstown*.—Pertussis prevalent during latter part of quarter, chiefly confined to one townland.

DUNDALK; *Carlingford*.—One village in an unsanitary state for the want of a water supply.

DUNDALK; *Dromiskin*.—District in very healthy state.

DUNDALK; *Dundalk, W.*—Whooping-cough prevailed during the quarter. Four deaths have occurred from this disease, three of which were registered in the last week of the quarter. The epidemic is on the decline.

DUNDALK; *Ravensdale*.—Health of district very good.

#### Meath County.

ARDEE; *Collon, No. 2*.—District free from zymotic disease.

ARDEE; *Drumcondra*.—District free from zymotic disease.

DROGHEDA; *St. Mary's*.—The health of the district is fairly good.

**DROGHEDA; Stamullen.**—District in a healthy state during quarter.

**KELLS; Kells, W.**—Measles of a mild type was prevalent during the last month of the quarter.

**KELLS; Kilskeer.**—Sanitary condition of district good.

**KELLS; Nobber.**—The health of the district is eminently satisfactory; the deaths registered, with two exceptions, being due to longevity and consequent natural debility. The average age of ten persons out of twelve registered was 74·3 years.

**NAVAN; Painestown.**—We had one case of small-pox originating in contact with a small-pox case in Drogheda. The patient died in the fever hospital in Navan. The age of the patient was 27 years. He was said to have been vaccinated in infancy.

**OLDCASTLE; Oldcastle, W.**—A number of children were affected with measles in the town of Oldcastle and surrounding districts, which was of a very mild type.

**TRIM; Athboy.**—Sanitary condition of district good. Measles prevalent; no fatal case.

**TRIM; Innfield.**—A mild type of measles was prevalent during the quarter. A herd's family got scarlatina, but as they were isolated it did not spread.

**TRIM; Summerhill.**—District generally healthy. No diseases of an infectious nature have been noticed.

#### Queen's County.

**ABBEYLEIX; Abbeyleix, W.**—An epidemic of mild measles in the village.

**ABBEYLEIX; Ballinakill.**—Health of district good. The death of a man was registered aged 102 years.

**MOUNTMELICK; Clonaslee.**—Pneumonia and other pulmonary affections were very prevalent in the Clonaslee dispensary district during the quarter.

**MOUNTMELICK; Clonygowan, No. 1.**—District healthy.

**MOUNTMELICK; Mountrath.**—District healthy.

**ROSCREA; Borris-in-Ossory.**—The health of this district had been very good to end of December; diphtheria broke out, and two deaths occurred out of six cases, and one suspected one. Two cases of scarlatina were also reported in another part of the district. The remaining cases of diphtheria are doing well to date.

#### Westmeath County.

**ATHLONE; Glassan.**—Deaths of old people aged 85, 80, 79, 73, and 70 years, respectively, were registered during the quarter.

**GRANARD; Street, No. 1.**—In the early portion of quarter a few cases of scarlatina (light) occurred; the authorities, however, took stringent measures, with the happy result that the malady, which hovered around this district since last May, seems to have disappeared.

**MULLINGAR; Ballynacarrigy.**—Health of district fair. Pulmonary tuberculosis claims more than its share of deaths of persons under sixty years of age, it being responsible for dissolution of all the young adults registered.

**MULLINGAR; Castletown Geoghegan.**—There was only one case of zymotic disease in the district (typhoid); the patient recovered.

**MULLINGAR; Killucan.**—The health of the district is good, and at present free from all forms of infectious diseases.

**MULLINGAR; Milltown.**—Compared with the corresponding quarter of 1904, there is an increased birth and death-rate; but the number of deaths is nearly double during the present quarter; half the number, however, were very old men who died of senile decay. Tuberculous lung disease and cancer each accounted for one death; there were no fever cases, and no vaccination defaulters.

**MULLINGAR; Mullingar, W.**—Health of this district fairly good; a few cases of diphtheria—about seven—all recovered in hospital where they were removed.

#### Wexford County.

**ENNISCORTHY; Enniscorthy, W.**—Eleven deaths from tuberculosis occurred in the district, nine appertaining to the urban, and two to the rural portion of the district.

**ENNISCORTHY; Newtownbarry.**—Eighty per cent. of the deaths registered during the quarter were aged either under one year or above sixty years.

**NEW ROSS; New Ross, W.**—District appears healthy. No sickness of serious nature around.

**NEW ROSS; Templeludigan.**—The number of vaccination defaulters in the year 1904 was eight, and in 1905, sixteen.

**WEXFORD; Bannow.**—Whooping-cough has broken out again in district.

**WEXFORD; Crossabeg.**—District very healthy.

**Wicklow County.**

BALTINGLASS; *Baltinglass, No. 1, W.*—A number of vaccinations postponed in consequence of influenza amongst children, and infants, and measles and whooping-cough in early part of the quarter.

BALTINGLASS; *Kiltegan.*—It is somewhat remarkable that two deaths have occurred in same locality from diabetes, and although the nature of the disease is uncertified, I think there can be no doubt of the accuracy of the nomenclature in these cases, as the informant said in each case patients had been medically treated for that disease some-time ago, and one of the symptoms was "unquenchable thirst."

RATHDOWN; *Delgany.*—The health of the district has been good for the past quarter.

RATHDRUM; *Annamoe.*—District healthy during the quarter.

SHILLELAGH; *Tinahely.*—Health of district very good.

**II. PROVINCE OF MUNSTER.**

**Clare County.**

BALLYVAGHAN; *Ballyvaghan, W.*—District maintains its very healthy character.

CORROFIN; *Corrofin, W.*—Health of district very good.

ENNIS; *Crusheen.*—The sanitary state of the district is pretty fair. No epidemic in the district.

ENNIS; *Ennis, No. 2.*—District healthy.

ENNIS; *Newmarket.*—The health of the district has been very good during the quarter just ended.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory.

ENNISTIMON; *Roadford.*—District very healthy.

KILLADYSERT; *Labasheeda.*—District healthy. Sanitation good.

KILRUSH; *Carrigaholt.*—The health of the district is very good, and rate of mortality very low, much below the average for years past.

KILRUSH; *Kilkee.*—The sanitary arrangements are fairly satisfactory.

KILRUSH; *Kilrush, W.*—The district has been free from serious infectious disease. Influenza of a mild type has been prevalent. It has been followed in many cases by catarrhal jaundice, of which there has been quite an epidemic.

LIMERICK; *Bridgetown.*—The district is in a good sanitary condition.

LIMERICK; *Coolacasey.*—The sanitary condition of the district is satisfactory.

SCARRIFF; *Annacarriga.*—District very healthy.

SCARRIFF; *Feakle.*—Health of district good.

SCARRIFF; *Mountshannon, W.*—One case of fever occurred in my district during quarter. District otherwise healthy.

TULLA; *Quin.*—The sanitary arrangements in the district are very fair

**Cork County and County Borough.**

BANDON; *Inishannon.*—Whooping-cough has occurred in part of my district. The general health has been fairly good.

BANTRY; *Durrus and Kilerohane.*—District very healthy. No infectious diseases.

BANTRY; *Glengarriff.*—District in a fairly sanitary condition at present. Pneumonia very prevalent during the quarter.

BANTRY; *Kealkill.*—Sanitary condition of district is fairly good. No case of cancer during quarter.

CASTLETOWN; *Castletown, W.*—District healthy.

CASTLETOWN; *Kilcatherine.*—District healthy.

CORK; *Ballincollig.*—District healthy.

CORK; *Carrigaline, No. 1.*—Never knew district so healthy at this time of year.

CORK; *Dripsey.*—There were two deaths from pulmonary phthisis, and one from tubercular meningitis.

CORK; *Queenstown, No. 1.*—There was one death from carcinoma of liver, and one from carcinoma of throat.

CORK; *Queenstown, No. 2.*—There was one death from cancer of tongue, and one from carcinoma of liver.

CORK; *Riverstown.*—A few cases of scarlatina and measles occurred during past quarter.

DUNMANWAY; *Dunmanway, W.*—District healthy. No epidemic prevalent. One death registered from typhoid fever. I cannot tell the cause of it. One case of cancer, and one of phthisis.

KANTURK; *Kanturk, W.*—District healthy.

KILMALLOCK; *Charleville.*—The district is very healthy.

KINSALE; *Ballyfeard*.—Health of district fairly good. One death at 86, and one at 93 years registered.

MALLOW; *Ballyclogh*. — District healthy.

MALLOW; *Buttevant*.—The district has been free from epidemic disease during the past quarter. The sanitary condition is fairly satisfactory.

MALLOW; *Kilshannig*.—There were two deaths from tuberculous disease, and one from cancer registered during quarter.

MALLOW; *Rahan*.—District has been very healthy during past quarter.

MIDDLETON; *Aghada*.—One case of phthisis registered, an invalid from Navy. One case of cancer of oesophagus.

MIDDLETON; *Middleton, No. 2*. — District healthy.

MIDDLETON; *Walstownmore, East*.—District healthy at the present time.

MITCHELSTOWN; *Kildorrery*.—With the exception of one case of measles, there was no epidemic disease during the quarter. One village is in a most unsanitary state now, no drainage of any sort, only what nature provides.

SKIBBEREEN; *Dromdaleague*.—No death from cancer was registered.

SKULL; *Goleen*.—Influenza was prevalent in the early part of the quarter. There is practically no water supply in one village; this could be remedied at a very trifling cost.

### Kerry County.

CAHERSIVEEN; *Darrynane*.—During the early part of the quarter a further series of typhus cases cropped up, being all confined to three families. From the first outbreak twelve cases came under my observation, two of whom succumbed to the disease. The district is now free from the disease, and in a fairly sanitary condition.

CAHERSIVEEN; *Glanbehy*.—Eighteen of the deaths registered are certified. Sanitary state of district good.

CAHERSIVEEN; *Valencia*.—The ages of three of the persons whose deaths were registered are 60, 87, and 96 years, respectively.

DINGLE; *Anascaul*.—One case of typhus fever has recently appeared. Precautions have been taken as far as possible against its spread. The district is otherwise healthy.

DINGLE; *Castlegregory*.—I am glad to state the district is in a healthy state.

DINGLE; *Dingle, W*.—The district has been very healthy for the last three months.

KENMARE; *Tuosist*.—Of the four deaths registered, one at 95 years and one at six months were from "natural causes." Of the other two, one, a girl aged 20 years, and a man aged 27 years, were registered respectively as—"Hanging, found dead," and "Unknown, found dead."

KILLARNEY; *Coom*.—District healthy during the past quarter. Pneumonia prevalent during the last month of quarter.

KILLARNEY; *Killarney, No. 1, W*.—No infectious disease in district during quarter.

KILLARNEY; *Milltown*. — District healthy. Sanitary condition good. No contagious or infectious disease prevalent.

LISTOWEL; *Ballyhorgan*.—Sanitary state of district good.

LISTOWEL; *Ballylongford*.—Health of district fairly good, with the exception of one death from typhoid; spread of disease was checked by precautions. Vaccinations for quarter very good. Sanitary condition of Ballylongford not so good.

LISTOWEL; *Listowel, W*.—District free from infectious diseases.

TRALEE; *Brosna, No. 1*.—District healthy.

TRALEE; *Castlemaine*. — District healthy. Vaccination fairly well attended to.

TRALEE; *Kilgobban*.—One death registered during the quarter at the age of 101 years, another at 91 years. Information received from authentic sources. District is healthy at present.

TRALEE; *Tralee, No. 2*.—There have been two deaths from cancer; one cancer of lower jaw—male—aged 65, one cancer of uterus—female—aged 42 years.

### Limerick County and County Borough.

KILMALLOCK; *Bruree*.—Influenza of a mild type was present during the entire quarter. Had a few cases of chickenpox. Registered one death (male) aged 93 years.

KILMALLOCK; *Hospital*. — District healthy.

KILMALLOCK; *Kilmallock, W*.—Epidemic catarrh and bronchitis of a mild type prevalent during last month of quarter.

LIMERICK; *Annacotty*.—The sanitary arrangements in the district are very fair. There are, however, some dilapidated houses. There was one case of enteric fever which was sent to hospital.

LIMERICK; *Limerick, No. 3.*—During the quarter the health of the district has been good, and the sanitary arrangements, except as to the cleansing of the streets and lanes, have been fairly satisfactory. There have been twenty-three deaths of persons aged 60 years and upwards, of whom five are certified as having died of senile decay. Five deaths from phthisis pulmonalis, two from tubercular disease, three from pneumonia, two from broncho-pneumonia nine from bronchitis, two from malignant disease, one from cancer, one from facial erysipelas, and one from meningitis.

LIMERICK; *Moroe.*—Sanitary condition of district fairly good. Vaccination up-to-date.

LISTOWEL; *Glin.*—The public health was fairly good in district during the quarter. Pulmonary tuberculosis is responsible for one death, and cancer or malignant disease caused two. There is only one death uncertified, that of a child aged 17 days. The cause of death in that case was due, it is alleged, to convulsions.

MITCHELSTOWN; *Galbally.*—Sanitary state of district fair.

NEWCASTLE; *Ardagh.*—The sanitary state of the district is pretty fair. No epidemic in district.

NEWCASTLE; *Feenagh.*—The health of the district is good.

NEWCASTLE; *Newcastle, W.*—District healthy.

RATHKEALE; *Askeaton.*—The district was in fairly good sanitary condition during the past quarter. There was no case of contagious disease. Tuberculous disease with diabetes caused one of the deaths.

RATHKEALE; *Pallaskenry.*—The sanitary arrangements in the district are fairly good.

RATHKEALE; *Rathkeale, No. 1, W.*—Deaths, twenty-two. Births, thirteen. The birth-rate is exceptionally low. The district was free from any zymotic disease, and had exemption also to a great extent from ordinary illness. The majority of the deaths were due to old age. Fourteen were over 60 years of age. Twelve died in the Union Hospital, and only ten belonged to the district proper. Three died from tubercular disease.

RATHKEALE; *Rathkeale, No. 2.*—My district was in a healthy condition, and free from all contagious diseases, with the exception of one case of puerperal fever.

TIPPERARY; *Grean.*—Five cases of enteric fever occurred during the quarter, four of which were removed to hospital.

#### Tipperary County, North Riding.

BORRISOKANE; *CloghJordan.*—Of the five deaths registered, four were aged 60 and upwards. One was 101 years, a second 96 years, a third 90 years, and the fourth 76 years. These four deaths were uncertified. One death was certified as phthisis.

BORRISOKANE; *Terryglass.*—District healthy. Two cases of diphtheria. A death was registered of a woman aged 105 years.

NENAGH; *Nenagh, W.*—One case of diphtheria occurred in military barracks. Isolation, disinfection, and removal to hospital were carried out. No other cases since.

NENAGH; *Newport.*—No epidemic of any infectious disease occurred during quarter.

NENAGH; *Portroe.*—District healthy.

NENAGH; *Silvermines.*—One case of cancer, and one of pulmonary tuberculosis registered; both certified.

THURLES; *Moyne.*—District healthy. No disease.

#### Tipperary County, South Riding.

CALLAN; *Ballingarry.*—The health of the district is good.

CALLAN; *Mullinahone.*—The sanitary condition of district fairly good. No disease prevalent. Vaccination fairly attended to. One death registered caused by tubercular meningitis, and one by cancer.

CARRICK-ON-SUIR; *Garrangibbon.*—This is the only quarter during the 17½ years I am in charge of the district that there were no deaths registered, and, as far as I am aware, there is only one case to be registered. There was one case of enteric fever, which was removed to hospital.

CASHEL; *Cashel, W.*—Owing to a mild outbreak of scarlatina, vaccinations had to be abandoned during quarter.

CASHEL; *Killenarule.*—No deaths from infectious diseases during the last quarter.

CASHEL; *Kilpatrick.*—District free from zymotic disease.

CLOGHEEN; *Caher.*—The sanitary state of the district is very good.

CLOGHEEN; *Clogheen, W.*—District healthy.

CLONMEL; *Kilsheelan, No. 1.*—Some cases of influenza and pulmonary tuberculosis.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District very healthy.

TIPPERARY; *Tipperary, W.*—The district has been in a healthy condition during quarter.

URLINGFORD; *Kilcooly*.—The district has been very healthy during quarter, with the exception of one case of enteric fever.

### Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—The sanitary condition of the district is fairly good.

CLONMEL; *Kilsheelan, No. 2*.—No case of zymotic disease.

DUNGARVAN; *Dungarvan, W.*—There were some cases of scarlatina of a mild type in urban portion of district during past quarter. Vaccination was well attended to.

KILMACTHOMAS; *Bunmahon*.—The district is healthy and free from zymotic diseases.

LISMORE; *Ballyduff*.—Sanitation, vaccination, and general health of district very satisfactory.

WATERFORD; *Waterford Urban, No. 1, W.*—The sanitary arrangements in parts of the district are bad. There are some overcrowded and dirty tenement houses in the district—a source of danger to the public health. The district is free from infectious disease, excepting tuberculosis, which is very prevalent.

WATERFORD; *Woodstown*.—The district is in good sanitary condition.

YOUGHAL; *Ardmore*.—Five cases of scarlet fever.

## III. PROVINCE OF ULSTER.

### Antrim County.

ANTRIM; *Crumlin*.—A comparatively high birth-rate has been associated with a low death-rate this quarter.

ANTRIM; *Doagh*.—There have been very few cases of infectious disease during the quarter, with the exception of measles, of which there were numerous cases of a mild type in some parts of the district. The sanitary condition of the district, as a whole, is average.

ANTRIM; *Randalstown*.—One death from diphtheria registered during the quarter. Health of district at present good.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. No epidemic disease.

BALLYCASTLE; *Cushendall*.—One village is in a very insanitary state, especially the backyards, and no improvement can be made in these until a proper water and sewerage system is established.

BALLYMENA; *Ballymena, W.*—A good many cases of influenza, and also of erysipelas, occurred during the quarter.

BALLYMENA; *Broughshane*.—Health of the district excellent. Sanitary condition fair.

BALLYMENA; *Clogh*.—District fairly healthy, with the exception of a few cases of epidemic sore throat, from which there were no deaths.

BALLYMENA; *Galgorm*.—District very healthy during the quarter. One death registered at 96 years.

BALLYMENA; *Portglenone*.—The health of the district is good.

BALLYMENA; *Toome*.—Sanitary condition of the district satisfactory.

BALLYMONEY; *Dervock*.—During the past quarter there has been an extensive epidemic of mumps in the district.

BELFAST; *Belfast Rural, No. 4*.—Measles has been very prevalent in the district.

LARNE; *Ballycarry*.—Some cases of typhoid fever in the district due to use of polluted water. A few cases of scarlet fever, no deaths therefrom.

LARNE; *Waterfoot*.—Sanitary arrangements in the district are excellent.

LISBURN; *Dunmurry*.—The sanitary condition of this district is very good. There is no epidemic of any kind.

LISBURN; *Glenavy*.—The only feature of this quarter's return is the large average of deaths without apparent cause, no epidemic of any kind being present.

LISBURN; *Knocknadona*.—The sanitary condition of this district is good. No death from cancer was registered during the quarter.

LISBURN; *Lisburn, W.*—Three of the deaths under the heading "All forms of tuberculous disease," were caused by tubercular meningitis, and eight by pulmonary phthisis. In the two cases of cancer, the informants stated that there was no history of cancer in family.

LURGAN; *Aghalee*.—Measles diminished the number of vaccinations.

**Armagh County.**

ARMAGH; *Blackwatertown*.—The death from a malignant disease was a case of sarcoma of jaw.

ARMAGH; *Markethill*.—The district has been very healthy during the past quarter.

ARMAGH; *Rich Hill*.—Health of district good.

BANBRIDGE; *Tanderagee*.—The case of malignant disease registered was that of the fourth member of one family. The father and three sons all certified as having died of cancer.

LURGAN; *Lurgan, No. 1, W*.—The district has been very healthy during quarter. Only two cases of infectious disease were notified, both scarlatina, of which one proved fatal.

LURGAN; *Lurgan, No. 2*.—This district is in a fairly good sanitary condition, and free from any infectious disease.

NEWRY; *Forkill*.—The district is free from any infectious disease.

NEWRY; *Mullaghglass*.—District healthy.

**Belfast County Borough.**

BELFAST; *Belfast Urban, No. 11*.—The health of the district for the quarter has been very satisfactory.

**Cavan County.**

BAILIEBOROUGH; *Bailieborough, W*.—District healthy.

BAWNBOY; *Ballyconnell, W*.—There is an epidemic of whooping-cough in the district.

CAVAN; *Ballyhaise*.—District in good sanitary condition.

CAVAN; *Bellananagh*.—There were four cases of scarlet fever in the quarter.

CAVAN; *Killashandra*.—No death from cancer was registered during the quarter. No epidemic during the quarter. District healthy.

COOTEHILL; *Tullyvin*.—District healthy. One death registered at 94 years of age. Though the deaths of males and females were almost equal, the males were 74 per cent. of the total births registered during the quarter.

ENNISKILLEN; *Holywell, No. 2*.—The sanitary condition of the district is fairly good.

GRANARD; *Scrubby, No. 1*.—The sanitary condition of the district is good.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

**Donegal County.**

BALLYSHANNON; *Ballintra*.—District healthy. Sanitary arrangements fairly good, but bad water supply.

BALLYSHANNON; *Ballyshannon, W*.—There are 336 cases of children over 3 months who were not presented for vaccination. No certificate of unfitness was given as far as I know.

DONEGAL; *Dunkineely*.—Health of district good. No epidemic of any kind. Sanitary condition improving—the parish council has done good work in this respect. Male birth-rate two and two-third times the female—a very unusual disproportion. Death-rate less than half the corresponding quarter in 1904.

DONEGAL; *Mountcharles*.—District healthy.

DONEGAL; *Pettigoe*.—Influenza prevalent during quarter, and of a pulmonary type. Measles has also appeared in my private practice.

DUNFANAGHY; *Crossroads*.—Measles has been prevalent during the quarter, mostly of a mild type.

GLENTIES; *Ardara*.—There was a number of cases of pneumonia during the quarter. The sanitary arrangements are fairly good.

GLENTIES; *Carrick*.—The district is in fairly good sanitary condition. There has been no epidemic of any sort during the quarter.

GLENTIES; *Doochary*.—District healthy.

GLENTIES; *Dunglow, No. 1*.—I found it impossible to trace the source of the solitary case of diphtheria. This was the only case of infectious disease that occurred during the quarter, except one of puerperal fever, which recovered.

GLENTIES; *Dunglow, No. 2*.—An epidemic of measles broke out in Arranmore Island, nearly all the inhabitants under 19 years of age, and some over, being affected. The number of cases totalled about 500. The epidemic was characterised by severe pharyngitis, and in some cases, laryngitis with absence of bronchitis. Efficient nursing accounted for absence of chest complications.

GLENTIES; *Killybegs*.—Health of district is good. Sanitary condition, is, on the whole, satisfactory.

INISHOWEN; *Buncrana*.—Whooping-cough prevalent during quarter, necessitating postponement of vaccination. District otherwise healthy.

INISHOWEN; *Carndonagh, W*.—District fairly healthy during the quarter.

INISHOWEN; *Clonmany*.—Health of district good.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moiville*.—District healthy. No sickness, except mumps of a mild type.

LONDONDERRY; *Kilderry*.—Three cases of diphtheria. All recovered. Health of district good.

MILLFORD; *Fanad*.—District healthy.

MILLFORD; *Rathmullan*.—There were three cases of enteric fever during the quarter—one of which died. Fortunately it did not spread owing to prompt measures being taken to stamp it out.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. No infectious diseases during quarter. Influenza prevalent.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. Of the deaths registered, the majority are of advanced age.

#### Down County.

BANBRIDGE; *Ballyward*.—Sanitary state of district good. No epidemic disease at present.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good.

DOWNPATRICK; *Ballynahinch*.—There have been numerous cases of influenza, and also three cases of scarlatina of a mild type during the quarter.

DOWNPATRICK; *Downpatrick, W.*—Four deaths attributed to influenza. Some of the primary vaccinations were of children born out of the district. Some cases of diphtheria during quarter, but no deaths.

DOWNPATRICK; *Killyleagh*.—The health of the district is good. The death-rate is lower than the average for the season. There is no epidemic. Of the twenty-two deaths registered, ten were aged 60 years and upwards, and five below one year.

DOWNPATRICK; *Portaferry*.—The health of this district was good during past quarter. Sanitary condition satisfactory.

KILKEEL; *Kilkeel, No. 2, W.*—Sanitary state of district good. This past quarter has been remarkably healthy. Vaccination well carried out.

LISBURN; *Ballylesson*.—Pneumonia has been prevalent and fatal, especially among children, three of these having been rapidly carried off.

LISBURN; *Drumbeg*.—Births under the average. Deaths about the average. District free from infectious disease.

LISBURN; *Saintfield*.—During last quarter I had slight epidemic of scarlet fever of a mild type. All made good recoveries.

LURGAN; *Moir*.—No death from cancer. The extensive epidemic of measles which has been in the district for the past two quarters has completely disappeared. Only two deaths were registered from that cause during the whole time of the visitation. Sanitary state of the district is good.

LURGAN; *Waringstown*.—District healthy. No epidemic disease present.

NEWRY; *Donaghmore*.—District very healthy. Sanitary matters good.

NEWRY; *Rathfriland*.—Births below average. Deaths about average. Scarlatina of a mild type is in one quarter of the town.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. Measles prevalent during quarter, but almost stamped out. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—Health of district now very good, and we have got rid of the scarlatina epidemic. General sanitary arrangements improving.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. Scarlatina in sporadic form was present in the district during month of October, since when none was seen or reported as being present. In November and December measles was present in Greyabbey in epidemic form—now ceased. Two cases of enteric fever reported—one, in October, from contact, died. The other reported in November, was removed to hospital and recovered. Influenza present throughout the district, especially in November and December.

NEWTOWNARDS; *Newtownards, W.*—There has been a good deal of measles and whooping-cough in the district. The want of proper sewers and pure water continues to be felt. I believe there now is a definite prospect of our getting both.

#### Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

CLONES; *Newtown Butler*.—Very little sickness for last three months. A localised epidemic of mild measles, hardly needing medical supervision.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—The health of the district is very satisfactory. An epidemic of measles was prevalent amongst children during the last month of quarter. Very few of the parents had the doctor called in. No deaths were registered from the disease, except one.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good.

IRVINESTOWN; *Clonelly*.—Influenza of a pulmonary type prevailed. Measles appeared late in December.

IRVINESTOWN; *Ederney*.—Measles has been prevalent in this district during past three months, but no deaths from same. The local schools were closed on account of this epidemic.

LISNASKEA; *Derrylin*.—The percentage of entries of certified deaths is steadily increasing. The 70 per cent. certified during the present quarter is exceptionally high. Of the last 106 entries the percentage is 39·44. The sanitary condition of the district remains as before. Measles and influenza were present, but no deaths resulted.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. No infectious disease prevalent during quarter.

#### Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—Health of district good.

COLERAINE; *Garvagh*.—Health of district particularly good. One mild case of scarlatina during the quarter, which did not spread.

COLERAINE; *Kilrea*.—District healthy. One death was registered as due to scarlatina, but proper sanitary precautions were taken, and there was no further spread of the disease.

COLERAINE; *Portstewart*.—The health of the district is good.

LIMAVADY; *Bellarena*.—Six cases of scarlet fever—of a mild type—and two cases of diphtheria have come under my observation during quarter.

LIMAVADY; *Dungiven*.—Sanitary condition satisfactory. Births, average. Deaths under average. Majority attributable to senility. Two deaths from phthisis; in one a history of heredity; other not. Vaccinations above the average.

LIMAVADY; *Limavady, W.*—District healthy, and free from infectious or contagious disease.

LONDONDERRY; *Lower Liberties*.—One case of diphtheria, which died before I saw it.

MAGHERAFELT; *Bellaghy*.—I would note the prevalence and mortality of tuberculous disease in this open country district, and ascribe a large amount of it to the neglect by the people of the most elementary principles of ventilation.

MAGHERAFELT; *Moneymore*.—Health of district was good during quarter. No

epidemic or outbreak of any infectious disease, except three cases of scarlatina which occurred in one family on 30th December, and were removed to hospital. No death registered from cancer or tuberculous disease.

#### Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Health of district good. One death from typhus occurred in fever hospital which came from another district.

CARRICKMACROSS; *Donaghmoyne*.—Typhus fever appeared in two houses (originated in one from poverty and uncleanliness, assisted by want of proper ventilation and light, and transmitted to second from first evidently). Disease at present seems under control, as there was no new case for over one month.

CASTLEBLAYNEY; *Ballybay*.—Vaccination was well attended to during the quarter.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district fairly good.

MONAGHAN; *Castleshane*.—The district is sanitary. There is no epidemic.

MONAGHAN; *Kilmore*.—Measles and influenza are both prevalent in the district.

MONAGHAN; *Monaghan, W.*—The sanitary condition of the district is satisfactory and well looked after. There has been no epidemic of any description during the past quarter.

MONAGHAN; *Scotstown*.—There has been an epidemic of measles in the district for the past month, with four deaths; otherwise the district is in a healthy condition.

#### Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory; measles very prevalent past quarter; no deaths from it.

CASTLEDERG; *Drumquin*.—The sanitary state of the district is satisfactory, with no infectious diseases of any sort.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District free from infectious disease, except specific parotitis, which is epidemic.

CLOGHER; *Clogher, W.*—The water supply of Clogher is very defective. We could have a good supply from near springs, at very little cost.

CLOCHER; *Fivemiletown*.—The health of the district was pretty good during the quarter.

COOKSTOWN; *Pomeroy*.—The district is in a sanitary condition. One case of diphtheria and three cases of enteric fever occurred during quarter.

COOKSTOWN; *Stewartstown*.—The district during the last quarter has been very healthy.

DUNGANNON; *Benburb*.—Sanitary condition of district good. Four cases of diphtheria during quarter.

DUNGANNON; *Caledon and Ballymagran*.—The health of people generally good; with the exception of seven cases (all members of one family) of typhoid fever, no infectious disease in district.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coal Island*.—An isolated case of enteric fever occurred during month of November; patient removed to hospital; no further outbreak of an infectious nature. One death from scirrhus carcinoma of stomach; no family history, but I am informed that the previous owner of the house in which the death took place died in it about twenty-five years ago of cancer of the stomach. Bronchitis among children prevalent at present.

IRVINESTOWN; *Trillick*.—There were eleven deaths registered at the age of 60 years and upwards. One, reached the age of 86, one 85, one 82, one 78, and three 70 years.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are very satisfactory. No epidemic or other diseases are at present prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—An epidemic of typhoid fever has broken out in the district. Cases are still occurring, and I understand there have been six or seven deaths.

OMAGH; *Omagh No. 1, W.*—Sanitary condition of urban district improved. Streets are much improved. The new water scheme is approaching completion. Three cases of scarlatina were notified during the quarter; otherwise health of district has been satisfactory. Vaccinations below average.

OMAGH; *Omagh, No. 2*.—The district was fairly healthy for the past three months, with the exception of three cases of typhoid which were removed to hospital; all recovered.

OMAGH; *Sixmilecross*.—The district is in a very good sanitary condition at present. I regret to have to report one case of typhus fever, which is now convalescent.

#### IV.—PROVINCE OF CONNAUGHT.

##### Galway County.

CLIFDEN; *Rinville*.—No vaccinations were performed owing to the inclemency of the weather.

CLIFDEN; *Roundstone, No. 1*.—A few cases of mild measles appeared during the quarter.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—Sanitary condition of district is good.

GALWAY; *Turloughmore*.—A few cases of typhus occurred in the district.

GLENNAMADDY; *Glennamaddy, W.*—The health of the district has been exceptionally good. One death from enteric fever registered in the quarter. One death has been registered at the age of 103 years.

GORT; *Ardrahan*.—The uncertified deaths registered during the quarter were of females aged 81, 75, 76, and 70 years, respectively.

GORT; *Gort, W.*—The district was free from dangerously infectious disease during the quarter. There were several cases of pneumonia, but otherwise the health was good. The sanitary condition is at best only fair, and I fear the water supply (wells) is liable to pollution.

GORT; *Kinvarra*.—Parents are very slow in sending in children for vaccination, apparently owing to the occurrence of a number of cases of contagious skin diseases amongst children. The health of the district is good.

LOUGHREA; *Athenry*.—The health of the district is fairly good; no contagious or infectious disease prevalent during the quarter.

LOUGHREA; *Bullaun*.—Twelve of the fifteen deaths registered were of persons aged over 60 years.

LOUGHREA; *Woodford*.—The case of cancer registered was one of epithelioma of scalp of three years' standing. During the quarter a peculiar epidemic attacked children of from two to ten years old. The symptoms were two or three days of more or less severe gastro-intestinal disturbance, followed by marked jaun-

dice, which appeared in every case after the acute symptoms had subsided and convalescence commenced. Fifteen or twenty cases, none of which were serious, occurred between middle of October and first week in December.

MOUNT BELLEW; *Mount Bellew, W.*—All vaccinations have been postponed during past quarter.

OUGHTERARD; *Cloonbur, No. 1.*—Health of district good; no zymotic disease present.

OUGHTERARD; *Cloonbur, No. 2.*—Four cases of enteric fever occurred during the quarter, one of a suppressed kind, and the remaining three of a mild form. All are now, I am glad to say, quite recovered.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer were registered.

TUAM; *Tuam No. 1, W.*—There were some fever cases—scarlatina and enteric—during the quarter, otherwise health of district was good.

#### Leitrim County.

BAWNBOY; *Ballinamore.*—Sanitary state of district fair; a mild form of whooping-cough prevailing over portion of the district.

CARRICK-ON-SHANNON; *Drumshanbo.*—Health of district good during quarter. One case of typhoid fever treated. Deaths were registered of old people aged 87, 66, 83, 73, 89, 70 (two), 72 (two), 69, 73, 60, 84, and 78 years, respectively.

MANORHAMILTON; *Drumahaire.*—The sanitation of the district is still defective. With the exception of three cases of diphtheria, the public health of the district for the December quarter has been excellent.

MANORHAMILTON; *Lurganboy.*—No children were presented for vaccination during quarter.

MOHILL; *Carrigallen.*—The sanitary state of the district is good. There has been no epidemic during the quarter, with the exception of some cases of influenza.

MOHILL; *Mohill, W.*—The district is in a fair healthy state; no epidemic at present in district.

MOHILL; *Rinn.*—The district is healthy and free from epidemic disease.

#### Mayo County.

BALLINA; *Crossmolina.*—District in fairly good sanitary condition.

BALLINROBE; *Cappaghduff.*—Sanitary arrangements good. Some of the houses require whitewashing.

BALLINROBE; *Cong.*—Health of district good.

BALLINROBE; *Hollymount.*—Births and deaths under the average. Health of the people was good during the quarter; no epidemic.

BELMULLET; *Bangor.*—During quarter district has been healthy, and no epidemic. The deaths registered were due to phthisis, diphtheria, cardiac disease, pleurisy, old age, &c. Phthisis is a common cause of death in some parts of the district, especially Tullaghan, Doochooma, and Dooyork. Few vaccinations performed, consequent on severity of weather and long distance in many cases to bring children to stations.

BELMULLET; *Binghamstown, W.*—District in a healthy state generally. Of the deaths registered for the quarter, one was of a person aged 85 years, one 82, one 80, one 78, one 67, one 65, and two of persons aged 60 years.

BELMULLET; *Knocknalower.*—The district is in a fair sanitary condition.

CASTLEBAR; *Castlebar, No. 1, W.*—The district is presently free from all infectious and contagious diseases, and the health is particularly good. A marked sanitary improvement continues. I consider all still births and premature confinements should be registered. Further particulars can be supplied if necessary.

CLAREMORRIS; *Ballindine.*—District fairly healthy. The number of vaccinations is about the average for the corresponding quarter of previous years, owing to many defaulters having come in.

CLAREMORRIS; *Ballyhaunis.*—During the quarter there have been seven cases of scarlet fever, of a mild type, all are convalescent now. In other respects the health of the district has been satisfactory. Of the deaths registered two had attained the respective ages of 91 and 95 years. No deaths attributable to cancer. Sanitation continues fairly progressive.

SWINEFORD; *Foxford.*—Water supply defective. Health of district good. Measles was prevalent in one portion of the district, but there were no deaths from it.

WESTPORT; *Achill.*—Sanitary state of district good; general health of district very good; no epidemic present. No children presented for vaccination worth mentioning for the whole year.

WESTPORT; *Ballycroy.*—Three deaths from diphtheria for the quarter—twelve cases. A very severe type of influenza has made its appearance.

WESTPORT; *Bundorragha*.—Health of district good.

WESTPORT; *Louisburgh*.—District healthy.

WESTPORT; *Westport, W.*—One case of cancer of face. A Table dealing with Deaths from Tuberculous Diseases which occurred in the District within the last six years is enclosed. [For observations on the Table, see Text on "Health of the People," page 297.]

#### Roscommon County.

ATHLONE; *Brideswell*.—Vaccination postponed owing to prevalence of measles.

BALLINASLOE; *Creagh*.—One fatal case of diphtheria not yet registered occurred during the quarter.

BOYLE; *Ballyfarnan, No. 1.*—State of the district generally healthy.

BOYLE; *Boyle, No. 1, W.*—There have been some cases of scarlatina and enteric fever.

BOYLE; *Keadew*.—Public health good. Two deaths were registered during the quarter of persons aged 102 and 90 years, respectively.

CARRICK-ON-SHANNON; *Aughrim*.—There was one case of typhoid fever; the patient made a successful recovery. The sanitary condition of the district is good.

CASTLEREAGH; *Castleplunket*.—Sanitary condition somewhat better.

STROKESTOWN; *Roosky*.—Of the deaths registered nine were aged above 60 years, of whom four were above 70 years, and four above 80 years of age. The sanitation and health of the district are fairly satisfactory.

#### Sligo County.

BOYLE; *Ballyfarnan, No. 2.*—State of the district generally healthy.

BOYLE; *Gurteen*.—District healthy.

DROMORE WEST; *Castleconor*.—There were several cases of diphtheria during the quarter, with only three deaths, and I believe these would have been saved if they had been seen at the beginning of the disease.

DROMORE WEST; *Easky, W.*—Health of district good; no case of infectious disease during quarter.

DROMORE WEST; *Skreen*.—There was a single case of membranous croup resulting in death beginning of quarter, yet unregistered. The district otherwise very healthy.

SLIGO; *Ballymote*.—District is in a healthy condition. Owing to the inclement weather the number of primary vaccinations is not up to the average.

SLIGO; *Carney, No. 1.*—The health of this district has been good during the past quarter. Vaccinations backward owing to the prevalence of a catarrhal affection amongst children.

SLIGO; *Collooney*.—District healthy.

SLIGO; *Riverstown*.—District healthy.

TOBERCERRY; *Aclare*.—The district continues healthy and free from infectious disease.

TOBERCERRY; *Coolaney*.—Sanitary arrangements fairly good.

TOBERCERRY; *Tobercurry, W.*—There was one case of typhus fever. The sanitary state of the district is very satisfactory, with the exception of the town.
